

## REQUEST FOR QUOTE

**March 25, 2022**

The City of Orange Beach is requesting quotes for emergency dredging of an excavated marina basin at 4697 Walker Avenue, Orange Beach, AL. The project objective is to deepen an existing marina basin to accommodate emergency fire and police response vessels.

The City will provide a prepared, upland spoil disposal and dewatering site located between **210 and 650 linear feet** (LF) from the project area (see attached graphic). The basin is comprised of primarily sand material, and the city will select a contractor to perform dredging and dewatering at a "Day Rate" (contractor should estimate a dredged quantity in cubic yards per day), plus a rate for mobilization and demobilization. The target depth for the majority of the project will be -7'. The contractor **will not** be required to transport the material from the disposal area to other locations. The contractor **will have the option** to utilize the dredged material if they so choose (i.e., remove and haul from the disposal site), but there should be **no cost to the City associated with this option**.

Quotes are to be emailed to [pwest@orangebeachal.gov](mailto:pwest@orangebeachal.gov) by Noon, March 31<sup>st</sup>, 2022. Hard copies will also be accepted: 4697 Walker Ave., Orange Beach, AL 36561.

Please contact Phillip West for additional information: (251) 747-6166;
