

SPECIFICATIONS

ERFQ# 18-09

SCOPE OF SERVICES:

JCSS is seeking to update and redesign its website to enhance the user experience, simplify content management, and provide better information and customer service to its students, parents, teachers and community while meeting high standards for design quality and visual appeal. The overall goal is to create a web experience that will transform the way our system conducts business as well as inform our customers over the internet.

JCSS seeks the assistance of a company that can accomplish most, if not all, of the functionality identified within this eRFP but has the flexibility of providing this functionality over time, if needed due to budgetary constraints. Technology tends to evolve rapidly and JCSS would prefer a company that has the capacity of integrating new additional features that may be available in the future. JCSS will enter into a professional service agreement with a qualified vendor to design and replace existing website (www.jones.k12.ga.us). The vendor should have K12 school experience and focus in creating content management tools and database driven architecture while providing a user-friendly and intuitive site structure and interface that is both attractive, works on mobile devices and is ADA compliant.
