

West End Sewer Rehabilitation  
Project #1812 – Wetland Delineation  
ADDENDUM I

1. Is the entire “West End Project Area” to be delineated or just the areas where sewer lines are running? From a quick view of the project map, it appears that the current sewer line is running under streets and in the DOT ROW and rehabilitation would likely have no to very little impact on wetlands.

The wetland delineation study is within the current sewer line locations along the SCDOT ROW as shown on the map attached to the RFQ.
