The term "Repair" refers to repairs/reconditioning/rebuilding of identified APS water system pumps, wells, motors, chlorinators and controls.

Replacement of non-repairable pumps, chlorinators and other equipment are allowable under the contract when replace vs. repair requirement has been met (see item 2.4).

Note that drilling of wells is not covered by this contract. Well drilling, when needed will be bid separately.

1.2 Pricing Guidelines:

1.2a Chlorinator Service: will be a flat rate for each complete servicing as described in Item 3.4.

1.2b Chlorine Granules: the chlorine product needed to maintain chlorine levels at EPA requirements. Please submit per pound price.

1.2c Repair Work — Labor Rates

Applicable quoted labor rates will be charged for on-site work and in shop repairs, for water wells/pumps, irrigation wells/pumps, submersible well pump and sump pumps.

When repairs necessitate removal for in-shop repair and installation, the proper combination of on-site rates and in-shop rates shall be charged. Contractor shall identify types of outside source repairs anticipated and submit quote to APS for review and approval. The outside source invoice showing actual cost must be submitted with contractor's billing.

1.2d Equipment Usage: Historically, the types of work under this contract may necessitate using the listed equipment including but not limited to pump rigs, air compressors, welding machines, swabbing and bailing machines. The price quotation page is definitive regarding size and whether or not equipment quotations include operators. If your company does not charge extra for any of the listed items, please so indicate. If your company will charge for additional equipment, please list items in the Specialized Equipment Form (page 35).

1.2e Replacement Equipment Pricing: Contractor shall be reimbursed at actual cost and submit a fixed fee as stated in page 34.

1.3 Prompt Response: Maintaining potable water supply is of prime importance. All service calls will require a maximum two (2) hour response time. Contractor must offer this capability 24 hour, 7 days a week in the event of an emergency. Pump replacements shall normal be completed within 12 hours.

Routine situations will require the contractor to commence work within 3 days of notification and to pursue the work diligently with an adequate crew until work is completed and accepted by APS. (Chlorinator servicing will be in accordance with established schedule-see item 3.4.)

1.4 Post Award Conference: After RFP award, the contractor shall meet with APS Director of Maintenance & Operations or his designee(s) to identify "authorized APS personnel" and clarify procedures.

2. MATERIALS

2.1 Manufacturer's Recommendations: All materials shall be handled in accordance with manufacturer's instructions. Any conflict between manufacturer's instructions and these specifications or code requirements shall be brought to the attention of APS designee before proceeding.

2.2 Existing, Possibly Related, APS Contracts: APS intent is to repair water supply systems in the most timely and most cost effective way possible.

This contract is not to purchase new motors. (The purchase of new motors will be accomplished through separate bid process). Under this contract, new motors will be allowable only when documented as the only feasible solution for the repair/reconditioning process.

2.4 Repair or Replace Decisions: Contractor may recommend to replace pumps, motors, chlorinators rather than repair if repair costs exceed 80% of replacement cost. All repair decisions that exceed 80% of replacement costs shall be approved with APS prior to proceeding.

3. EXECUTION

NOTE: Should site locations be incorrectly listed or sites be added/deleted during the life of the contract, contractor shall notify the APS Procurement Officer for change notations.

3.1 Safety Standard: All equipment shall be repaired to meet applicable safety codes and standards set forth in the latest edition(s) of pertinent state, county and municipal codes and ordinances.

3.2 Potable Water Wells: APS has 4 sites with potable water wells. Well depths vary with the maximum depth approximately 500 feet. Maintenance will include necessary work to maintain a constant source of safe drinking water. Work requests may include needs such as removing a pump, acidifying, redeveloping aquifer, test pumping, component testing and disinfecting.

Sites are:

Corrales Elementary School	Corrales, NM
Los Padillas Elementary	2525 Los Padilla Rd SW
Outdoor Education Site	Cedar Crest, NM
Polk Middle School	2220 Raymac Rd SW

3.3 Ground Water Monitoring Well construction & Abandonment Guidelines: Ground water quality monitoring wells should provide water samples which are technically and legally valid. The purpose of this policy is to provide minimum standards necessary to prevent monitor wells from becoming sources of invalid data and providing conduits for contaminate migration.

General Drilling Specifications:

1. Bore hold diameter should be 10 to 12 inches for 4 inch well casing.
2. No hydrocarbons should be present in the drilling mud.
3. All drill bits, drilling rods or any tools used in the drilling or completion of the well shall be steam cleaned prior to use.
4. After well completion, the well shall be developed so that formation water is free flowing into the perforated casing and it is non-turbid (i.e., all sediment has been removed from the casing).

Well Specifications:

1. Use PVC schedule, 40, 2 inch diameter pipe.
2. Use flush-threaded joints. No lubricants or solvent cements of any kind shall be used.
3. Use 20 foot section of 0.010 inch machine slotted screen. A slot size of 0.010 inch is generally

adequate for most soil types. Slotting may be done by manufacturer or supplier of pipe (no on site hacksaw type of slotting).

4. The top of the 20 foot section of screen shall be placed above the water table, thus allowing for seasonal fluctuations.
5. It is recommended that the screen section have centralizers constructed of suitable materials at top and bottom.
6. The annular space, from total depth to above well screen, shall be filter packed. Usually, 20-40 gradation range silica sand is adequate. Sand shall be emplaced by a "Tromie tube".
7. Annular sealant above filter pack will be of bentonite pellets 1/4 or 1/2 " in size. Pellets shall be emplaced by tremmie tube for deeper wells.
8. Any annular space above the sealant can be back filled with native sand and/or screened native soil.
9. The last foot of the annular space shall be filled with a 2% bentonite/cement slurry.
10. The surface pad shall be made of concrete 6 inches thick and extend away from the well and above the ground surface to adequately protect from surface drainage.
11. The PVC casing shall extend a minimum of 2 feet, but not more than 3 feet, above surface cap of concrete mentioned above. Locking steel well shroud shall be large enough in diameter to allow easy access for removal of plastic cap on PVC casing.
12. The ground surface and top of casing (with cap removed) are usually surveyed for elevations.
13. Abandonment: Monitoring wells no longer in use shall be plugged in such a manner as to preclude migration of surface runoff or ground water along the length of the well. Where possible, this shall be accomplished by removing the well casing and pumping expending cement from the bottom to the top of the well using tremmie pipe. Where properly sealed casing cannot be removed, the casing shall be cut off at the level of the concrete pad or impermeable surface and be filled with bentonite pellets from the bottom to the top.

3.4 Chlorinators: APS currently has chlorinators installed at all APS potable water well sites (see 3.2). The servicing of chlorinators are a vital component of this contract. Contractor shall service chlorinators on a regular **2 week** cycle to maintain level of chlorine, in accordance with City, State and County EPA regulations and shall make adjustment necessary to afford proper operation.

1. **Servicing:** Chlorination service at APS potable water well sites will be quoted as a flat rate for the 2 week cycle, 52 weeks per year. Service will include inspecting and adjusting chlorinators to ensure proper functioning and replenishing chlorine reservoirs.

Final negotiation of contract will require a detailed service schedule (including both the 2 week and the once per year requirements) submitted in writing to Procurement Buyer as noted on front cover of RFP.

2. **Product Supply:** Chlorine supply will be quoted as a separate item. APS will utilize HTH granular chlorine mixed with water in proportions recommended by manufacturer to meet EPA requirements.
3. **Repair:** Repairs of chlorinators will be at the quoted appropriate hourly rate plus applicable parts/materials/equipment.

3.5 Control Systems: Maintenance of radio control systems and hydro pneumatic control systems, at appropriate sites, are a part of this contract. (Exception: the sprinkler controls off irrigation systems are excluded from this contract.) Repair/replacement decisions are to be made as per item 2.6.

3.6 Irrigation Wells: Maintenance will include necessary work to keep irrigation wells in proper working condition. Work includes removing pump, acidifying, redeveloping aquifer and test pumping/component testing. Wells are primarily shallow wells 50+ feet depth. Irrigation well sites are as follows:

Pumps at listed site(s) shall be maintained in proper working condition. Serviceman shall check pump to identify the problem and proceed with on-site repair, if possible. If on-site repairs are not feasible, a replacement pump shall be provided by the contractor at no extra charge to APS while original pump repairs/replacement decisions are made. Furthermore, the state agency or local public body shall void an executed contract or cancel a solicitation or proposed award for a proposed contract if: 1) a Prospective Contractor, a family member of the prospective contractor, or a representative of the prospective contractor gives a campaign contribution or other thing of value to an applicable public official or the applicable public official's employees during the pendency of the procurement process or 2) a Prospective Contractor fails to submit a fully completed disclosure statement pursuant to the law.
