Scope of Services

1. INTRODUCTION

Indian River County Department of Utility Services (IRCDUS or Department) is requesting statements of qualifications (SOQs) from qualified engineering firms to provide planning, engineering and design, permitting, bidding and construction phase services for the Asbestos Concrete (AC) Pipe Replacement Program for Area 3 within the water distribution system. The boundaries of Area 3 are generally 12th Street to the north, Old Dixie Highway to the east, 6th Street to the south, and 20th Avenue to the west in Vero Beach, Florida (see attached project boundary map). IRCDUS anticipates selecting one Consultant who will serve as engineer of record (EOR) for one or more construction phases within Area 3. The County may choose to amend the agreement with Consultant to include subsequent Areas of the AC Pipe Replacement Program, or the County may exercise its option to issue additional RFQ(s). Initial screening, ranking, final ranking and negotiations will be in accordance with the Consultant Competitive Negotiation Act, Section 287.055, Florida Statutes. The Board of County Commissioners reserves the right to accept or reject any and all submittals and to waive any and all informalities.

2. Background

Indian River County, Department of Utility Services was formed over 30 years ago when Indian River County's water, wastewater, and solid waste utility services were consolidated under one department. IRCDUS now provides water and wastewater services to over 50,000 accounts. The water system, which is the largest in the County, provides service to approximately 110,000 people and businesses in its urban service area (USA). The water system includes two water treatment plants with a total of sixteen wells, as well as two primary treatment facilities for the demineralization concentrate, approximately 900 miles of pipeline, and 10 million gallons of treated water storage. The wastewater system, with four wastewater treatment plants and more than 484 miles of sanitary sewers, is also the largest such system in the County. IRCDUS maintains and operates a reuse system comprising of approximately 45 miles of pipeline, 3 million gallons storage tank and pumps.

3. Project Overview

The AC Pipe Replacement Program ("Program") is a 10-year plan to replace approximately 20.62 miles of asbestos concrete (AC) pipe within the County's water distribution system. To facilitate funding and resource management, the Program is divided into seven (7) project areas and prioritized based on risk exposure due to age and other factors. Area 3 is the first of the 7 areas, and includes approximately 6.06 miles (31,997 LF) of existing AC water mains dating back to the 1950's and due for replacement. The County seeks to replace these water mains primarily with 6-inch and 8-inch PVC piping. In addition, the project will involve reconnecting approximately 374 existing services to the new water mains.

4. General Requirements

The selected consultant will need to design new replacement water distribution mains to ensure no impact on the existing water network and operation of the Oslo Water Treatment Plant (WTP).

The following are anticipated tasks the Consultant will be expected to perform in association with the project. Specific task assignments may be subject to scope definition and fee negotiation on a task-by-task basis:

- Attend various board, community, and agency meetings on behalf of the Department, and represent the Department on technical issues relating to design and construction matters.
- Project Coordination with other County Departments (e.g., Public Works) and agencies (e.g., City of Vero

Beach) as necessary.

- Plan and develop the roadmap of the “subprojects” (construction phase) required to complete the AC Pipe Replacement Program, Area 3, and other Areas, if requested by County via amendment to the agreement or subsequent work order.
- Evaluate Alternative Project Delivery Models, recommend options, and facilitate decision making.
- Perform water system engineering and design for water mains and appurtenances, including hydraulic modeling and analysis.
- Provide estimate of total project cost and construction/bid timeline at each progressive design package based on project delivery model(s).
- Apply for and obtain necessary permits needed, including Indian River County Right-of-Way Permit and Florida Department of Environmental Protection.
- Provide sketch and legal descriptions for any proposed easements
- Bidding phase services, including responses to Bidder questions through the Purchasing Division, assistance in preparation of addenda, conformed documents, and recommendation of award.
- Construction phase services, including attending construction meetings, reviewing submittals, contractor’s payment request and inspection services.
- Facilitate monthly progress meetings with County staff.
- Prepare record drawings and assist with updates to the IRCDUS GIS system.
