

Update of LATS LRTP and Preparation of New LCOG Area LRTP	
Question	Response
1 Regarding the SF 330 forms, would you like separate SF 330's (parts I and II) for both the Prime and any Subconsultants we have on our team or would you like one combined SF 330?	Please try to provide separate forms
2 Regarding relevant project experience, are you looking for a minimum or maximum of three (3) recently performed relevant project experience descriptions? I understand there is a 15 page limit but I wasn't sure (space depending of course) if we could include more than 3 relevant project descriptions.	Please try to keep you list to 3 relevant descriptions being mindful of page limitations.
3 Is there a budget for this project? If so, what is it?	Agency budget information can be found in the LATS UPWP and LCOG UPWP for both FY 20 and FY 21 at https://www.lowcountrycog.org/
4 Will you be the point of contact on this project?	Stephanie Rossi will be the main contact at LCOG. Stephanie Rossi, 843-473-3958, srossi@lowcountrycog.org
5 What resources will the COG lend to this project?	LCOG staff have done the majority of the work updating and compiling the socioeconomic data for both the LATS and LCOG LRTPs. LCOG staff have begun to work with technical committees to review project lists, LCOG staff can offer resource and assistance where appropriate.
6 Email me a copy of the latest LATS LRTP	https://cms.revize.com/revize/lowcountry/2040%20LATS%20LRTP.pdf
7 One question on the RFP: Is the Drug-Free Workplace Form and the NonResidents Form Affidavit excluded from the 15-page count limit	We will not count the required forms against the page limitations.
8 Task B in both the MPO and COG work program calls for the updating of the travel demand model. Does this entail producing a new horizon year or simply updating any changes to the network that have arisen since the 2016 update or will it come from the new LRTP? Will the socio-economic data for future years be updated as well?	The model would need to be updated with any changes since the last plan update and ny data updates that are needed to do so. The model and the plan update horizon years need to match.
9 Will the consultant be involved in scenario planning using the socio-economic data referenced in the above question?	As typical with plan updates we would expect TDM runs of a no build & build options to inform the plan update.
