SCOPE OF WORK

OVERVIEW

The Albuquerque Public Schools (APS) operates one hundred and seventy sites serving approximately 85,000 users within the boundaries of the Albuquerque Public Schools district.

The desired service must be delivered to either or both of the following locations: 930 Oak Street (APS Data Center) and 6400 Uptown Boulevard (APS Central Office).

APS currently has two (2) twenty (20) Gbps Internet circuits, one delivered to the APS data and the other to the APS Central Office. APS has a minimum commitment rate of five (5) Gbps per circuit, but each is burstable to the full twenty (20) Gbps. APS is currently utilizing around seven (7) Gbps of Internet per circuit each business day but foresees the possibility of growth over the coming years, with the potential to exceed twenty (20) Gbps per circuit.

If the need for additional capacity exists, APS needs to be able to expand past forty (40) Gbps to meet those demands. We would expect the selected vendor to be able to do so within 60 days of the request.

RFP SCHEDULE

The RFP Buyer will make every effort to adhere to the RFP Schedule as noted on front cover of this RFP. The schedule is subject to change by addendum. The evaluation committee **MAY** interview the Offeror(s) of the top rated proposals; however, contracts may be awarded without such interviews and based solely on written offers. Finalists will be contacted to schedule interviews if required. If an interview is requested, evaluation scores will be re-scored to reflect written response and interview response.

PURPOSE OF THIS REQUEST FOR PROPOSAL

The purpose of the Request for Proposal (RFP) is to solicit sealed proposals to establish a contract through competitive negotiations for the procurement of Commodity Internet Services. Selected service provider will provide an Internet service immediately scalable up to 40 Gbps with the ability to grow past 80 Gbps of Internet as needed. The district is willing to consider one (1) or multiple circuits to meet its needs. The district desires a resilient solution that to the extent financially feasible avoids a single point of failure and provides distinct physical paths.

SCOPE OF WORK

- Prospective vendors should clearly explain the end-to-end path diversity from exchange to end location being offered and how service outages will be addressed.
- Please explain how your network redundancy ensures no single point of failure will affect APS. If single point failures exist, explain how a failure would be mitigated.
- SLA's for services are to be defined within the proposal and will begin upon final acceptance by the District.
 - Credits for loss of service need to be explained in the SLA.
- After the Internet circuit is installed and configured, the service provider will conduct testing and provide results to APS to ensure provisioned bandwidth with no errors and low latency within the contractual SLA.

- The Service provider will provide APS access to an online reporting system/tool in which APS can run reports and track Internet utilization and activity on the Internet circuit. The reporting system will include, but not be limited to, real-time and historical data, inbound/outbound bandwidth utilization, packet delivery/loss, trend statistics (tracked in minutes, hours, days, weeks and months) and DDoS occurrences (date of attack, location/site attacked, duration of attack, origin of attack, type of attack).
- The service provider must be able to provide DDoS protection at the BGP handoff as well as at the other attack vectors of the service, if this is an additional cost the pricing must be provided and state its E-rate eligibility or non-eligibility.
- An Autonomous System Number (ASN) and CIDR subnet is registered to APS. Winning bidder must be able to peer with APS equipment using BGP and allow APS to advertise our IPv4 address space.
 - Note: APS is considering a transition to IPv6 and the service provider needs to indicate whether or not they support IPv6.
- Any request from APS to increase bandwidth from the service provider on the circuit or circuits, must be seamless without the need to rebid and/or require any further hardware and/or installation services.
- The service provider must provide details of their support organization, including details on their Service Request and Critical Incident procedures.

Proposal Preparation Instructions

- Response to proposals sent to APS must include the following for consideration: The desired start date for this service is no later than August 24, 2024, the expiration date of the existing Internet contract.
- The new circuit will be turned-up no later than August 24, 2024, which means billing for said circuit will not apply until the service is turned up. Work needed to prepare for the service date activation can take place before August 24, 2024, only after the contract between the winning bidder and APS has been signed and executed.
- In addition, work completed for preparation of service activation must be in compliance with E-Rate rules and regulations so as not to place APS at risk of any violations and interfere with funding approvals.
- Pricing should include costs at various speeds including vendor proposed increment levels.

Additional Terms and Conditions

- Service providers shall provide a contractual term in their bids of 36 months, with two (2) optional one-year renewals.

- The term of any resulting contract will expire on June 30th to coincide with the fiscal year and E-rate funding year.
- Pricing must be inclusive of any required cross connects, transport, and customer premise equipment required to deliver the service to APS's communication racks.
- Service Providers are required to comply with APS's non-disclosure agreement (NDA) documents.
- The vendor must be willing to offer discounted billing. The district currently utilizes the BEAR process but reserves the right to transition to discount billing if it desires.
- The vendors must have experience working in the federal E-rate program.
- The vendor must be willing to comply with all E-rate rules.
- As required by Section 54.500(f) of Part 47 of the Code of Federal Regulation all offers in response to this RFP must offer the lowest corresponding price (LCP) which is defined as the lowest price that a service provider charges to nonresidential customers who are similarly situated to a particular E-rate applicant (school, library, or consortium) for similar services.

<https://www.usac.org/e-rate/service-providers/step-2-responding-to-bids/lowest-corresponding-price/> for more information on the requirements relating to LCP.

- By submitting a proposal on the requested services herein, the vendor certifies its proposed services and/or products comply with Part 47 Section 54.9 and 54.10 of the FCC rules which prohibits the sale, provision, maintenance, modification, or other support of equipment or services provided or manufactured by Huawei, ZTE, or any other covered company posing a national security threat to the integrity of communications networks or the communications supply chain. See <https://www.usac.org/about/reports-orders/supply-chain/> for more details.
- Provide an FCC Registration Number (FRN) and proof of Green Light Status from the FCC. Any potential bidder found to be in Red-Light Status may be disqualified from participation in the bidding process and may be considered non-responsive.

Vendor Qualifications, Certifications, and References

- Vendors are required to provide qualifications, Security Certifications, and Customer References.

Budget and estimated Pricing

- APS is interested in the ability to scale bandwidth up/down, as needed, to meet growing demand. Therefore, the district is asking for a burstable / on-demand solution. A desired feature of this service is the ability to reduce minimum bandwidth requirements, and thus costs, during non-peak times such as holidays and summer break. The district would expect the costs to scale downward during non-peak times, thus allowing APS to pay for what it uses, while saving taxpayer dollars during off peak times.
- Vendors are encouraged to present pricing on burstable / on-demand service where APS pays a baseline fee and then pays for service used. Vendors will need to explain how the usage of burstable / on-demand

service would be calculated on a daily / weekly / monthly basis to determine the monthly bill (for example, a 1-2 Gbps base, with a weekday peak of 8 Gbps, staying within 80% of peak for over 2 hours). APS intends to use the Internet circuit in the same place as the current circuits.

- Final acceptance will be based upon the results of testing provided during initial installation of the Internet circuit(s).
