The City of Spartanburg is seeking to redesign its transit system to maximize the effectiveness of the system within our resource constraints. We seek to redesign routes to improve efficiency with emphasis on providing the highest level of service possible for the city's transit dependent population. We are open to alternative service delivery models and innovative solutions. Our priority is providing pathways to self-sufficiency and financial stability for our low income population and we recognize that inadequate transportation is a significant barrier for many.

We believe our current resources can be redeployed in a significantly more effective manner. We seek experienced and creative consultants to help us identify how.
