

- Notes:
1. City will locate the building corners after demolition is complete.
 2. Contractor will remove and dispose of concrete debris for existing concrete slab.
 3. Concrete will be removed for extending the sewer and water service from the current location.
 4. Contractor will remove and dispose of all concrete debris for existing concrete slab inside the perimeter of the building for footing locations.
 5. Contractor will find existing sewer and water and extend to new location.
