Re: Maintenance and Repair Notification; HNX-4YAD-D6RXW

Dear Mr. Springs:

This is in response to your recent request to perform Maintenance & Repair to an existing bulkhead and outfall pipe at 4789 Hwy 17 Business, Murrells Inlet, TMS# 41-0124-100-00-00. Specifically, you requested to replace 60 LF of the existing bulkhead and a section of the 24" stormwater pipe. This work conforms to the Department's Normal Maintenance and Repair criteria as set forth in Regulation 30-5.(D).

"Normal maintenance and repair applies only to work on a structure which has been previously permitted or is grandfathered or exempted and is still generally intact and functional in its present condition. The work may only extend to the original dimensions of the structure, and any expansion, additions, or major rebuilding will require either a Department permit or documentation to and written approval from the Department."

Acknowledgement of this maintenance and repair request does not relieve you of your responsibility to obtain any local government permits that may be required for this work nor does it permit any activity that is not previously authorized by this agency. Please note that the Department reserves the right to require a full permit if deemed necessary. If you have any further questions concerning this matter, please do not hesitate to contact me at 843-238-4528.

Sincerely,

Kendra G Elliott
Project Manager
