

Q & A – Bid #20-06-003 Zinc Orthophosphate

1. Can zinc chloride be substituted for zinc sulfate?

No, zinc sulfate is more efficient than zinc chloride.

2. What is the ratio of zinc to ortho?

We can provide no specific guidance on this question.

3. The specs call for 40-50% zinc orthophosphate. Can you please confirm how you get that %?

The % is based on the weight of zinc orthophosphate.
