Reel mowers with rollers, rotary mowers or flair mowers shall be used on Bahia grass. Reel mowers shall be used on Bermuda grass. All mowing shall be done with finish mowers unless otherwise specified. All equipment shall be maintained in sound working condition in order not to exceed comfortable decibel levels or as determined by the Town at its sole discretion. Grass clippings or debris caused by mowing shall be removed from the adjacent walks, drives, gutters and curbs or surfaces on the same day as turf is mowed. Grass clippings or debris shall be removed in such a way as to not cause drift into roadways or adjacent properties. Mowing shall not be done when weather or conditions shall result in damaged turf. Use line trimming or brush cutting machines when not accessible to mowers. Grass level shall equal that of mower cutting height.

**TRIMMING:**

Grass shall be trimmed during, or as an immediate operation following, mowing. Trimming may be accomplished by hand or hand power shears or rotary nylon “fish line” cutting machines. Grass shall be trimmed at the same height as adjacent turfs mowed. Areas requiring trimming include buildings, fences, walls, poles, electrical boxes, trees, sprinklers, pavement edges, plant beds, etc. Line trimming machines shall not be used in areas accessible to mowers.

**EDGING:**

Edgers shall be in good repair, shall have no oil or gas leaks, and shall provide a clean straight edge not more than ½” away from walks and edge of pavement. Mechanical edging (vertical trimming) of all turf edges abutting sidewalks, flush paved surfaces, curb, drives, patios, decks, shall be completed during each mowing. Edging of all bed areas and tree wells shall be done in conjunction with each mowing. Edging shall be performed to result in neat vertical uniform lines and uniformed depths. No **Fish Line** cutting shall be allowed for edging. Steel blade edging is the only allowable machine approved by the Director of Public Works. Plant growth on paved surfaces, curbs, sidewalks, etc., shall be removed/sprayed monthly to kill vegetation in cracks, etc., to maintain a clean, neat appearance. Damage to property or existing vegetation caused by improper trimming or edging or vine removal shall be repaired or replaced within forty-eight (48) hours at the proposer’s expense. All walks and other paved areas shall be vacuumed, swept, or blown off while the mowing, edging, or trimming is in process so that the appearance suffers for the least amount of time. Landscaping lighting shall be wiped, blown off or vacuumed as needed to prevent accumulation of clippings and dead insects. Landscape areas shall be raked and cleaned of clippings, leaves, sticks, twigs and all litter each service.

Flowering shrubs shall be pruned in the proper season to allow full flowering potential for the following flower season. All plants shall be kept pruned away from all structures. The successful proposer shall prune all hedges and plant materials as specified.

### **Tree Pruning**

Frequency shall be once per month. Exceptions to this schedule include immediate removal of damaged, dead, or diseased limbs. **“Maintenance pruning” of trees shall consist of the removal of dead and/or broken branches, suckers, sprouts or foreign growths from grounds level up to 10 feet in height; and pruning to prevent encroachment of branches over street, into private property, obscuring view of signs or traffic, particularly at road intersections, or interference with lighting.** All tree pruning shall be accomplished with standard practices as follows: Use clean sharp cutting tools designed for pruning; do not use machetes for any pruning or trimming. Cut branches 1/4" away from the collar to promote healing, leaving no stubs. Remove from all trees as necessary any vines, debris, signs, or any other materials attached to the trunk.

All weeds that appear within sidewalk or curbing expansion joints are to be continually controlled through the use of herbicide. **Mirimichi Green PRO Weed Control is the approved herbicide that can be used to control weeds. Any equal herbicide shall have prior approval from the Director of Public Works, but Glyphosate is not authorized for use.** Apply only approved herbicides, as needed to control weeds in medians, sidewalks, decorative pavers, bull noses, curbs, catch basins, and gutter areas. Trees and palms within lawn area: No chemical edging is allowed around trees and palms within lawn areas. **Do not use string trimmers adjacent to trunks in order to avoid trunk damage.** Maintain all tree and shrub beds in a weed free condition by hand pulling at each maintenance visit. If staining does occur, the successful proposer shall be responsible for cleaning the affected hard surfaces within twenty-four hours of staining at no additional cost to the Town. A Town

representative must be on-site to witness all the fertilizing process; otherwise, this action by the successful proposer would be considered a breach of the contract and will not be accepted as a completed service. All applications shall follow labeled precautions and be performed by experienced employee(s) familiar with applications using best management practices as outlined in Florida Green Industries Best Management Practices Manual. All fertilizer formulations shall be safe to use in a mixed lawn and planting bed application.

shall be used. Additionally, price per cubic yard for each type of mulch includes all labor, material, and equipment in order to complete the full service per site. The successful proposer shall provide a quart size bag sample prior to installation and shall also provide an IPEMA certificate of compliance.
