

Riverside Park Pickleball Court

500 S. Light Plant Road

Aztec, New Mexico 87410

Scope of Work:

Two new pickleball courts need to be surfaced with rubber grip coat for safety and to complete this project. The concrete slabs were poured on May 6, 2023. There are saw cuts that will need filled before applying the rubber grip coat. All joints need filled EXCEPT the center cut running parallel to the nets. The surface of the concrete was slick finished and needs ground down or profiled for proper adhesion of the coating. Concrete needs primed with grip coat primer and then surfaced with two coats of grip coat. Finally, the white lines need striped according to the USA Pickleball specifications. See attached pdf.
