Mr. Tyler Mayes  
Director of Administration  
Anderson County Detention Facility  
308 Public Safety Lane  
Clinton, TN 37716

10 September 2021

Dear Mr. Mayes,

We the undersigned, hereby affirm that the Intercept Whole Body Contraband Detection Scanner is a product of Tek84, Inc.

The Intercept is patented and uniquely designed:

1. The Intercept is the only moving vertical beam scanning system.
2. The subject being scanned on the Intercept does not move on a platform or a treadmill.
3. The footprint of the Intercept is an ultra-compact 34" x 72".
4. The Intercept is the only transportable whole-body scanner, it is not permanently anchored to the floor.
5. The Intercept has a 4 second scanning time.
6. The final images from the Intercept have no magnification or distortion associated with them.
7. The Intercept is self-contained and scatter radiation does not exceed its footprint.
8. The Intercept has "Touchless Temperature Sensing Technology".

In addition, the Intercept has recently started shipping systems with the patent pending "Dual Virtual Wall Technology" that will ensure that the subjects being scanned are properly positioned prior to imaging, ensuring the highest resolution at the lowest possible exposure.

The Intercept routinely utilizes a low imaging dose of 0.25 uSv per scan that adheres to the ALARA (As Low As Reasonably Achievable) Concept outlined in the American National Standard (ANSI/HPS) Regulations N43.17-2009, which is strictly adhered to by the Tennessee Department of Health. This will allow subjects to be scanned 1,000 times in a twelve-month period.

The combination of these features of the Intercept qualifies it for Sole Sourcing your purchase.

Tek84, Inc. products are 100% developed, manufactured, and assembled in the USA.

There are no vendors/dealers/distributors that have been authorized to sell or service the Intercept Scanner in the state of TN.

Thank you.
