

## QUESTIONS SUBMITTED FOR CLARIFICATION 8.14.23

Please see the list of questions below related to the RFP for the INODIC Grant project:

1. Has Spalding County selected any prefabricated structures to be used in lieu of stick built or block construction for the park buildings Cedar Forest products (I believe Stansell sent this to Kelly on Friday)
2. Will Spalding County provide the as-built survey and boundary information for the project areas, or will that be the responsibility of the Prime? We do not have as built, Boundaries should not be an issue.
3. There are four locations and projects which are funded by the grant and only two of these appear to be covered in the scope of service/conceptual plans. What will be involved with the scope of the Ambucs Park Project (\$1.21 million) and the other renovation and maintenance projects (\$1.98 million) indicated in the documents provided? The 1.21 million is the lighting projects at Ambucs and the 1.98 million is the softball fields at Volunteer. Yes they are both included
4. The quote sheet offers multiple item descriptions at lump sum costs. Is there a certain way the County would like the fees itemized or is this up to the Prime? This would be up to the prime. A lump sum per project was the original intent.
5. Are electronic or hard copy prints/drawings available for the existing buildings? There are no usable drawings of the existing buildings.
