

Questions for Solid Waste Collection & Recycling Services Pre-Conference held 8/17/2021

1. What will be the start date of the new contract?

April 1, 2022

2. Will back door service be offered to residents who may not be physically disabled but wish to pay for back door service?

Back door service will be offered to residents who provide a doctor's certification of the need for BDS. It will be offered to those residents at no charge. It will not be available to anyone who cannot provide a doctor's certification.

3. What will be the size of the bulk pile that the vendor will be required to pick up?

The current contract defines a maximum 6' x 6' x 6' pile for bulk pickups. The proposals may define a different size pile.

4. Will truck weights/tonnage be required for reporting of yard waste collection (as disposal facility may not have truck scales)?

If a disposal facility does not have truck scales, the City will require truck weights at the beginning of the contract in order to establish an average weight per truck load. Once an average weight is established, a load count will be sufficient for monthly reporting. Annual or semi-annual truck weight will be required in order to verify average load weight.

5. What is the current base collection rate charged per address?

\$266.40 per year
