Re: USFWS File Number 2016-0180

Dear Mr. Sherrod:

The U.S. Fish and Wildlife Service has reviewed your correspondence requesting information regarding protected species related to possible effects of your proposed “Abercorn Landing Boat Ramp Improvements” project. The Effingham County Board of Commissioners is proposing to provide a push slab extension for the existing Abercorn Landing boat ramp on Abercorn Creek in Effingham County, Georgia. This project would be funded via the Coastal Incentive Grant program funded by the National Oceanic and Atmospheric Administration (NOAA) and administered by the Coastal Resources Division of the Georgia Department of Natural Resources. Our comments are provided in accordance with provisions of the Endangered Species Act of 1973, as amended; (16 U.S.C. 1531 *et seq.*) to further the conservation of fish and wildlife resources and their habitat.

West Indian manatees (*Trichechus manatus*) are considered to occur within all tidal waters in coastal Georgia. The State of Georgia has taken the position that all coastal waters that are large enough to accommodate manatees are considered to be manatee habitat. Construction activities for this project should follow the Construction Conditions for Manatee Habitat (attachment 1).

ATTACHMENT H (page 3 of 5)

We appreciate the opportunity to comment on this project. If you have any further questions, please contact our Coastal Georgia Sub Office biologist, Gail Martinez, at 912-832-8739 extension 7.

Sincerely,

Strant Colwell
Coastal Office Supervisor

Construction Manatee Conditions

- a. The permittee agrees that all personnel associated with the project will be advised that there are civil and criminal penalties for harming, harassing or killing manatees, which are protected under the Endangered Species Act of 1973 and the Marine Mammal Protection Act of 1972. The permittee and contractor will be held responsible for any manatee harmed, harassed or killed as a result of construction activities.
- b. Siltation barriers will be made of material in which manatees cannot become entangled, are properly secured, and are regularly monitored to avoid manatee entrapment. Barriers must not block manatee entry to or exit from essential habitat.
- c. All vessels associated with the project will operate at "no wake/idle" speeds at all times while in the construction area. All vessels will follow routes of deep water whenever possible.
- d. All on-site project personnel are responsible for observing water-related activities for the presence of manatees. All construction and activities in open water will cease upon sighting of manatees within fifty feet of the project area. Construction activities will not resume until the manatees have left the project area for at least thirty minutes.
- e. Extreme care will be taken in lowering equipment or materials, including, but not limited to piles, sheet piles, casings for drilled shaft construction, spuds, pile templates, anchors, etc., below the water surface and into the stream bed; taking any precaution not to harm any manatee(s) that may have entered the construction area undetected. All such equipment or materials will be lowered at the lowest possible speed.
- f. The permittee agrees that any collision with a manatee shall be reported immediately to the U. S. Army Corps of Engineers (912-652-5347), the U. S. Fish and Wildlife Service, Ecological Services Field Office, (912-832-8739), and Georgia Department of Natural Resources (GADNR) (Weekdays 8:00 a.m. - 4:30 p.m.: 912-264-7218 or 1-800-272-8363; (nights and weekends: 1-800-241-4113). Any dead manatee(s) found in the project area must be secured to a stable object to prevent the carcass from being moved by the current before the authorities arrive. In the event of injury or mortality of a manatee, all aquatic activity in the project area must cease pending section 7 consultation under the Endangered Species Act with the US Fish and Wildlife Service and the lead Federal agency.
- g. The permittee agrees that the contractor shall keep a log detailing sightings, collisions, or injury to manatees, which have occurred during the contract period.
- h. The permittee agrees that following project completion, a report summarizing the above incidents and sightings will be submitted to the U. S. Fish and Wildlife Service, Ecological Services Field Office, Coastal Georgia Sub-Office, 4980 Wildlife Drive, NE Townsend, Georgia 31331.
- i. All temporary construction materials will be removed upon completion of the work, and salt marsh areas will be restored. No construction debris or trash will be discarded in the water.

ATTACHMENT H (page 5 of 5)

j. The permittee shall regularly maintain all hoses, faucets, and/or freshwater discharges to prevent freshwater leakage into manatee habitat. This minimizes attraction of manatees to the community dock where boats are concentrated and a potential for increased boat/manatee collisions exists. Oil and sewage spill contingency plans should be in place for the community dock to protect manatees.

k. The permittee shall identify a person, community dock operator, or Homeowners Association who will be the contact for reporting manatee sightings, boat strikes or other manatee concerns with the U. S. Fish and Wildlife Service and GADNR.

l. A notarized verification letter stating that all permanent signs have been installed at designated locations shall be forwarded to the U. S. Corps of Engineers, Savannah District Office as soon as they are installed. Signs remain the responsibility of the permittee and are to be maintained in a clearly visible condition for the life of the docking facility.

m. The permittee agrees to install and maintain a minimum of two 3-feet by 4-feet temporary manatee awareness construction signs labeled "Manatee habitat - Idle Speed in Construction Area" shall be installed and maintained at prominent locations within the construction area/docking facility prior to the initiation of construction. One temporary sign will be located prominently adjacent to the construction permit and, if required, a second temporary construction sign will be installed in a location prominently visible to water related construction crews. Also, a minimum of two "Caution - Manatee Area 1-800-2 SAVE ME" temporary construction signs should be placed facing upstream and downstream of the project site. GADNR (912-264-7218) can assist in correct sign design and placement. Temporary construction signs will be removed by the permittee upon completion of construction.

n. Install permanent manatee awareness signs on or adjacent to the dock facility prior to operation of the facility. The "Use Idle Speed - Protect Georgia's Manatees" signs shall be installed on either end of the face of the facility, or on pilings located immediately adjacent to the upstream and downstream end of the fender system, in locations clearly visible from the navigation channel. GADNR (912-264-7218) will assist in correct sign design and placement. Sign installation criteria area attached.

Re: USFWS File Number 2016-0181

Dear Mr. Sherrod:

The U.S. Fish and Wildlife Service has reviewed your correspondence requesting information regarding protected species related to possible effects of your proposed “Steele Bridge Landing Improvements” project. The Effingham County Board of Commissioners is proposing to provide paved parking and existing driveway point repairs, river bank slope stabilization and boat ramp extension and rehabilitation for the existing Steele Bridge Landing on the Ogeechee River in Effingham County, Georgia. This project would be funded via the Coastal Incentive Grant program funded by the National Oceanic and Atmospheric Administration (NOAA) and administered by the Coastal Resources Division of the Georgia Department of Natural Resources. Our comments are provided in accordance with provisions of the Endangered Species Act of 1973, as amended; (16 U.S.C. 1531 *et seq.*) to further the conservation of fish and wildlife resources and their habitat.

West Indian manatees (*Trichechus manatus*) are considered to occur within all tidal waters in coastal Georgia. The State of Georgia has taken the position that all coastal waters that are large enough to accommodate manatees are considered to be manatee habitat. Construction activities for this project should follow the Construction Conditions for Manatee Habitat (attachment 1).

Construction Manatee Conditions

- a. The permittee agrees that all personnel associated with the project will be advised that there are civil and criminal penalties for harming, harassing or killing manatees, which are protected under the Endangered Species Act of 1973 and the Marine Mammal Protection Act of 1972. The permittee and contractor will be held responsible for any manatee harmed, harassed or killed as a result of construction activities.
- b. Siltation barriers will be made of material in which manatees cannot become entangled, are properly secured, and are regularly monitored to avoid manatee entrapment. Barriers must not block manatee entry to or exit from essential habitat.
- c. All vessels associated with the project will operate at "no wake/idle" speeds at all times while in the construction area. All vessels will follow routes of deep water whenever possible.
- d. All on-site project personnel are responsible for observing water-related activities for the presence of manatees. All construction and activities in open water will cease upon sighting of manatees within fifty feet of the project area. Construction activities will not resume until the manatees have left the project area for at least thirty minutes.
- e. Extreme care will be taken in lowering equipment or materials, including, but not limited to piles, sheet piles, casings for drilled shaft construction, spuds, pile templates, anchors, etc., below the water surface and into the stream bed; taking any precaution not to harm any manatee(s) that may have entered the construction area undetected. All such equipment or materials will be lowered at the lowest possible speed.
- f. The permittee agrees that any collision with a manatee shall be reported immediately to the U. S. Army Corps of Engineers (912-652-5347), the U. S. Fish and Wildlife Service, Ecological Services Field Office, (912-832-8739), and Georgia Department of Natural Resources (GADNR) (Weekdays 8:00 a.m. - 4:30 p.m.: 912-264-7218 or 1-800-272-8363; (nights and weekends: 1-800-241-4113). Any dead manatee(s) found in the project area must be secured to a stable object to prevent the carcass from being moved by the current before the authorities arrive. In the event of injury or mortality of a manatee, all aquatic activity in the project area must cease pending section 7 consultation under the Endangered Species Act with the US Fish and Wildlife Service and the lead Federal agency.
- g. The permittee agrees that the contractor shall keep a log detailing sightings, collisions, or injury to manatees, which have occurred during the contract period.
- h. The permittee agrees that following project completion, a report summarizing the above incidents and sightings will be submitted to the U. S. Fish and Wildlife Service, Ecological Services Field Office, Coastal Georgia Sub-Office, 4980 Wildlife Drive, NE Townsend, Georgia 31331.
- i. All temporary construction materials will be removed upon completion of the work, and salt marsh areas will be restored. No construction debris or trash will be discarded in the water.

j. The permittee shall regularly maintain all hoses, faucets, and/or freshwater discharges to prevent freshwater leakage into manatee habitat. This minimizes attraction of manatees to the community dock where boats are concentrated and a potential for increased boat/manatee collisions exists. Oil and sewage spill contingency plans should be in place for the community dock to protect manatees.

k. The permittee shall identify a person, community dock operator, or Homeowners Association who will be the contact for reporting manatee sightings, boat strikes or other manatee concerns with the U. S. Fish and Wildlife Service and GADNR.

l. A notarized verification letter stating that all permanent signs have been installed at designated locations shall be forwarded to the U. S. Corps of Engineers, Savannah District Office as soon as they are installed. Signs remain the responsibility of the permittee and are to be maintained in a clearly visible condition for the life of the docking facility.

m. The permittee agrees to install and maintain a minimum of two 3-feet by 4-feet temporary manatee awareness construction signs labeled "Manatee habitat - Idle Speed in Construction Area" shall be installed and maintained at prominent locations within the construction area/docking facility prior to the initiation of construction. One temporary sign will be located prominently adjacent to the construction permit and, if required, a second temporary construction sign will be installed in a location prominently visible to water related construction crews. Also, a minimum of two "Caution - Manatee Area 1-800-2 SAVE ME" temporary construction signs should be placed facing upstream and downstream of the project site. GADNR (912-264-7218) can assist in correct sign design and placement. Temporary construction signs will be removed by the permittee upon completion of construction.

n. Install permanent manatee awareness signs on or adjacent to the dock facility prior to operation of the facility. The "Use Idle Speed - Protect Georgia's Manatees" signs shall be installed on either end of the face of the facility, or on pilings located immediately adjacent to the upstream and downstream end of the fender system, in locations clearly visible from the navigation channel. GADNR (912-264-7218) will assist in correct sign design and placement. Sign installation criteria area attached.
