

**CITY OF CALLAWAY
POLE BARN PROJECT
BID NO.: CM2021-12**

ADDENDUM #1

Date Issued: September 8, 2021

This addendum is being released to provide for the following:

1. **Will all barns be on the same property? No, two different properties, Public Works and the transfer station where the water tower is located off Hwy. 22.**
2. **For Job #4, are there any details on Cantilever measurement? We will need some form of outline to send to the engineer. See Attached drawing. The Cantilever will be placed 11' from the Post and 8' from the fence.**
3. **Will AG PANEL (TUFF RIB) panels or PBR roof metal be acceptable? Or is standing seam a requirement. Either is fine, as long as they meet the 140 MPH requirements. The FUEL POLE BARN and the MAINTENANCE SHED have to be standing seam due to FEMA 406. The others do not.)**
4. **Clarification on the wind rating. Does the wind rating for buildings need to be within the 130-150 range per engineer and building location? Meaning 140MPH would be acceptable? 140 MPH is fine.**
5. **Should building 5 detail be 24Wx60Lx14H instead of 60Wx24Lx14H? Yes, 24' x 60' x 14' Pole Barn – Maintenance - Locator Map attached.**

Janice L. Peters, City Clerk
