

Opportunity in every direction.

Office of the Purchasing Director

Memo To: All Water Tank Maintenance Contract Vendors

From: Linda Jones, CPPB

Date: July 1, 2020

Subject: Addendum #1

Below are the questions that have been submitted and answers in this Addendum #1.

1. Should our proposal already include inflation within the 10 year period or will we be allowed to have a provision in our contract that gives a maximum increase % of inflation per annum? ***Your proposal should include total pricing for each year. We need firm figures for budget purposes.***
2. In "Items to Be Addressed in RFP", item F states and references Tank Renovation Specifications but have not been able to locate those in the RFP. Are these specifications available? ***Please take out this statement.. There are no specifications.***
3. Are any permits/licenses required by the City for the Contractor? ***No, but contractor must follow all Federal, State and Local Laws.***
4. Has any work been completed on the tanks since the inspection reports were generated such as interior or exterior renovations, washouts, or visuals? ***No***
5. Is there a list of last completed renovations for each of the tanks? This will really help with being able to put a maintenance schedule together since the inspection don't give us this information. ***Attached is the only information pertaining to what you are asking that we have.***
6. The State of Georgia doesn't require a Contractor's License for tank maintenance. The RFP states that this is required, but since the State of GA does not require a contractor's license for tank maintenance is this a requirement that can be discussed? ***Include with your RFP the code that states it does not require contractor's license.***

Opportunity in every direction.

- 7. As stated in Scope of Work Item #10, is that the “antenna and communications equipment management services must be included” What are the expectations from the City for this service? **To manage the contracts between carriers and the City. To make sure that antenna and equipment is installed correctly on our towers.** Does this include all communication equipment including Police, Fire, or any other emergency equipment? **This does not include police, fire or emergency equipment. They are not on water towers.** Also, would this include any local internet or other communications equipment that may be currently installed or are you just including current cellular installations? **At this time the City only has cellular installations on our towers, there may also be AMI data collectors owned by the City on some towers.** Also, is this service currently being provided by contractor or is there no current contract for this work with the City at this time? **This is currently provided by our contractor.**

Please respond to this email that you have received and acknowledge this addendum. Submit signed addendum #1 with your bid proposal.
