Questions Submitted

February 19, 2020

1. What does "Double Picket" mean to you? If it means Shadowbox then what is the spacing between the pickets?

Please see the image below for an example of what we need. The image is of fencing that is only 6' tall; however, we will need 8' tall.

2. Also, I recommend a metal frame for the 16' double gate, if it is 16' because "gravity works".
We are not opposed to metal framing for the gate if it will be more efficient.
