The final date for posting of Addenda is per the Schedule, as may be amended.

STATEMENT OF WORK AND / OR SPECIFICATION:

The Cherokee County Roadway Capital Program Management Division is requesting proposals for the design of intersection improvements on Univeter Road at Pinecrest Road.

PROJECT LIMITS AND OVERVIEW

The intersection of Univeter Road at Pinecrest Road is located approximately 1.7 miles north of downtown Holly Springs. Univeter Road is a two-lane roadway that runs east-west between SR 140 and Marietta Highway. Pinecrest Road is a two-lane roadway that runs north-south between Holly Springs Parkway and Univeter Road and intersects Univeter Road from the south, forming a “T” intersection which is stop-sign controlled on the Pinecrest Road approach. Pinecrest Road intersects Univeter Road with a single lane from which vehicles can turn left or right.

Cherokee County contracted for a traffic signal warrant analysis to be performed at the intersection. The intersection does not meet the minimum volume warranting criteria for the installation of a traffic signal at this time. The intersection also does not present a pattern of crashes of the type that could be corrected by the installation of a traffic signal. Sight distances at the intersection exceed the AASHTO guidelines recommended for the posted speed limit on Univeter Road. More than 80% of vehicles that exit Pinecrest Road turn right, and are not taken into account for the evaluation of a traffic signal warrant.

However, due to the volume of vehicles exiting Pinecrest Road, a channelized right-turn lane would improve traffic operations at the intersection. The study shows a relatively low number of left-turning vehicles from Pinecrest Road onto Univeter Road. Additionally, the volume of left turning vehicles onto Pinecrest Road from Univeter Road, does meet GDOT and the TRB criteria for implementing a left-turn lane on Univeter Road. The crash history at this location also indicates that a left-turn lane would improve traffic safety.

The successful consultant will evaluate the findings of the study and make a recommendation as to the best solution and configuration for this intersection based upon existing roadway geometry, existing utility locations, existing and proposed right-of-way and total project cost.

A concept design and findings will be provided to the County for review and approval prior to proceeding with detailed construction plans.

The consultant will also be asked to evaluate all right-of-way needs and provide necessary right-off-way acquisition documents.

An aerial location map is attached for information.

SCOPE OF SERVICES

Design plans shall be in Georgia Department of Transportation format and follow the GDOT Plan Presentation Guide. The design shall be in accordance with latest MUTCD and Georgia Department of Transportation Standards and Specifications.

Erosion control plans shall be in accordance with latest NPDES and Georgia EPD requirements.

All survey will be done on state plane coordinates.

The proposal shall include staking of required right-of-way and easements. Preparation of right-of-way plans and documents shall also be included as part of this proposal.

Upon Cherokee County's acceptance of the completed plans, the consultant shall provide a CD with all electronic files and drawings.

This project is funded with County Roadway SPLOST funds.
