Dawson County Board of Commissioners
25 Justice Way, Suite 2220
Dawsonville, Georgia 30534

Attention: Mr. David Headley
DHeadley@dawsoncounty.org

Subject: Limited Subsurface Investigation
Former County Maintenance Facility
Highway 53 West near Creekstone Lane
Dawsonville, Dawson County, Georgia 30534

Dear Mr. Headley,

Mill Creek Environmental, LLC (MCE) has completed a Limited Subsurface Investigation (LSI) for the site referenced above. The purpose of the LSI was to further evaluate the environmental concerns identified in an Environmental Desktop Review completed for the site by MCE on November 11, 2021. The following environmental concerns were identified:

- The historical use of the property as a county maintenance facility beginning in the early 1970s;
- Reported observations of oily soil and a petroleum odor in an area to the west of the maintenance shop formerly used for vehicle maintenance;
- The former presence of underground storage tanks (USTs) containing diesel fuel that were reported to have been removed from the ground in the early 2000s without regulatory agency notification; and
- The presence of a storm shelter that was formerly utilized as a maintenance pit for equipment service and repair.

Work was completed in general accordance with the American Society for Testing and Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase II Environmental Site Assessment Process (E1903-19)*.

SCOPE OF WORK

The scope of work included collecting soil and/or groundwater samples from four soil borings for laboratory analysis. Soil samples were analyzed for volatile organic compounds (VOCs) by EPA Method 8260D and polycyclic aromatic hydrocarbons (PAHs) by EPA Method 8270C. Groundwater was not encountered above sampling equipment refusal depth in any of the soil borings.

LABORATORY ANALYTICAL RESULTS

Soil samples were submitted to Analytical Environmental Services, Inc., (AES) in Atlanta, Georgia for analysis.

Soil

Eight soil samples were collected from four soil borings drilled in exterior locations next to the maintenance shop, former equipment maintenance pit, and in the vehicle and equipment storage yard. No VOCs were detected above laboratory reporting limits in the soil samples submitted for analysis. No PAHs were detected above laboratory reporting limits in the soil samples submitted for analysis.

RECOMMENDATIONS

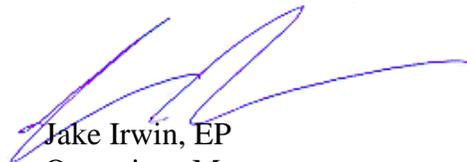

Based on the findings of this LSI, no further investigation activities are recommended at this time.

If you have any questions or need additional information, please contact us at 706-579-1607 or jirwin@millcreekenvironmental.com.

Sincerely,
MILL CREEK ENVIRONMENTAL, LLC

1 CERTIFICATION

We have completed this assessment in accordance with generally accepted environmental practices and procedures as of the date of this report. We have employed the degree of care and skill ordinarily exercised under similar circumstances by reputable environmental professionals practicing in this area. The conclusions contained within this assessment are based upon site conditions we readily observed or were reasonably ascertainable and present at the time of the site inspection, reasonably ascertainable regulatory information, and reasonably ascertainable historical information.

The scope of this assessment does not purport to encompass every report, record, or other form of documentation relevant to the property being evaluated. To the best of our knowledge, this Limited Subsurface Investigation has been completed in general compliance with ASTM Standard E1903-19 for Phase II Environmental Site Assessments.

We declare that we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the site.

2 INTRODUCTION

Mill Creek Environmental LLC (MCE) has completed a Limited Subsurface Investigation (LSI) for the former Dawson County maintenance facility located at Highway 53 West near Creekstone Lane in Dawsonville, Dawson County, Georgia (the “site”). The LSI was completed at the request of Mr. David Headley, Dawson County Manager. The scope of work was completed in general accordance with the American Society for Testing and Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase II Environmental Site Assessment Process (E1903-19)*.

2.1 Purpose

The purpose of this investigation was to evaluate whether soil and/or groundwater at the site had been impacted by the historical use of the site as a county maintenance facility.

2.2 Scope of Work

The scope of work for the LSI included the following tasks:

- **TASK 1** - Prior to drilling, MCE contacted Georgia 811 One-Call utilities protection center to locate underground utilities around the site. In addition, MCE retained a private utility locator to locate underground utilities in the proposed work areas. Other utility protection measures included a visual assessment of the work area to avoid potential damage to underground utilities;
- **TASK 2** - Four soil borings were drilled using a GeoProbe and direct-push drilling and sampling methods to collect soil and/or groundwater samples. The soil borings were drilled in locations selected based on the identified environmental concerns, site layout, accessibility, topography, and marked underground utilities. Each of the soil borings was drilled to 30 feet below ground surface (ft bgs), sample equipment refusal, or contact with groundwater, whichever was encountered first;
- **TASK 3** - Continuous soil samples were collected from each soil boring for physical description and screening for volatile organic compounds (VOCs) using a photo-ionization detector (PID) and the headspace method;
- **TASK 4** - Based on PID measurements, physical soil characteristics, and depth, two soil samples were collected from each soil boring for laboratory analysis. Samples were submitted to a certified laboratory and analyzed for VOCs by EPA Method 8260D and polycyclic aromatic hydrocarbons (PAHs) by EPA Method 8270C; and
- **TASK 5** - This report was prepared to document the findings of the LSI.

2.3 Limitations

This report and any other information which MCE prepared and submitted to the **Dawson County Board of Commissioners**, (*the user*), in connection with this project (the “Report”), are for the sole use and benefit of the *user* and may not be used or relied upon by any other person or entity without the prior written consent of the *user* and MCE, except as provided for specifically in the agreement. Any such consent given by MCE will be deemed to be and will be subject to the terms and conditions as MCE may reasonably require, including without limitation a monetary limit to MCE’s liability to any person granted such consent (the “Grantee”), and any such Grantee will be deemed to have agreed to such terms and conditions by its use and reliance on the Report. The use or re-use of this document or the findings, conclusions, or recommendations presented herein, by any other party or parties is at the sole risk of said *user*.

MCE and the *user* agree that (1) the information in the Report relates only to the property specifically described in the Report and was presented in accordance with and subject to the scope of work described in the Report or specifically agreed to by MCE and the *user*; (2) the information and conclusions provided in the Report apply only to the site as it existed at the time of MCE’s limited assessment. Should site use or conditions change or should there be changes in applicable laws, standards, or technology, the information and conclusions in the Report may no longer apply; (3) MCE makes no representations regarding the value or marketability of this property or its suitability for any particular use, and none should be inferred based on the Report; (4) the Report is intended to be used in its entirety and no excerpts may be taken to be representative of the findings of this investigation; and (5) environmental land-use issues and constraints of possible relevance (e.g., wetland surveys, sensitive habitats, radon, lead paint, asbestos, etc.) were not included in this scope of services.

3 SITE DESCRIPTION

The site is composed of a 4.4 acres parcel of land identified in the Dawson County Tax Assessor’s database as Parcel ID: 083 001. Tax records identify the property as “Dawson County Annex and Road Department Shop”. The property is currently used as an equipment storage facility by the Dawson County Facilities Maintenance Department.

The western portion of the site is improved with a 2,600 square-foot pole shed used for equipment and materials storage; a 400 square-foot metal building attached to the pole shed containing a 275-gallon IBC container for used oil storage surrounded by a secondary containment; a 300 square-foot pre-fabricated metal building used for storage; a 2,800 square-foot shop building with two roll-up bay doors, office space, with a restroom; and a concrete storm shelter previously used as an equipment maintenance pit. Ground cover on the western portion of the site is asphalt, gravel, and grass.

The eastern portion of the site is at a lower elevation and has a history of use as a vehicle and equipment storage yard. There are currently no buildings on this portion of the site and the eastern

and northern portions remain wooded. Ground cover on the eastern portion of the site is primarily grass with wooded areas to the north and east.

The site location is provided as **Figure 1**. Site layout and analytical results are provided in **Figure 2**.

4 BACKGROUND INFORMATION

MCE completed an Environmental Desktop Review for the site on November 11, 2021. Based upon our observations and information gathered during the desktop review, MCE identified the following environmental concerns:

- The historical use of the site as a county maintenance facility beginning in the early 1970s;
- Reported observations of oily soil and a petroleum odor in an area to the west of the maintenance shop formerly used for vehicle maintenance;
- The former presence of underground storage tanks (USTs) containing diesel fuel that were reported to have been removed from the ground in the early 2000s without regulatory agency notification; and
- The presence of a storm shelter that was formerly utilized as a maintenance pit for equipment service and repair.

MCE recommended completion of a Limited Subsurface Investigation (LSI) to address the presence of these environmental concerns.

5 INVESTIGATION METHODS

On December 20, 2021, a truck-mounted Geoprobe drilling rig was used to drill 2.25-inch diameter soil borings using direct push drilling and sampling methods in four locations (SB-1 through SB-4). All borings were drilled in exterior locations along the northwest and central portions of the site. Continuous soil samples were collected from each soil boring from ground surface to a depths ranging from approximately 5-11 feet below ground surface (bgs), where equipment refusal was encountered. Due to shallow equipment refusals, multiple drilling attempts were made in the selected boring areas. Groundwater was not encountered in any of the soil borings.

5.1 Soil Boring Locations

Soil boring locations were selected based on the locations of the identified environmental concerns, drilling rig accessibility, local topography, inferred groundwater flow direction, and marked underground utilities.

SB-1 This soil boring location was selected to assess soil and groundwater conditions along the west side of the maintenance shop due to reports of oily soil and petroleum odors

noted in the area. Ground cover at this location was gravel. Soil boring SB-1 was drilled to a total depth of 11 ft bgs, where equipment refusal was encountered. Groundwater was not encountered in this boring. Soil sample SB-1-4 (0-6 foot depth) and soil sample SB-1-11 (8-11 foot depth) were collected at this location.

SB-2 This soil boring location was selected to assess soil and groundwater conditions along the east side of the maintenance shop where former diesel USTs were reportedly removed from the ground in the early 2000s. Ground cover at this location was grass. Soil boring SB-2 was drilled to a total depth of 5 ft bgs, where equipment refusal was encountered. Groundwater was not encountered in this boring. Soil sample SB-2-2 (0-2 foot depth) and soil sample SB-2-5 (3-5 foot depth) were collected at this location.

SB-3 This soil boring location was selected to assess soil and groundwater conditions down-gradient of the former maintenance pit and former UST system. Ground cover at this location was grass. Soil boring SB-3 was drilled to a total depth of 11 ft bgs, where equipment refusal was encountered. Groundwater was not encountered in this boring. Soil sample SB-3-4 (0-4 foot depth) and soil sample SB-3-11 (8-11 foot depth) were collected at this location.

SB-4 This soil boring location was selected to assess soil and groundwater conditions near the equipment and vehicle storage area. Ground cover at this location was grass. Soil boring SB-4 was drilled to a total depth of 5 ft bgs, where equipment refusal was encountered. Groundwater was not encountered in this boring. Soil sample SB-4-2 (2-4 foot depth) and soil sample SB-4-5 (3-5 foot depth) were collected at this location.

Soil boring locations are shown on **Figure 2** and soil boring logs are provided in **Appendix A**.

5.2 Soil Sampling Procedures

Continuous soil samples were collected from ground surface to the total depths of the borings for physical description, field screening and laboratory analysis. Soil samples were collected using a 4-foot macro-core sampler with single-use, disposable polyvinyl chloride liners. Continuous samples were screened for VOCs using a MINIRAE photo-ionization detector (PID) and the headspace method. VOCs were not detected above 1.0 parts per million (ppm) in any soil samples. Headspace screening results are included on the boring logs provided in **Appendix A**.

Based on the field screening results, two soil samples were collected from each soil boring and submitted for laboratory analysis. Soil samples were placed into laboratory-provided containers, sealed, labeled, packed on ice, and hand delivered to Analytical Environmental Services (AES) in Atlanta, Georgia under standard chain-of-custody procedures.

Soil samples were analyzed for VOCs by EPA Method 8260D and PAHs by EPA Method 8270C.

5.3 Soil Boring Abandonment

Following completion of soil sampling activities, soil borings were backfilled with bentonite chips to the original grade.

5.4 Sampling Equipment Cleaning

Non-disposable down-hole sampling equipment was cleaned between soil boring locations in accordance with Georgia Environmental Protection Division (EPD) regulations and guidelines.

6 LABORATORY ANALYTICAL RESULTS

The soil samples collected from the site on December 10, 2021 were delivered directly to AES laboratory. All samples arrived undamaged and within the holding time and temperature requirements for each analytical parameter. Laboratory analytical results are summarized below.

6.1 Volatile Organic Compounds

No VOCs were detected at concentrations above laboratory reporting limits in any of the soil samples submitted for analysis.

6.2 Polycyclic Aromatic Hydrocarbons

No PAHs were detected at concentrations above the laboratory reporting limits in any of the soil samples submitted for analysis.

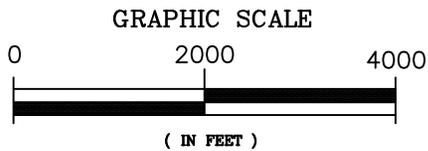

7 FINDINGS AND RECOMMENDATIONS

The findings of this LSI are summarized below:

- Soil borings were drilled in four location at the site and continuous soil samples were collected from each location for physical description, field screening and laboratory analysis;
- Groundwater was not encountered above sampling equipment refusal depth in any of the soil borings. Groundwater samples were not collected for laboratory analysis;
- A total of eight soil samples were analyzed for VOCs and PAHs;
- No VOVs were detected above the laboratory reporting limits in the soil samples submitted for laboratory analysis; and
- No PAHs were detected above the laboratory reporting limits in the soil and groundwater samples submitted for laboratory analysis.

Based on the findings of this LSI, no further investigation activities are recommended at this time.

RE: Dawson Co. Board of Commissioners

Dear Alex Koslick:

Order No: 2112P88

Analytical Environmental Services, Inc. received 9 samples on 12/20/2021 2:20:00 PM for the analyses presented in following report.

“No problems were encountered during the analyses except as noted in the Case Narrative or by qualifiers in the report or QC Summary. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits.

AES’s accreditations are as follows:

-NELAP/State of Florida Laboratory ID E87582 for analysis of Non-Potable Water, Solid & Chemical Materials, Air & Emissions Volatile Organics, and Drinking Water Microbiology & Metals, effective 07/01/21-06/30/22.

State of Georgia, Department of Natural Resources ID #800 for analysis of Drinking Water Metals, effective through 06/30/22 and Total Coliforms/ E. coli, effective 04/20/20-04/24/23.

-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Metals and PCM Asbestos), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) Direct Examination, effective until 11/01/23.

These results relate only to the items tested as received. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

Sincerely,

Mirzeta Kararic
Project Manager

Qualifiers:

- * Value exceeds maximum contaminant level
- BRL Below reporting limit
- H Holding times for preparation or analysis exceeded
- N Analyte not NELAC certified
- B Analyte detected in the associated method blank
- > Greater than Result value

- E Estimated (value above quantitation range)
- S Spike Recovery outside limits due to matrix
- Narr See case narrative
- F Analyzed in the lab which is a deviation from the method
- < Less than Result value
- J Estimated value detected below Reporting Limit

SAMPLE/COOLER RECEIPT CHECKLIST

1. Client Name: Mill Creek Environmental, LLC

AES Work Order Number: 2112P88

2. Carrier: FedEx UPS USPS Client Courier Other _____

	Yes	No	N/A	Details	Comments
3. Shipping container/cooler received in good condition?	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	damaged <input type="checkbox"/> leaking <input type="checkbox"/> other <input type="checkbox"/>	
4. Custody seals present on shipping container?	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>		
5. Custody seals intact on shipping container?	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>		
6. Temperature blanks present?	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>		
7. Cooler temperature(s) within limits of 0-6°C? [See item 13 and 14 for temperature recordings.]	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	Cooling initiated for recently collected samples / ice present <input type="checkbox"/>	
8. Chain of Custody (COC) present?	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>		
9. Chain of Custody signed, dated, and timed when relinquished and received?	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>		
10. Sampler name and/or signature on COC?	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>		
11. Were all samples received within holding time?	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>		
12. TAT marked on the COC?	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	If no TAT indicated, proceeded with standard TAT per Terms & Conditions. <input type="checkbox"/>	

13. Cooler 1 Temperature 3.9 °C Cooler 2 Temperature _____ °C Cooler 3 Temperature _____ °C Cooler 4 Temperature _____ °C
 14. Cooler 5 Temperature _____ °C Cooler 6 Temperature _____ °C Cooler 7 Temperature _____ °C Cooler 8 Temperature _____ °C

15. Comments: _____

I certify that I have completed sections 1-15 (dated initials). CP 12/20/2021

	Yes	No	N/A	Details	Comments
16. Were sample containers intact upon receipt?	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>		
17. Custody seals present on sample containers?	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>		
18. Custody seals intact on sample containers?	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>		
19. Do sample container labels match the COC?	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	incomplete info <input type="checkbox"/> illegible <input type="checkbox"/> no label <input type="checkbox"/> other <input type="checkbox"/>	
20. Are analyses requested indicated on the COC?	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>		
21. Were all of the samples listed on the COC received?	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	samples received but not listed on COC <input type="checkbox"/> samples listed on COC not received <input type="checkbox"/>	
22. Was the sample collection date/time noted?	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>		
23. Did we receive sufficient sample volume for indicated analyses?	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>		
24. Were samples received in appropriate containers?	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>		
25. Were VOA samples received without headspace (< 1/4" bubble)?	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>		
26. Were trip blanks submitted?	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	listed on COC <input checked="" type="checkbox"/> not listed on COC <input type="checkbox"/>	

27. Comments: _____

This section only applies to samples where pH can be checked at Sample Receipt. I certify that I have completed sections 16-27 (dated initials). CD 12/20/21

	Yes	No	N/A	Details	Comments
28. Have containers needing chemical preservation been checked? *	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>		
29. Containers meet preservation guidelines?	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>		
30. Was pH adjusted at Sample Receipt?	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>		

* Note: Certain analyses require chemical preservation but must be checked in the laboratory and not upon Sample Receipt such as Coliforms, VOCs and Oil & Grease/TPH. This also excludes metals by EPA 200.7, 200.8 and 245.1 which will be verified between 16 and 24 hours after preservation. I certify that I have completed sections 28-30 (dated initials). CD 12/20/21
