**Addendum #01
January 3, 2019**

Picnic Tables and Receptacles Quote

The purpose of this Addendum #01 to Picnic Tables and Receptacles Quote, dated January 2, 2019, is to answer the following questions:

1. In the specs for each item it describes the steel used as “11-gauge expanded steel with a diamond shape pattern.” Is it permissible to use a thicker grade of expanded metal – 9-gauge? There would be no difference in appearance and only a slight increase in the overall weight of each product. Is it permissible to quote the heavier 9-gauge steel?

Yes, it is permissible to quote the heavier 9-gauge steel, so long as it retains the diamond shape pattern.

2. In the trash can sections (2A/2B), it lists the height as 40”. Does that height include the lid or is that just for the body of the trash can itself?

The overall height of the trash can is to be forty (40) inches, including the lid.

3. In the trash can sections (2A/2B), there is no specification for the material of the dome lid. Is the preference for a plastic or steel dome lid?

The preference is for a steel dome lid.

Quotes are due no later than Wednesday, January 9, 2019 at 3:00PM via e-mail to asowers@cityofmyrtlebeach.com
