## CERTIFICATION

Professional Service Industries, Inc. (PSI), an Intertek company, has completed a Phase I Environmental Site Assessment of the West Government Street Property located at 401 West Government Street in Pensacola, Florida ("the Subject Property"). PSI performed the Phase I ESA in general accordance with ASTM E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (the Practice). The assessment was completed at the request of Escambia County Engineering ("the Client") in accordance with the scope of work outlined in PSI's Proposal Number 0783-264352, which was authorized by the client on January 22, 2019.

The conclusions developed herein represent our professional judgment based on information and data available to us at the time of the assessment, and observations made at the time of our site reconnaissance. In accordance with ASTM E1527-13 § 4.6, the report is valid for a period of 180 days from the time of issuance.

### **Environmental Professional Certification**

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 312.10 of this part. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

## 1.0 EXECUTIVE SUMMARY

PSI, an Intertek company, performed a Phase I ESA of the West Government Street Property located at 401 West Government Street, in Pensacola, Florida, 32502. PSI performed the assessment to comply with the contract between Escambia County Engineering (the Client) and PSI.

Our assessment included a Phase I ESA and did not include evaluation of business environmental risks that are beyond the scope of ASTM E1527 (e.g., asbestos, mold, lead based paint, radon, wetlands, etc.).

### 1.1 FINDINGS

A summary of findings is provided below. The report should be read in its entirety to obtain a more complete understanding of the information provided and to aid in any decisions made or actions taken based on this information.

#### 1.1.1 SITE DESCRIPTION AND CURRENT USE

The subject property consists of a 18.54+/- acre land parcel (Escambia County Parcel ID No.: 0005009070010033). The property is currently grass covered vacant land and can be accessed from West Government Street to the north, South Devillers Street to the east, Clubbs Street to the west, and West Main Street to the south.

#### 1.1.2 ADJOINING PROPERTY DESCRIPTION AND USE

The subject property is located within a commercial corridor along South Palafox Street. No uses of concern were identified on the adjoining properties. Use of the immediately surrounding properties is summarized in the table below.

Direction	Description of Adjoining Property Use
North	ECUA Regional Lift Station, Community Park, Complete Building Consultants
East	Pensacola Party People, Residential
South	Pensacola Maritime Park, Wetland Mitigation Project, Nick's Boathouse, Baskerville-Donovan Office, Transmontaigne Partners/Unocle Bulk Storage Terminal - Pensacola Terminal
West	Residential, Mike D's Culinary Productions, Elite Fitness

#### 1.1.3 HISTORICAL USE OF SITE AND SURROUNDING AREA

The subject property appeared to be developed for residential and commercial (Former Tin Shop) use prior to the 1920s until the early mid-1950s. At the time, the southeast corner of the subject property appeared to

be developed for use as the Main Street Waste Water Treatment Plant, while the northwest portion appeared to be undeveloped land, and the remainder of the subject property was developed for residential use and commercial use, including Grace John Sheet Metal Works (1962) on the northeast portion of the subject property. Around the early 1970s, the waste water treatment plant appeared to have expanded to the west. The northeast portion of the property appeared to be developed for commercial use, including Ray's Cleaner's & Laundry. From the early 1980s until around 2010, the entire subject property was developed for use as Main Street Waste Water Treatment Plant. Around the early 2010s until present, the subject property was undeveloped, cleared land.

Prior to the 1920s through the mid-1960s, the eastern and western portions of the north adjoining properties appeared to be developed for residential use, while the majority of the central portion of the properties appeared to be undeveloped. Around the late 1960s, the eastern and western portion of the properties were developed for residential and commercial use, including The Tropical Bar Tavern (1966-1971), James Corrine Recreation Center (1971-1986), and Gulf Coast Line Electric Service (1971-1981). Around the mid 1980s through around 2010, the majority of the eastern and central portion of the properties appeared to be cleared, vacant land with scattered residential and commercial use, including Reefers Aquatics (2005-2014) and Commercial Hood Cleaning Services (2010-2014), and the western portion remained developed for residential use. In the early 2010s, the eastern portion of the properties appeared to be developed for use as Emerald Coast Utilities Authority Lift Station. The western portion of the north adjoining properties appeared to remain developed for residential use, while the central portion appeared to be developed as a community park and stormwater retention pond.

The east adjoining properties appeared to be developed for residential use prior to the 1920s through the early 1960s. At that time through the time of site reconnaissance, the northern portion of the properties appeared to be developed for commercial use, including Weidlich Auto & Home Supply Tires (1971-1976), Architects & Engineers Supply House (1976-2000), Pensacola Parade People (2017-2019).

Prior to the early 1920s to the early 1990s, the south adjoining properties appear to have been developed for residential and commercial use, including Transmontaigne Partners/Unocle Bulk Storage Terminal - Pensacola Terminal (1918 - 2019), Pensacola Main Street Area/Inland River Transportation, and Chevron Facility #1289733/L&L Marine. Around the early 1990s, the eastern and central portions of the south adjoining properties appeared to have been undeveloped, lightly wooded land. In the mid 2000s, the eastern and central portions appeared to be mostly undeveloped land with one parcel developed for commercial use as Baskerville-Donovan Office (2005-2019). Around the early 2010s, the eastern portion of the properties appeared to be developed for commercial use, including Nick's Boathouse Restaurant and Pensacola Maritime Park.

The west adjoining properties were developed for residential use prior to the 1920s until the mid 1970s. Around that time through the time of site reconnaissance, the west adjoining properties appeared to be developed for residential and commercial use, including Anderson's Grocery (1976-1981) and Mike D's Culinary Productions (2010-2014). The ECUA lift station appears to have been constructed on the central portion of the west adjoining property in 2002.

#### **1.1.4 GOVERNMENTAL RECORDS REVIEW**

PSI subcontracted with EDR to provide a review of governmental database records for spill sites, tanks, hazardous waste handlers, and other facilities of potential concern within proximity to the subject property.

#### **1.1.5 SIGNIFICANT DATA GAPS**

The ASTM E1527 Standard Practice defines a significant data gap as a lack of or inability to obtain information required by the practice that would limit our ability to draw conclusions with regard to RECs in connection with the subject property. Based on our experience, the information that we gathered and evaluated did not present significant data gaps that affected our ability to identify RECs in connection with the subject property.

### **1.2 CONCLUSIONS**

PSI performed a Phase I ESA of the subject property in general accordance with the scope and limitations of ASTM Practice E 1527-13. Any exceptions to or deletions from this practice are described in Section 2.3 of this report. The following conclusions have been made with regard to evidence of RECs, HRECs, CRECs, VECs, and *de minimis* conditions on the subject property, as defined in ASTM E 1527-13.

#### **1.2.1 RECOGNIZED ENVIRONMENTAL CONDITIONS**

This assessment has revealed the following evidence of REC(s) in connection with the subject property:

##### **ON-SITE CONDITIONS**

###### **Former Tin Shop**

A former tin shop appears to have operated on the northeast corner of the subject property in the early 1950s. Tinning often involves tracing patterns onto sheets of tinplate (iron coated with an outer layer of tin) and cut with shears. The tinplate would have been bent, curved, and folded using hammers, mallets, and small anvil into the desired form. Steel punches and hammers were often used to pierce sheets of tinplate. Thick lead sheets were typically placed below the tinplate sheets to support the sheet and protect the work bench. Wastes generated by a tin shop would have included but not been limited to various lead, tin, and iron scraps generated during tinning activities. The facility appears to have been in operation prior to the implementation of regulatory oversight for the storage and disposal of hazardous materials used and generated by tinning operations. Documentation of good housekeeping and best management practices for the facility were not available for review. Based on the years of operation for the facility and an absence of documentation concerning good housekeeping and best management practices, the former tin shop is considered to be evidence of a REC in connection with the subject property at this time.

###### **Grace John Sheet Metal Works**

This facility appeared to have operated on the northeast corner of the subject property in the early 1960s. A

sheet metal fabrication facility typically involved machinery to bend and shape sheet metal into the desired form. This machinery and equipment potentially contained chemicals that were potentially hazardous materials and require special management when disposed of. The facility appears to have been in operation prior to the implementation of regulatory oversight for the storage and disposal of hazardous materials used and generated by machine shops. Documentation of good housekeeping and best management practices for the facility were not available for review. Based on the years of operation for the facility and an absence of documentation concerning good housekeeping and best management practices, the former Grace John Sheet Metal Works is considered to be evidence of a REC in connection with the subject property at this time.

### **Ray's Cleaners & Laundry**

This facility was identified on the EDR Hist Cleaner database. It appears this facility operated on the northeast portion of the subject property in the early to mid 1970s. Dry cleaning facilities typically generate hazardous waste including but not limited to, spent solvents. The facility appears to have been in operation prior to the implementation of regulatory oversight for the storage and disposal of hazardous materials and dry cleaning facilities. Data concerning the use and storage of solvents at the facility and documentation of good housekeeping and best management practices were not available for review. Based on the lack of information, the former Ray's Cleaners & Laundry is considered to be evidence of a REC in connection with the subject property at this time.

## **1.2.2 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS**

This assessment has revealed no evidence of CRECs in connection with the subject property.

## **1.2.3 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS**

The ASTM Standard Practice defines an HREC as a past release of hazardous substances or petroleum products that has impacted the property, but the release has been addressed to the satisfaction of a regulatory agency or meets unrestricted use criteria established by the regulatory agency without the need for institutional or engineering controls. PSI has identified the following HREC(s) in association with the subject property:

- **Main Street Wastewater Treatment Plant/Emerald Coast Utilities Authority - 401 West Government Street, Pensacola, FL (Subject Property)**

This facility was identified by EDR on the HMIRS, ERNS, ICIS, FL AST, PA MANIFEST, FL SPILLS, FL TIER 2, FL Financial Assurance, FL NPDES, ERNS, RCRA-CESQG, ICIS, FINDS, ECHO, and RMP databases. It appears the facility operated as a Wastewater Treatment Plant from the late 1930's through 2006, receiving many upgrades and expansions throughout that time, with a maximum capacity of 20 million gallons. The facility maintained an approximately 63,500-gallon AST located on the west central portion of the property and was surrounded by a concrete secondary containment area. The tank was used to store methanol, which is added into the treatment system to increase the chemical and biological oxygen demand, as well as to reduce nitrite and nitrates. The methanol was delivered from the AST to the treatment area of the plant via a 1-inch diameter transfer line.

According to a Contamination Assessment Report written by Gallet & Associates dated September 200, ECUA reported a leak in the methanol transfer line in January 2003. The leak was reportedly located between the secondary lift station and the OASES treatment area, which was discovered when methanol seeped into the dry well of the lift station. Based on historic methanol use records, ECUA determined that the line may have released up to 30,000 gallons of methanol.

In April 2003, three groundwater monitoring wells were installed downgradient of the methanol release. Soil samples were collected concurrently with the installation of the monitoring wells. The groundwater samples and soil samples were analyzed for methanol and related alcohols and VOCs. The laboratory analyses revealed methanol concentrations above the SCTL Leachability based on Ground Water Criteria observed in soil samples collected at and below the water table near suspected source area. Soil samples collected below the water table at the other well locations further from the source area revealed methanol concentration below the SCTL Leachability criteria. The groundwater samples collected from the two monitoring wells furthest away from the source area revealed no detected contaminants of concern. However, the monitoring well closest to the source area (MW-1) contained 3,400 mg/L of methanol, which is above the GCTL and the Natural Attenuation Default Source. MW-1 was resampled in July 2003, and the analytical results showed that the methanol concentrations had decreased to 1,000 mg/L. In August 2003, two additional monitoring wells were installed. MW-4 was placed in the suspected source area, while MW-5 was installed downgradient of the source area. All five wells were sampled in August 2003 and analyzed for methanol and related alcohols. The downgradient wells contained no detectable contaminants, while the two wells closest to the source area revealed methanol concentrations of 910 mg/L and 1,800 mg/L. Based on these findings, Gallet recommended a Monitoring Only Plan be implemented on a quarterly basis. An addendum to the CAR dated January 2004 stated that the FDEP requested the installation and monitoring of a deep monitoring well downgradient from the source area. Based on persistent methanol concentrations at the near-source area well, Gallet conducted supplemental groundwater sampling in July 2007 upgradient of the source area, using DPT groundwater sampling technique, in order to better define the impacted area. An additional monitoring well was installed to the west-northwest of the source area. This well was designed for groundwater monitoring and groundwater recovery. After the well was sampled, it was pumped for 30-days as part of an interim groundwater source removal effort to reduce the highest methanol concentrations. Based upon FDEP recommendations, an additional ten soil samples were collected from around the area of the methanol tank, screened, and analyzed for methanol. The OVA screening results for the surface soil samples revealed concentrations of less than 10 ppm at each location. However, the OVA readings from below the water table exceeded 2,000 ppm at all locations. Gallet stated that these high readings could be the result of interference by methane/ethane and other naturally occurring organics. The analytical laboratory results show low levels of methanol concentrations (0.74 mg/L to 1.2 mg/L) in three of the soil samples collected from water table depth. These concentrations were below the SCTLs. The other seven samples contained no detectable methanol concentrations.

According to a Soil Quality Assessment Report by Gallet & Associates dated December 2008, a release of approximately 750 gallons of alum (hydrated aluminum sulfate) occurred in December 2007. The release occurred at the piping connected to the "sight glass" adjacent to the southwest side of the alum storage tank. Following the release, ECUA personnel mixed powdered lime with the

impacted soils in order to neutralize the pH. Gallet conducted additional groundwater sampling and analysis on-site in conjunction with the quarterly methanol monitoring program. One downgradient monitoring well and one upgradient well were sampled on a quarterly basis and analyzed for aluminum and sulfate. The groundwater analytical results revealed no significantly elevated concentrations of aluminum or sulfate measured in groundwater downgradient from the alum release area. Five shallow soil samples were collected from within the alum soil area. Additionally, soil samples were collected 80 feet north of the spill area, in an assumed affected background area. The laboratory analysis revealed all of the total aluminum concentrations were significantly lower (1,100 mg/kg to 6,500 mg/kg) than the SCTL - Residential Direct Exposure Scenario (80,000 mg/kg). The sulfate concentrations from within the spill area ranged from less than 61 mg/kg to 2,400 mg/kg. However, there are no published SCTL criteria for sulfate. Based on this data, Gallet recommended no further assessment or monitoring of the alum spill area. However, a Discharge Notification Report from ECUA from January 2009 stated that on January 16, 2009, approximately 2,100 gallons of alum was released from a break in the fill line. ECUA personnel excavated approximately one foot of soil from the spill area and placed it in a trailer covered with a tarp for disposal. After the excavation, lime was placed on the spill area and backfilled with some soil from a nearby stockpile. A Site Assessment Report Addendum by Gallet & Associates dated October 2009 states that shallow soil samples were collected from nine locations within the most recent alum spill area and from a location approximately 500 feet north of the spill area, in an assumed unaffected, background area. The samples were submitted to a certified laboratory for analysis of Total Aluminum, Total Sulfate, and pH. The soil samples from the background locations and two of the soil samples from the spill area contained SPLP aluminum concentrations in excess of the Florida Secondary Drinking Water Standard of 0.2 mg/L. Similar to the previous alum spill, Gallet also conducted additional groundwater sampling and analysis on-site in conjunction with the ongoing quarterly groundwater methanol monitoring program. One downgradient well and one upgradient well were sampled quarterly for one year starting in March 2009. The soil sample analytical results determined that all of the total aluminum concentrations were significantly below the SCTL - Residential Direct Exposure Scenario of 80,000 mg/kg. Additionally, total aluminum and sulfate concentrations were below the detection limit at the downgradient monitoring well. Per an FDEP memo dated January 2010, quarterly monitoring for aluminum and sulfate were discontinued.

A November 2012 Groundwater Monitoring Report and NFA Request written by Terracon states that 11 on-site monitoring wells were abandoned in July 2011 in preparation for the demolition of the former Waste Water Treatment Plant. To aid in the removal of structures/foundations down to an elevation of 3 feet above mean sea level, a large amount of dewatering was performed, and the water was transferred to the Government Street lift station, and treated at the Central Water Reclamation Facility. Following the facility demolition, four replacement wells were installed and sampled for two consecutive quarters. Both quarterly sampling events exhibited methanol concentrations below detectable levels for all samples. Based on this data, Terracon recommended No Further Action without Controls for the site. A Site Rehabilitation Completion Order from FDEP dated February 2013, states that the recommendation of No Further Action without Controls was approved.

Based on this data and the facility's current regulatory status, Main Street Wastewater Treatment

Plant/Emerald Coast Utilities Authority appears to represent a HREC, and not a current REC, in connection with the subject property at this time.

#### **1.2.4 VAPOR ENCROACHMENT CONDITIONS**

The ASTM E1527 Standard Practice requires that the environmental professional evaluate the potential for VECs on the subject property. A VEC is defined in ASTM E2600 as the presence or likely presence of volatile chemicals in the subsurface that are caused by the release of vapors from contaminated soil or groundwater either on or near the subject property. PSI identified the following evidence of a VEC(s) on the subject property:

##### **Ray's Cleaners & Laundry**

This facility was identified on the EDR Hist Cleaner database. It appears this facility operated on the northeast portion of the subject property in the early to mid 1970s. Dry cleaning facilities typically generate hazardous waste including but not limited to, spent solvents. The facility appears to have been in operation prior to the implementation of regulatory oversight for the storage and disposal of hazardous materials and dry cleaning facilities. Data concerning the use and storage of solvents at the facility and documentation of good housekeeping and best management practices were not available for review. Based on the lack of information, the former Ray's Cleaners & Laundry is considered to be evidence of a REC and a VEC in connection with the subject property at this time.

#### **1.2.5 DE MINIMIS CONDITIONS**

PSI did not identify evidence of *de minimis* conditions on the subject property.

### **1.3 RECOMMENDATIONS**

- Completion of a Phase II ESA to investigate potential soil and/or groundwater contamination, or vapor encroachment that may be present due to the REC(s) identified in this report.

## **2.0 PHASE I ESA SCOPE AND METHODOLOGY**

### **2.1 PURPOSE OF SERVICES**

PSI performed the Phase I ESA in conformance with ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (the Practice). The purpose of the Practice was to define good commercial practice for conducting a Phase I ESA and as such, the Practice is intended to permit the user to satisfy one of the requirements to qualify for the LLPs. The goal of the processes established by the Practice is to identify RECs in connection with the property.

### **2.2 PHASE I ESA METHODOLOGY**

PSI performed a Phase I ESA of the subject property. The scope of our services and general methodology is presented below.

The information sources that PSI used, including published material, material obtained from commercial and other sources, is listed below and cited as it is presented in the report. The information or excerpts thereof is appended.

This assessment included four components:

- Records review;
- Reconnaissance;
- Interviews; and,
- Preparation of this report, including our evaluation.

### **2.3 LIMITATIONS, EXCEPTIONS, DEVIATIONS AND DATA GAP**

PSI considers that limitations, exceptions, and deviations from the Practice manifest as a lack of or inability to obtain information required by the Practice. This represents the definition of the 'data gap' contained in the Practice. PSI listed the component objectives of the Practice on the appended Data Gap Worksheet and tracked the information obtained against the objectives. Therefore the limitations, exceptions and deviations are identified in the Worksheet.

In general, when required information was incomplete, not provided, otherwise not obtained, or indicated a need for additional information, PSI attempted to use information from other sources to meet the Practices' performance objectives. When the data gaps affected the Environmental Professional's ability to identify RECs, PSI considered the data gap(s) to be significant. PSI identified significant data gaps (if any) on the Data Gap Worksheet and reported them in Section 1.1.5.

## 2.4 SIGNIFICANT ASSUMPTIONS

PSI made the following assumptions in developing our Phase I ESA findings and conclusions:

- Regulatory Agency Information - PSI considers all information provided by our environmental database subcontractor regarding regulatory status of facilities to be complete, accurate, and current.
- Other Regulatory Information - PSI considers all information obtained from regulatory or enforcement agencies to be complete, accurate, and current.
- Title, Lien and AUL Information - PSI considers all information provided by real estate title record review firms regarding property use or ownership, encumbrances or other limitations, if provided, to be complete, accurate and current.
- Interviews - PSI considers all information provided through interviews to be complete, unbiased and provided in good faith.
- Groundwater - PSI interpreted and inferred the direction of the shallow groundwater movement based on the information we obtained and our experience. Actual groundwater flow may be locally influenced by many factors beyond the scope of this assessment. Subsurface investigation would be necessary to determine site-specific groundwater flow direction.

### 3.0 USER-PROVIDED INFORMATION

PSI considers the client to be the 'User' of our assessment, defined in ASTM Practice E 1527 as "the party seeking to use ASTM E 1527 to complete an environmental site assessment of the property. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. The User has specific obligations for completing a successful application of this practice...."

#### 3.1 USER QUESTIONNAIRE

The EPA All Appropriate Inquiry Rule (40 CFR Part 312) and ASTM E1527 Section 6 require the User to answer certain questions related to the property, in order to obtain certain LLPs from CERCLA liability. To facilitate this process, PSI provided the client with a User Questionnaire, which is provided in the Appendix if it has been returned. A summary of the required questions and client responses is provided below:

Question	Yes	No	Unknown	N/A	Client did not respond
Did a review of recorded land title records or other sources identify any environmental liens filed or recorded against the subject property under federal, tribal, state or local law?			✓		
Did a review of land title records or other sources identify any activity use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place on the subject property?			✓		
Do you have specialized knowledge or experience related to the subject property or nearby properties?		✓			
Does the purchase price being paid for the property reasonably reflect the fair market value of the property?				✓	
If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?				✓	

Question	Yes	No	Unknown	N/A	Client did not respond
Are you aware of commonly known or reasonable ascertainable information about the property that would help the environmental professional to identify conditions indicative of a releases or threatened releases?		✓			
Do you know of the past uses of the property?	✓				
Do you know of specific chemicals that are present or were once present at the property?		✓			
Do you know of spills or other chemical releases that have taken place at the property?		✓			
Do you know of any environmental cleanups that have taken place at the property?		✓			
Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the subject property?		✓			
Do you know of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?		✓			
Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?		✓			

### 3.2 TITLE RECORDS

The Client did not provide title records to PSI, but indicated in the User Questionnaire that they were not aware of environmental liens or AULs recorded in connection with the subject property. We presume that the client will conduct a title review to search for liens/AULs outside the scope of this assessment.

Based on a review of the local tax assessor's records, the subject property is currently owned by Old Stinky, LLC. The property was transferred from ECUA to the current owner in 2015.

### **3.3 SUGGESTED INFORMATION**

The client provided PSI with the following suggested information described by the Practice.

- The reason for performing the Phase I ESA.
- The type of property and type of property transaction.
- The complete and correct address of the property.
- The scope of services desired for the Phase I ESA, including any evaluation for business environmental risk that is beyond the scope of ASTM E1527.
- Identification of all parties who will rely upon the report.
- Identification of the key site contact and contact information.

### **3.4 HELPFUL DOCUMENTS**

The Practice requires that the environmental professional ask the property owner, the key site manager (if any is identified), and the User for certain helpful documents about the property and certain legal proceedings involving hazardous substances and the subject property. PSI mailed or e-mailed questions or performed interviews requesting this information. The responses documenting the persons we corresponded with, and relevant information obtained, are appended where practical.

The Client did not provide prior environmental reports or other helpful documents within the performance period of this assessment.

## 4.0 PHYSICAL SETTING

PSI reviewed a USGS topographic (topo) map, information from the USDA and/or Natural Resources Conservation Service (NRCS) and/or other information regarding the physical setting of the subject property to assist with the interpretation of subsurface water movement near the subject property. Physical setting information is summarized in the table below.

### Summary of Physical Setting Information

Physical Setting Attributes	Description	Source
Subject property elevation:	Approximately 10-feet AMSL	USGS Topo Maps "Pensacola, FLA" EDR GeoCheck® Information
Topographic gradient:	The subject property and surrounding area slopes gently to the south.	USGS Topo Maps "Pensacola, FLA" EDR GeoCheck® Information
Closest surface water:	Pensacola Bay is located approximately 691 feet south of the subject property.	USGS Topo Maps "Pensacola, FLA" EDR GeoCheck® Information and Google Earth
Other resource or physical characteristics mapped on the subject property?	No	USGS Topo Maps "Pensacola, FLA" EDR GeoCheck® Information
Is a flood plain mapped on the subject property?	No	EDR Radius Map Report
Predominant soil type(s) mapped on the subject property:	The Arents-Urban Land Complex - Arents soils are defined as somewhat poorly drained soils with slow infiltration rates and a high capacity to transmit water. Urban Land soils have typically been reworked, constructed on or otherwise disturbed so that the parent materials cannot be identified and the characteristics of the soils have been altered from the native conditions.	USDA NRCS Web Soil Survey

<b>Physical Setting Attributes</b>	<b>Description</b>	<b>Source</b>
Geology/Hydrogeology:	The Pleistocene/Citronelle Formation is characterized by fine to coarse sand, silty sand, and clayey sand deposits. Potable water is obtained from the Sand and Gravel Aquifer, which consists primarily of quartz sand deposits. Escambia County is drained by two river systems, the Escambia and Perdido.	Soil Survey of Escambia County dated 2004
Estimated depth to first groundwater:	The estimated depth to first groundwater is 3 to 6 feet below land surface.	USGS Topo Maps "Pensacola, FLA" EDR GeoCheck® Information
Anticipated regional groundwater flow direction:	The general direction of groundwater flow is to the south-southeast.	Fall 2009 Quarterly Ground Water Monitoring Report prepared by Gallet

## 5.0 SITE RECONNAISSANCE

The location and approximate boundaries of the subject property are illustrated on the appended figures. The legal description of the subject property, if provided to PSI, is appended.

Ms. Kara Johnson, Escambia County, granted PSI access to the subject property. Our assessor was unescorted during the site reconnaissance.

The ground reconnaissance consisted of observing the periphery of the subject property and viewing the subject property from accessible adjoining public access areas. Visual reconnaissance of adjoining properties was limited to areas and facilities that were readily observable from the subject property or from public access areas. PSI also systematically toured the interior portions of the subject property parcels to provide an overlapping field of view.

The peripheries of surface features and/or structures, where present on the subject property, were observed along with accessible interior common areas. PSI photo-documented selected features. The photo log is included in the Appendix.

### 5.1 SUBJECT PROPERTY DESCRIPTION AND CURRENT USES

General Site Information	
<b>Subject Property Address</b>	401 West Government Street, Pensacola, Florida 32502
<b>Parcel Size (acres)</b>	18.54+/- +/-
<b>Site Contact/Escort</b>	Ms. Kara Johnson / N/A
<b>Date of Reconnaissance</b>	February 8, 2019
Building Information	
<b>Building Description</b>	N/A
<b>Size (square feet)</b>	N/A
<b>Number of Stories</b>	N/A
<b>Approx. Construction Date</b>	N/A
Utilities	
<b>Water</b>	Emerald Coast Utilities Authority
<b>Wastewater/Sewer</b>	Emerald Coast Utilities Authority
<b>Electricity</b>	Gulf Power
<b>Natural Gas</b>	N/A

<b>Heating Source</b>	N/A
-----------------------	-----

The subject property consists of a 18.54+/- acre land parcel (Escambia County Parcel ID No.: 000S009070010033). The property is currently grass covered vacant land and can be accessed from West Government Street to the north, South Devillers Street to the east, Clubbs Street to the west, and West Main Street to the south.

## 5.2 SUBJECT PROPERTY OBSERVATIONS

A summary of the subject property uses and conditions is tabulated below. Detailed information is discussed following the summary for any "yes" answers, along with an opinion about the significance of the listing.

<b>Identified? (check if Yes)</b>	<b>Item Description</b>
<b>Equipment/Activities/Uses</b>	
	Emergency Generators
	Elevators
	Hydraulic Lifts
	Dry Cleaners/Laundromats
	Photo Processing
	Medical/Dental Offices - Biomedical Wastes
	Automotive/Equipment Repair
	Grease Traps and Oil/Water Separators
	Wastewater Treatment Systems
	Septic or Sewage Tanks
	Air Compressors
✓	Transformers or Other Mech./Elec. Equipment That Could Contain PCBs
	Pipeline Markers
	Oil and Gas Wells
	Stormwater Ponds
	Quarries, Pits, Lakes, or Lagoons
	Use, Storage, or Disposal of Hazardous Substances

Identified? (check if Yes)	Item Description
	Use, Storage, or Disposal of Petroleum Products
	ASTs/USTs
	Drums or Other Bulk Chemical Containers
	Suspect Containers/Unidentified Contents
✓	Drains and Sumps
	Drinking Water, Irrigation or Monitoring Wells
	Agrochemical Use/Application
	Railroad Spur/Tracks
<b>Potential Evidence of Releases</b>	
	Interior/Pavement Stains or Corrosion
	Stained Soil/Stressed Vegetation
	Chemical Odors
	Surface Water Sheen or Discoloration
	Exterior Pipe Discharges/Unknown Pipes/Effluent Discharges
	Pools of Liquid or Standing Water
	Solid Waste Dumping/Landfilling/Suspect Fill Material
	Construction Debris/Material Stockpiles
	Other Uses or Conditions of Concern

**TRANSFORMERS OR OTHER ELECTRICAL OR MECHANICAL EQUIPMENT THAT COULD CONTAIN PCBs**

One pad-mounted electrical transformer was observed on the southern portion of the subject property. PSI did not observe non-PCB labeling on the transformer at the time of the site reconnaissance. PSI believes the electrical equipment is the property and responsibility of Gulf Power, the local electrical utility company, who would be responsible for cleanup related to the equipment that could not be attributed to tenant negligence. The identified electrical equipment appeared to be in good condition, with no apparent evidence of staining, leakage, or corrosion noted. Based on the observed condition and the local utility ownership, the observed transformer is not considered to be evidence of a REC in connection with the subject property.

## DRAINS OR SUMPS

PSI observed a storm drain on the south central portion of the subject property. PSI did not observe evidence of unusual staining or improper disposal in connection with the observed storm drains, and the storm drains appeared to be in a generally good condition. The drain appear to flow into Washerwoman Creek which ultimately drains into Pensacola Bay. Based on this information, the observed storm drain is not considered to be evidence of a REC in connection with the subject property.

### 5.3 OFF-SITE OBSERVATIONS

A summary of the adjoining property uses and conditions is tabulated below. Detailed information is discussed following the summary for any “yes” answers, along with an opinion about the significance of the listing.

Identified? (check if Yes)	Item Description
<b>Equipment/Activities/Uses</b>	
✓	Emergency Generators
	Elevators
	Hydraulic Lifts
	Dry Cleaners/Laundromats
	Photo Processing
	Medical/Dental Offices - Biomedical Wastes
	Automotive/Equipment Repair
	Grease Traps and Oil/Water Separators
	Wastewater Treatment Systems
	Septic or Sewage Tanks
	Air Compressors
✓	Transformers or Other Mech/Elec. Equipment That Could Contain PCBs
	Pipeline Markers
	Oil and Gas Wells
✓	Stormwater Ponds
	Quarries, Pits, Lakes, or Lagoons

Identified? (check if Yes)	Item Description
	Use, Storage, or Disposal of Hazardous Substances
	Use, Storage, or Disposal of Petroleum Products
✓	ASTs/USTs
	Drums or Other Bulk Chemical Containers
	Suspect Containers/Unidentified Contents
	Drains or Sumps
	Drinking Water, Irrigation or Monitoring Wells
	Agrochemical Use/Application
	Railroad Spur/Tracks
<b>Potential Evidence of Releases</b>	
	Interior/Pavement Stains or Corrosion
	Stained Soil/Stressed Vegetation
	Chemical Odors
	Surface Water Sheen or Discoloration
	Exterior Pipe Discharges/Unknown Pipes/Effluent Discharges
	Pools of Liquid or Standing Water
	Solid Waste Dumping/Landfilling/Suspect Fill Material
	Construction Debris/Material Stockpiles
	Other Uses or Conditions of Concern

## EMERGENCY GENERATORS

PSI observed an emergency generator located at the ECUA Lift Station on the west adjoining property. This emergency generator appeared to be diesel-fueled and an integral tank of unknown size and associated piping under the generator equipment, but above the ground. Typically, tanks associated with emergency generators are equipped with integral secondary containment systems. PSI did not observe evidence of leaking or staining around the base of the generator at the time of the site reconnaissance. Based on this information, the presence of the emergency generator is not considered to be evidence of a REC in connection with the subject property.

## **TRANSFORMERS OR OTHER MECH./ELEC. EQUIPMENT THAT COULD CONTAIN PCBs**

Three pole-mounted electrical transformers were observed on the north adjoining property. PSI did not observe non-PCB labeling on the transformers at the time of the site reconnaissance. PSI believes the electrical equipment is the property and responsibility of Gulf Power, the local electrical utility company, who would be responsible for cleanup related to the equipment that could not be attributed to tenant negligence. The identified electrical equipment appeared to be in good condition, with no apparent evidence of staining, leakage, or corrosion noted. Based on their observed condition and the local utility ownership, the observed transformers are not considered to be evidence of a REC in connection with the subject property.

## **STORMWATER PONDS**

PSI identified a stormwater retention basin located on the north adjoining property. No obvious staining, stressed vegetation, or oily sheen was noted in connection with standing water observed at the bottom of the basin area at the time of the site reconnaissance. Based on PSI's observations, it appears that water comes into the basin from the surrounding area. As such, the presence of the identified stormwater retention basin is not considered to represent evidence of a REC in connection with the subject property.

## **ASTS/USTS**

PSI observed ASTs on the southwest adjoining property. These ASTs are discussed in detail in Section 7.1 of this report. Please refer to that section for those additional details and conclusions regarding the observed ASTs.

## 6.0 HISTORICAL USES

PSI utilized readily ascertainable historical data resources in order to research the history of the site and surrounding area. The intent of this review was to identify historical tenancies or uses of the subject property and surrounding area, which might be considered evidence of a REC. Generally, PSI reviewed the following readily ascertainable historic data resources, where they were available:

- Readily available historical topographic maps were reviewed to evaluate land development in the area over time. It should be noted that the scale of topographic maps in some cases does not allow for mapping of individual structures and developed areas may be shown by shading only.
- Selected historical aerial photographs were reviewed at 5-10 year intervals to obtain information concerning the development and history of the subject property and surroundings.
- PSI reviewed readily ascertainable historical city directories at 5-10 year intervals in order to obtain information on tenancies on the subject property and adjoining properties.
- PSI requested available historical fire insurance maps from EDR. The Sanborn Map Company and other regional providers historically mapped urban areas for use by insurance underwriters. In some cases these maps provide useful information in evaluating previous tenancies and uses of the subject property and surrounding area.

Copies of select historical documents are provided in the report appendix; however, it should be noted that some of the resources used by PSI may be copyrighted and PSI has summarized these resources herein, but we have not included copies of these resources in the appendix.

### 6.1 SUMMARY OF RESOURCES

PSI reviewed the following resources in order to evaluate the historic uses of the subject property and surrounding area:

Source Type	Years Reviewed	Source
USGS Topo Maps	1921, 1941, 1942, 1944, 1970, 1987, 1994, 2012	EDR
Aerial Photographs	1940, 1956, 1958, 1961, 1965, 1970, 1973, 1981, 1983, 1993, 1999, 2007, 2010, 2013, 2017, 2018	EDR, Google Earth
City Directories	1921, 1927, 1931, 1934, 1962, 1966, 1971, 1976, 1981, 1986, 1992, 1995, 2000, 2005, 2010, 2014	EDR
Sanborn Fire Insurance Maps	1903, 1907, 1950, 1979	EDR

## 6.2 CURRENT AND PRIOR USE INTERVIEWS

PSI conducted interviews with persons who are knowledgeable of the current use and history of the site. The following individuals were interviewed:

Name	Title/Role	Date Interviewed	Comments
City of Pensacola	Local Government	January 25, 2019	The interview details are appended.
Mr. Glenn Griffith	Escambia County Brownfield Coordinator	January 22, 2019	The User Questionnaire is appended.

No evidence of RECs were identified as a result of the interviews conducted during this assessment. Complete records of communication detailing information obtained and reviewed, have been appended to this report.

## 6.3 PRIOR INVESTIGATIONS

The client did not provide PSI with prior environmental or geotechnical reports, permits or registrations, or other pertinent information regarding the history of the site for review.

## 6.4 SUMMARY HISTORY OF SITE AND SURROUNDING AREA

A chronological summary of the history/use of the subject property and immediately adjacent properties is provided in the following table.

Date	Resource	Interpreted Use/Observations
<b>SUBJECT PROPERTY</b>		
1921 - 1956	Historic Aerial Photographs, Historic Topographic Maps, Property Appraiser Records, and City Directories	The subject property appeared to be mostly developed for residential and commercial use, including a Tin Shop located at 415/417 Government Street (1950).

Date	Resource	Interpreted Use/Observations
1956 - 1970	Historic Aerial Photographs, Historic Topographic Maps, Property Appraiser Records, and City Directories	The southeast corner of the subject property appeared to be developed for use as Main Street Waste Water Treatment Plant. The northwest portion of the subject property appeared to be undeveloped, grassy land. The rest of the subject property remained developed for residential and commercial use, including Grace John Sheet Metal Works at 415/417 Government Street.
1970 - 1981	Historic Aerial Photographs, Historic Topographic Maps, Property Appraiser Records, and City Directories	The majority of the subject property appears to be developed for residential and commercial use, including Ray's Cleaners & Laundry, Inc. (1971-1975). The Waste Water Treatment Plant appears to have expanded to the west.
1981 - 2010	Historic Aerial Photographs, Historic Topographic Maps, Property Appraiser Records, and City Directories	The entire subject property appears to be developed for use as Main Street Waste Water Treatment Plant.
2010 - 2019	Historic Aerial Photographs, Historic Topographic Maps, Property Appraiser Records, City Directories, and Site Reconnaissance	The subject property appears to be undeveloped, grassy land.

Date	Resource	Interpreted Use/Observations
<b>NORTH ADJOINING PROPERTY</b>		
1921 - 1965	Historic Aerial Photographs, Historic Topographic Maps, Property Appraiser Records, and City Directories	The eastern and western portions of the north adjoining properties appeared to be developed for residential use. The majority of the central portion of the north adjoining properties appeared to be undeveloped, grassy land.
1965 - 1983	Historic Aerial Photographs, Historic Topographic Maps, Property Appraiser Records, and City Directories	The eastern and western portions of the north adjoining properties appeared to be developed for residential and commercial use, including The Tropical Bar Tavern (1966-1971), Corrine Jones Recreation Center (1971-1986), and Gulf Coast Line Electric Service (1971-1981).
1983 - 2010	Historic Aerial Photographs, Historic Topographic Maps, Property Appraiser Records, and City Directories	The majority of the eastern and central portion of the north adjoining properties appears to be cleared, vacant land with scattered residential and commercial use, including Reefers Aquatics (2005-2014), Commercial Hood Cleaning Services (2010-2014). The western portion of the north adjoining properties appears to be developed for residential use.
2010 - 2019	Historic Aerial Photographs, Historic Topographic Maps, Property Appraiser Records, City Directories, and Site Reconnaissance	The eastern portion of the north adjoining properties appears to be developed use as Emerald Coast Utilities Authority Lift Station. The western portion of the north adjoining properties appears to be developed mostly for residential use. The central portion appears to be developed with a Corrine Jones Park and stormwater retention pond.

Date	Resource	Interpreted Use/Observations
<b>EAST ADJOINING PROPERTY</b>		
1921 - 1961	Historic Aerial Photographs, Historic Topographic Maps, Property Appraiser Records, and City Directories	The east adjoining properties appear to be developed for residential use.
1961 - 2019	Historic Aerial Photographs, Historic Topographic Maps, Property Appraiser Records, City Directories, and Site Reconnaissance	The northern portion of the east adjoining property appears to be developed for commercial use, including Weidlich Auto & Home Supply Tires (1971-1976), Architects & Engineers Supply House (1976-2000), Pensacola Parade People (2017-2019).
<b>SOUTH ADJOINING PROPERTY</b>		
1921 - 1993	Historic Aerial Photographs, Historic Topographic Maps, Property Appraiser Records, and City Directories	The western portion of the south adjoining properties appears to be developed for residential and commercial use, including Transmontaigne Partners/Unocle Bulk Storage Terminal - Pensacola Terminal (1918 - 2019). The eastern portion of the properties appears to be developed for use as Pensacola Main Street Area/Inland River Transportation and Chevron Facility #1289733/L&L Marine.
1993 - 2007	Historic Aerial Photographs, Historic Topographic Maps, Property Appraiser Records, and City Directories	The eastern and central portions of the south adjoining properties appear to be undeveloped, lightly wooded land.

Date	Resource	Interpreted Use/Observations
2007 - 2010	Historic Aerial Photographs, Historic Topographic Maps, Property Appraiser Records, and City Directories	The eastern and central portions of the south adjoining properties appears to be mostly undeveloped, lightly wooded land with one parcel developed for commercial use as Baskerville-Donovan (2005-2019).
2010 - 2019	Historic Aerial Photographs, Historic Topographic Maps, Property Appraiser Records, City Directories, and Site Reconnaissance	The eastern portion of the south adjoining properties appears to be developed for commercial use including Pensacola Maritime Park and Nick's Boathouse Restaurant.
<b>WEST ADJOINING PROPERTY</b>		
1921 - 1975	Historic Aerial Photographs, Historic Topographic Maps, Property Appraiser Records, and City Directories	The west adjoining properties appear to be developed for residential use.
1975 - 2019	Historic Aerial Photographs, Historic Topographic Maps, Property Appraiser Records, City Directories, and Site Reconnaissance	The west adjoining properties appear to be developed for residential and commercial use, including Anderson's Grocery (1976-1981) and Mike D's Culinary Productions (2010-2014). The ECUA lift station appears to have been constructed on the central portion of the west adjoining property in 2002.

**Former Tin Shop**

A former tin shop appears to have operated on the northeast corner of the subject property in the early

1950s. Tinning often involves tracing patterns onto sheets of tinplate (iron coated with an outer layer of tin) and cut with shears. The tinplate would have been bent, curved, and folded using hammers, mallets, and small anvil into the desired form. Steel punches and hammers were often used to pierce sheets of tinplate. Thick lead sheets were typically placed below the tinplate sheets to support the sheet and protect the work bench. Wastes generated by a tin shop would have included but not been limited to various lead, tin, and iron scraps generated during tinning activities. The facility appears to have been in operation prior to the implementation of regulatory oversight for the storage and disposal of hazardous materials used and generated by tinning operations. Documentation of good housekeeping and best management practices for the facility were not available for review. Based on the years of operation for the facility and an absence of documentation concerning good housekeeping and best management practices, the former tin shop is considered to be evidence of a REC in connection with the subject property at this time.

### **Grace John Sheet Metal Works**

This facility appeared to have operated on the northeast corner of the subject property in the early 1960s. A sheet metal fabrication facility typically involved machinery to bend and shape sheet metal into the desired form. This machinery and equipment potentially contained chemicals that were potentially hazardous materials and require special management when disposed of. The facility appears to have been in operation prior to the implementation of regulatory oversight for the storage and disposal of hazardous materials used and generated by machine shops. Documentation of good housekeeping and best management practices for the facility were not available for review. Based on the years of operation for the facility and an absence of documentation concerning good housekeeping and best management practices, the former Grace John Sheet Metal Works is considered to be evidence of a REC in connection with the subject property at this time.

### **Ray's Cleaners & Laundry**

This facility was identified on the EDR Hist Cleaner database. It appears this facility operated on the northeast portion of the subject property in the early to mid 1970s. Dry cleaning facilities typically generate hazardous waste including but not limited to, spent solvents. The facility appears to have been in operation prior to the implementation of regulatory oversight for the storage and disposal of hazardous materials and dry cleaning facilities. Data concerning the use and storage of solvents at the facility and documentation of good housekeeping and best management practices were not available for review. Based on the lack of information, the former Ray's Cleaners & Laundry is considered to be evidence of a REC in connection with the subject property at this time.

### **Weidlich Auto & Home Supply Tires**

The facility appears to have operated on the east adjoining property in the 1970s. No additional information concerning this facility could be obtained. The facility is located cross-gradient and at a lower elevation relative to the subject property. Based on this data Weidlich Automotive & Home Tire Supply does not represent a REC in connection with the subject property at this time.

### **Pensacola Main Street Area/Inland River Transportation Property**

This facility appears to have operated on the south adjoining property beginning in the 1980's. An operation

involving the transfer and storage of finished nylon products was reportedly located at the property in the 1980's. There is no evidence of storage tanks or petroleum products ever located on the site. The facility was identified by EDR on the FL Brownfields, FL CLEANUP SITES, FL RESP PARTY databases. Please refer to Section 7.1.2 for additional details concerning this facility. Based on this data and the data provide for the facility under Section 7.1.2, Pensacola Main Street Area/Inland River Transportation does not appear to represent a REC in connection with the subject property at this time.

#### **Transmontaigne Partners/Unocle Bulk Storage Terminal - Pensacola Terminal**

The facility appears to have been developed as a bulk petroleum storage and terminal facility in 1918 and has been in operation since that time. The facility was identified by EDR on the FUELS PROGRAM, FL LUST, FL AIRS, FL CLEANUP SITES, FL DWM CONTAM, RCRA-CESQG databases. Please refer to Section 7.1.2 for additional details concerning this facility. Based on this data and the data provide for the facility under Section 7.1.2, Tranmontaigne Partners/Unocle Bulk Storage Terminal does not appear to represent a REC in connection with the subject property at this time.

#### **Chevron Facility #1289733/L&L Marine**

The facility operated a bulk fuel terminal location where various motors fuels were stored starting the early 1950s. The facility included two separate tank areas surrounded by earthen berms with 17 total ASTs of unknown sizes. Terminal operations were halted in 1985. This facility was identified on the FDEP Gateway Direct as an FDEP Cleanup Site. Please refer to Section 7.1.2 for additional details concerning this facility. Based on this data and the data provide for the facility under Section 7.1.2, the former Chevron Facility/L&L Marine does not appear to represent a REC in connection with the subject property at this time.

## 7.0 ENVIRONMENTAL REGULATORY RECORDS REVIEW

### 7.1 DATABASE FINDINGS

PSI retained EDR to provide environmental database information attributed to the subject property and its surroundings. EDR obtains environmental databases published by local, state, tribal, and federal agencies and maps the information for electronic searches. EDR's service includes reporting Standard Environmental Records Sources and, in most cases, some Additional Environmental Records Sources.

The search was performed to AMSDs listed in ASTM E 1527-13. The search radius required by ASTM varies by database.

Unmappable (orphan) sites (if any were listed) having insufficient address information to be mapped were evaluated for potential location within the AMSD. Those that could be determined to be within the AMSD are discussed, as appropriate.

The distribution of listed sites with respect to the subject property is tabulated and mapped in EDR's Radius Map Report, which is appended. The reader is referred to the table, which can be found near the front of EDR's report. The full names of the abbreviations used below and in EDR's report can be found in the Government Records Searched/Data Currency Tracking section of EDR's report.

#### 7.1.1 SUBJECT PROPERTY

The subject property was listed on one or more regulatory databases as summarized in the following table.

Facility Name & Address	Database(s)	Comments
Mainstreet Wastewater Treatment Plant/ Emerald Coast Utilities Authority - 401 West Government Street, Pensacola, FL	HMIRS, ERNS, ICIS, FL AST, PA MANIFEST, FL SPILLS, FL TIER 2, FL Financial Assurance, FL NPDES, ERNS, RCRA-CESQG, ICIS, FINDS, ECHO, RMP	Additional details concerning this facility are provided below.

Facility Name & Address	Database(s)	Comments
Ray's Cleaners & Laundry - 415,417 W. Government Street, Pensacola, FL	EDR Hist Cleaner	Additional details concerning this facility are provided below.

**Main Street Wastewater Treatment Plant/Emerald Coast Utilities Authority - 401 West Government Street, Pensacola, FL (Subject Property)**

This facility was identified by EDR on the HMIRS, ERNS, ICIS, FL AST, PA MANIFEST, FL SPILLS, FL TIER 2, FL Financial Assurance, FL NPDES, ERNS, RCRA-CESQG, ICIS, FINDS, ECHO, and RMP databases. It appears the facility operated as a Wastewater Treatment Plant from the late 1930's through 2006, receiving many upgrades and expansions throughout that time, with a maximum capacity of 20 million gallons. The facility maintained an approximately 63,500-gallon AST located on the west central portion of the property and was surrounded by a concrete secondary containment area. The tank was used to store methanol which is added into the treatment system to increase the chemical and biological oxygen demand, as well as to reduce nitrite and nitrates. The methanol was delivered from the AST to the treatment area of the plant via a 1-inch diameter transfer line. According to a Contamination Assessment Report written by Gallet & Associates dated September 200, ECUA reported a leak in the methanol transfer line in January 2003. The leak was reportedly located between the secondary lift station and the OASES treatment area, which was discovered when methanol seeped into the dry well of the lift station. Based on historic methanol use records, ECUA determined that the line may have released up to 30,000 gallons of methanol.

In April 2003, three groundwater monitoring wells were installed down gradient of the methanol release. Soil samples were collected concurrently with the installation of the monitoring wells. The groundwater samples and soil samples were analyzed for methanol and related alcohols and VOCs. The laboratory analyses revealed methanol concentrations above the SCTL Leachability based on Ground Water Criteria observed in soil samples collected at and below the water table near suspected source area. Soil samples collected below the water table at the other well locations further from the source area revealed methanol concentration below the SCTL Leachability criteria. The groundwater samples collected from the two monitoring wells furthest away from the source area revealed no detected contaminants of concern. However, the monitoring well closest to the source area (MW-1) contained 3,400 mg/L of methanol, which is above the GCTL and the Natural Attenuation Default Source. MW-1 was resampled in July 2003, and the analytical results showed that the methanol concentrations had decreased to 1,000 mg/L. In August 2003, two additional monitoring wells were installed. MW-4 was placed in the suspected source area, while MW-5 was installed down gradient of the source area. All five wells were sampled in August 2003 and analyzed for methanol and related alcohols. The down gradient wells contained no detectable contaminants, while the two wells closest to the source area revealed methanol concentrations of 910 mg/L and 1,800 mg/L. Based on these findings, Gallet

recommended a Monitoring Only Plan be implemented on a quarterly basis. An addendum to the CAR dated January 2004 stated that the FDEP requested the installation and monitoring of a deep monitoring well down gradient from the source area. Based on persistent methanol concentrations at the near-source area well, Gallet conducted supplemental groundwater sampling in July 2007 up gradient of the source area, using DPT groundwater sampling technique, in order to better define the impacted area. An additional monitoring well was installed to the west-northwest of the source area. This well was designed for groundwater monitoring and groundwater recovery. After the well was sampled, it was pumped for 30-days as part of an interim groundwater source removal effort to reduce the highest methanol concentrations. Based upon FDEP recommendations, an additional ten soil samples were collected from around the area of the methanol tank, screened, and analyzed for methanol. The OVA screening results for the surface soil samples revealed concentrations of less than 10 ppm at each location. However, the OVA readings from below the water table exceeded 2,000 ppm at all locations. Gallet stated that these high readings could be the result of interference by methane/ethane and other naturally occurring organics. The analytical laboratory results show low levels of methanol concentrations (0.74 mg/L to 1.2 mg/L) in three of the soil samples collected from water table depth. These concentrations were below the SCTLs. The other seven samples contained no detectable methanol concentrations.

According to a Soil Quality Assessment Report by Gallet & Associates dated December 2008, a release of approximately 750 gallons of alum (hydrous aluminum sulfate) occurred in December 2007. The release occurred at the piping connected to the "sight glass" adjacent to the southwest side of the alum storage tank. Following the release, ECUA personnel mixed powdered lime with the impacted soils in order to neutralize the pH. Gallet conducted additional groundwater sampling and analysis on-site in conjunction with the quarterly methanol monitoring program. One down gradient monitoring well and one up gradient well were sampled on a quarterly basis and analyzed for aluminum and sulfate. The groundwater analytical results revealed no significantly elevated concentrations of aluminum or sulfate measured in groundwater down gradient from the alum release area. Five shallow soil samples were collected from within the alum soil area. Additionally, soil samples were collected 80 feet north of the spill area, in an assumed affected background area. The laboratory analysis revealed all of the total aluminum concentrations were significantly lower (1,100 mg/kg to 6,500 mg/kg) than the SCTL - Residential Direct Exposure Scenario (80,000 mg/kg). The sulfate concentrations from within the spill area ranged from less than 61 mg/kg to 2,400 mg/kg. However, there are no published SCTL criteria for sulfate. Based on this data, Gallet recommended no further assessment or monitoring of the alum spill area. However, a Discharge Notification Report from ECUA from January 2009 stated that on January 16, 2009, approximately 2,100 gallons of alum was released from a break in the fill line. ECUA personnel excavated approximately one foot of soil from the spill area and placed it in a trailer covered with a tarp for disposal. After the excavation, lime was placed on the spill area and backfilled with some soil from a nearby stockpile. A Site Assessment Report Addendum by Gallet & Associates dated October 2009 states that shallow soil samples were collected from nine locations within the most recent alum spill area and from a location approximately 500 feet north of the spill area, in an assumed unaffected, background area. The samples were submitted to a certified laboratory for analysis of Total Aluminum, Total Sulfate, and pH. The soil samples from the background locations and two of the soil samples from the spill area contained SPLP aluminum concentrations in excess of the Florida Secondary Drinking Water Standard of 0.2 mg/L. Similar to the previous alum spill, Gallet also conducted additional groundwater sampling and analysis on-site in conjunction with the ongoing quarterly groundwater methanol

monitoring program. One down gradient well and one up gradient well were sampled quarterly for one year starting in March 2009. The soil sample analytical results determined that all of the total aluminum concentrations were significantly below the SCTL - Residential Direct Exposure Scenario of 80,000 mg/kg. Additionally, total aluminum and sulfate concentrations were below the detection limit at the down gradient monitoring well. Per an FDEP memo dated January 2010, quarterly monitoring for aluminum and sulfate were discontinued.

A November 2012 Groundwater Monitoring Report and NFA Request written by Terracon states that 11 on-site monitoring wells were abandoned in July 2011 in preparation for the demolition of the former Waste Water Treatment Plant. To aid in the removal of structures/foundations down to an elevation of 3 feet above mean sea level, a large amount of dewatering was performed, and the water was transferred to the Government Street lift station, and treated at the Central Water Reclamation Facility. Following the facility demolition, four replacement wells were installed and sampled for two consecutive quarters. Both quarterly sampling events exhibited methanol concentrations below detectable levels for all samples. Based on this data, Terracon recommended No Further Action without Controls for the site. A Site Rehabilitation Completion Order from FDEP dated February 13, states that the recommendation of No Further Action without Controls was approved.

Based on this data and the facility's current regulatory status, Main Street Wastewater Treatment Plant/ Emerald Coast Utilities Authority appears to represent a HREC, and not a current REC, in connection with the subject property at this time.

#### **Ray's Cleaners & Laundry - 415/417 W. Government Street**

Ray's Cleaners & Laundry was identified by EDR as a historic drycleaners that appears to have operated on the northeast portion of the subject property beginning in the late 1960's until the mid to late 1970's. Dry cleaning facilities typically generate hazardous waste including but not limited to spent chlorinated solvents. The facility appears to have been in operation prior to the implementation of regulatory oversight for the storage and disposal of hazardous materials and dry cleaning facilities. Data concerning the use and storage of solvents at the facility and documentation of good housekeeping and best management practices were not available for review.

Based on the data presented above, the former Ray's Cleaners & Laundry is considered to be evidence of a REC in connection with the subject property at this time.

#### **7.1.2 SURROUNDING PROPERTIES**

PSI identified a number of regulated facilities and/or spill sites within the search radius. Those sites that are adjacent to the subject property or warranted further evaluation are summarized and discussed in the table below.

Facility Name & Address	Distance (feet) & Direction	Elevation Difference (feet)	Database(s)	Comments
Emerald Coast Utilities Authority - 450 W. Government Street, Pensacola, FL	North Adjoining Property	Same	FL AST	Additional details concerning this facility are provided below.
Pensacola Mainstreet Area/Inland River Transportation Property - 449 West Main Street, Pensacola, FL	South Adjoining Property	Same	FL Brownfields, FL CLEANUP SITES, FL RESP PARTY	Additional details concerning this facility are provided below.
Former Chevron Facility #1289733/L&L Marine - 618 S Barcelona Street, Pensacola, FL	South Adjoining Property	Same	DEP Clean up Site	Additional details concerning this facility are provided below.
Transmontaigne Partners - Pensacola Terminal - 511 S Clubbs Street, Pensacola, FL	Southwest Adjoining Property	Same	FUELS PROGRAM, FL LUST, FL AIRS, FL CLEANUP SITES, FL DWM CONTAM, RCRA-CESQG	Additional details concerning this facility are provided below.
Lifecycle Containers, LLC - 705 West Government Street, Pensacola, FL	~100 Feet West	Same	FL SWF/LF	Additional details concerning this facility are provided below.

Facility Name & Address	Distance (feet) & Direction	Elevation Difference (feet)	Database(s)	Comments
Tuttle Distributing Co, Inc./RK Allen Oil Co Inc/Buck Oil Services, Inc - 723 W Main Street, Pensacola, FL	~230 Feet East-Southeast	~2 Feet Lower	FL LUST, FL CLEANUP SITES, FL DWM CONTAM, RCRA NonGen/ NLR, FINDS, ECHO	Additional details concerning this facility are provided below.
Pfeiffer Printing Company -301 W Government Street, pensacola, FL	~320 Feet East	Same	US Brownfields, RCRA onGen/NLR, FINDS, ECHO	Additional details concerning this facility are provided below.
Florida Department Management Services - 160 Government Center, Pensacola, FL	~490 Feet East-northeast	Same	FL LUST, FL UST, FL SPILLS	Additional details concerning this facility are provided below.
Joe Patti Seafood Company - 524 South B Street, Pensacola, FL	~556 Feet West	Same	FL LUST, FL AST	Additional details concerning this facility are provided below.

Facility Name & Address	Distance (feet) & Direction	Elevation Difference (feet)	Database(s)	Comments
Escambia County Mosquito Control - 603 W Romana Street, Pensacola, FL	~565 Feet North	Same	Brownfield, FL DWM Contam, FL RESP PARTY, FL TIER 2, FL LUST, FL UST, FL VCP, RCRA nonGen/ NLR, FINDS, FL CLEANUP SITES	Additional details concerning this facility are provided below.
Barnes Electric Company - 55 South A Street, Pensacola, FL	~930 Feet Northeast	~3 Feet Higher	FL LUST, FL UST, FL CLEANUP SITES, FL DWM CONTAM	Additional details concerning this facility are provided below.

**Emerald Coast Utilities Authority - 450 W. Government Street (North Adjoining Property)**

This facility was identified by EDR on the FL AST database. The facility is located on the north adjoining property. The facility appears to operate and maintain one (1) emergency generator with an attached approximately 9,600-gallon capacity diesel fuel tank installed March 2010. The AST is constructed with a double wall steel and overfill/ spill protection and containment bucket. The system uses all above ground piping to transfer fuel to two (2) 200 gallon day tanks adjacent to the generator. A review of the regulatory databases revealed no regulatory violations associated with the generator system.

Based on this data and the facility's current regulatory status, Emerald Coast Utilities Authority does not appear to represent a REC in connection with the subject property at this time.

**Pensacola Mainstreet Area/Inland River Transportation Property - 449 West Main Street (South Adjoining Property)**

This facility is located on the south adjoining property and identified by EDR on the FL Brownfields, FL CLEANUP SITES, FL RESP PARTY databases. The facility appears to have been mostly vacant since the 1930's when a fish house was removed from the property. An operation involving the transfer and storage of finished nylon products was reportedly located at the property in the 1980's. There is no evidence of storage tanks or petroleum products ever located on the site. According to a January 2003 Site Assessment

Report by Cameron-Cole, Phase I and Phase II ESA activities took place in February 2002. The investigations involved twenty-three soil borings at random locations across the site. Soil samples were collected from the upper two feet of soil and analyzed for total arsenic. Six of the soil samples exceeded the default direct exposure concentration for commercial property of 3.7 ppm. Cameron-Cole conducted a Limited Subsurface Investigation in March 2002 which included the installation of three groundwater monitoring wells. The groundwater samples were collected and analyzed for priority pollutant volatile organic compounds, SVOCs, pesticides, PCBs, and Target Analyte List metals. No constituents of concern were detected above the applicable GCTLs in the groundwater samples. Additional Assessment activities were conducted in order to define the distribution of arsenic in the surficial soil across the site. Cameron-Cole personnel advanced a total of twenty-eight (28) soil borings to a depth of two feet bls. The samples were submitted for laboratory analysis. Seventeen of the the collected soil samples revealed arsenic concentrations exceeding the default SCTLs. The highest concentrations were found along the west property line, and none of the samples collected from the eastern portion of the property exceeded the SCTLs. A synthetic precipitation leachate procedure extraction and analysis was performed on three soil samples that exhibited the highest total arsenic concentrations in order to evaluate the potential for leaching of arsenic from the soil to the groundwater. Analysis of the SPLP leachate did not reveal arsenic concentrations in excess of the applicable GCTLs. Cameron-Cole recommended a Limited Scope Remedial Action Plan that specified use of engineering and institutional controls to limit exposure to the site soils. In December 2002, the City of Pensacola adopted a resolution designating the property a Brownfield Redevelopment Site. A review letter from FDEP dated October 2010 states that the facility has successfully met the BSRA and program tasks and no further action was required with a Restricted Covenant that states that the area of soil contamination shall be permanently covered and maintained with an impermeable material or two feet of clean fill, as well as the prohibition of excavation below two feet bls.

Based on the this data, the facility's current regulatory status, and the down gradient location relative to the subject property, Pensacola Main Street Area/ former Inland River Transportation does not appear to represent a REC in connection with the subject property at this time.

#### **Former Chevron Facility #1289733/L&L Marine - 618 S Barcelona Street**

This facility was identified on the FDEP Gateway Direct as an FDEP Cleanup Site. The facility operated a bulk fuel terminal location where various motors fuels were stored. The facility included two separate tank areas surrounded by earthen berms with 17 total ASTs of unknown sizes. Terminal operations were halted in 1985. Following the closing of the terminal, a jobber used the warehouse/office facilities along with an AST for gasoline storage. All onsite structures were dismantled in 1987. According to the July 2001 Site Priority Ranking Sheet, a discharge of unknown contents and volume was reported in August 1987. A March 2001 Site Assessment Report states that numerous groundwater sampling events have been conducted at the facility as part of previous assessment activities. Analytes detected in previous reports have included BTEX/ MTBE, VOH, PAH, TRPH, Base Neutral Compounds, and Lead. Additionally, phase-separated hydrocarbon was detected in several monitoring wells during previous assessment activities conducted in the late 1980s and early 1990s. Approximately 3,500 cubic yards of soil impacted with PSH were excavated and removed as part of the Initial Remedial Action in late 1992. A soil/bentonite slurry wall was installed along the northeastern portion of the site as part of the FDEP approved RAP in April 1994, in order to prevent the movement of contaminated groundwater from the site to Pensacola Bay. As part of a Remedial Action

Plan in 2000, Environmental Consulting & Technology, soil samples were collected from throughout the property and analyzed for PAHs, BTEX/MTBE, and volatile halocarbons. The laboratory results indicated that PAH compounds concentrations were detected above SCTLs for residential exposure. All other analyzed constituents were below regulatory limits. ECT concluded that the use of engineering and institutional controls were the most economical and technically feasible remedial measures for the site due to the low level and widespread nature of the contaminants. A RAP Modification proposed prepared by QORE Science and approved by FDEP in July 2002, proposed the use of engineering and institutional controls to address the contamination; however, these controls were never implemented due to public pushback against a proposed park/convention center. In a Remedial Action Plan Modification dated and approved November 2010, institutional and engineering controls were implemented. These controls included the capping of all contaminated soils by impermeable barriers or capped with a minimum of 2 feet clean backfill to prevent the migration of contamination.

Based on the this data, the facility's current regulatory status, and the down gradient location relative to the subject property, the Former Chevron Facility/L&L Marine does not appear to represent a REC in connection with the subject property at this time.

**Transmontaigne Partners/Unocle Bulk Storage Terminal - Pensacola Terminal - 511 S Clubbs Street, Pensacola, FL (Southwest Adjoining Property)**

The facility was identified by EDR on the FUELS PROGRAM, FL LUST, FL AIRS, FL CLEANUP SITES, FL DWM CONTAM, RCRA-CESQG databases. The facility was originally developed as a bulk petroleum storage and terminal facility in 1918 and has been in operation since that time. A discharge Reporting Form dated February 1986 states that an estimated 1,500 gallon of premium unleaded gasoline was released to the ground surface due to an overflow of AST #9. Approximately 1,020 gallons of product were recovered. During a February 1988 FDEP inspection related to the documented release, the FDEP representative reported the soil around AST #9 and AST #10 contained a diesel fuel odor. Groundwater Technology (GTI) conducted contamination assessment activities from 1991 through 1993. The investigations concluded that soil and groundwater contamination were present at the site. A Remedial Action Plan was prepared but was never implemented due to a low priority score. These investigations, which included multiple rounds of groundwater and soil sampling, indicated the presence of petroleum product contamination throughout the site. In September 2016, a Discharge Reporting Form was submitted to FDEP reporting a release of approximately 58,000 gallons of fuel-grade ethanol (FGE). According to the report, the release occurred at the product transfer pump for AST #114 on the southern portion of the facility due to a faulty pump seal. According to a January 2019 Post-Active Remediation Monitoring Report prepared by Piedmont Geologic, interim site soil/groundwater remedial actions including source removal and land farming were approved by FDEP in October 2016. Approximately 760 cubic yards of soil were excavated from the FGE release area and transferred to an on-site stockpile. The stockpiled impacted soil was treated via land farming techniques from September 2016 through February 2017. Groundwater remediation via groundwater extraction was completed from September 2016 to June 2018 with concurrent monthly site groundwater sampling and analysis. The laboratory analytical results indicated dissolved ethanol an petroleum compounds in the groundwater in the proximity of the FGE release area. Ethanol was not detected at concentrations above the Florida Groundwater Cleanup Target Level in samples from June 2018. Piedmont suggests that these petroleum compound concentrations are representative of background residual concentrations pre-dating

the 2016 FGE release. Groundwater samples from the December 2018 sampling event revealed ethanol concentrations above the GCTL, which was not detected in the previous PARM samples. Based on the detection of ethanol in the groundwater samples, the groundwater extraction system along with monthly groundwater monitoring will resume in February 2019.

Based on the down gradient location relative to the subject property, Transmontaigne Partners/Unocle Bulk Storage Terminal does not represent a REC in connection with the subject property at this time.

#### **Lifecycle Containers, LLC - 705 West Government Street**

This facility was identified by EDR on the FL SWF/LF database. The facility appeared to have operated as a construction waste debris container provider in the early 2010s. According to a Facility Inspection Checklist dated September 2011, FDEP personnel were onsite after a complaint in regards to the storage of solid waste. The inspector noted multiple roll-off containers were being stored onsite, and class III construction and demolition debris were being stored in the onsite containers. The owner of the facility was asked to properly dispose of the debris. FDEP personnel observed solid waste being removed from the property subsequent to the complaint inspection. No further compliance violations were documented.

Based on this data, Lifecycle Containers, LLC does not appear to represent a REC in connection with the subject property at this time.

#### **RK Allen Oil Co Inc/Buck Oil Services, Inc - 723 W Main Street, Pensacola, FL**

This facility was identified by EDR on the FL LUST, FL CLEANUP SITES, FL DWM CONTAM, RCRA NonGen/NLR, FINDS, ECHO databases. The facility previously maintained up to nine (9) large ASTs and three (3) USTs. The date of installation for the ASTs is unknown. The USTs were installed in 1961. The tanks were used to store a variety of petroleum products including new lubrication oil, gasoline, gasohol, and diesel fuel. The ASTs were removed from the facility in 2010, and the USTs were closed in place in 2010 and then excavated and removed from the site in 2012. According to a December 2018 Interim Assessment Report by Imperial Testing and Engineering, a discharge notification was submitted in August 1988. A release of gasohol, diesel, and used oil reportedly occurred from small spillage over time and faulty valve fittings. In September 2002 assessment activities were performed, which included the installation and sampling of ten shallow and one deep zone monitoring wells. Additionally, approximately 52 soil borings were advanced for soil assessment to delineate the area of petroleum impacted soil. Analytical laboratory results identified contaminants of concern concentrations that exceeded regulatory standards in the groundwater and soil samples. Due to funding, no remediation activities were ever performed for this facility. As part of LSSI activities in December 2014 and January 2015, Gulf Coast Environmental Services (GCES) conducted groundwater and soil analysis. The groundwater analytical results revealed contaminant levels in MW-1 at concentrations above the regulatory GCTLs and NADC, while the remaining samples were below GCTLs for all analyzed parameters. The analytical results revealed concentration levels of contaminants above SCTLs at one soil boring location. The remaining soil samples were below SCTLs for all constituents analyzed. Additionally, SPLP extraction for BTEX/MTBE and PAH compounds were performed on the soil sample containing elevated contamination concentrations, and the results indicated xylene, naphthalene, 1- and 2-methylnaphthalene, and TRPH concentrations that exceeded the SCTLs. In December 2008, Imperial

advanced a total of eight soil borings and five monitoring wells. Elevated OVA readings were encountered in the vadose and saturated zones in multiple borings. The soil samples were collected and analyzed for BTEX/MTBE, PAHs, and TPH. The laboratory results revealed concentration levels above SCTLs for naphthalene, 1-methylnaphthalene, 2-methnaphthalane, and TRPH. All other analyzed constituents were below the SCTLs. Groundwater samples were collected and analyzed for BTEX/MTBE, VOHs, PAHs, TRPH, lead, and EDB. The analytical results indicated ethylbenzene, xylene, naphthalene, 1,2,5-trimethylbenzene, and 1,2,4-trimethylbenze, concentration levels exceeding GCTLs and NADCs at multiple wells. Imperial stated that the soil and groundwater contamination could not be delineated and recommended the installation of additional soil borings and monitoring wells.

Based on the cross gradient position relative to the subject property, RK Allen Oil Co Inc/Buck Oil Services, Inc does not appear to represent a REC in connection with the subject property at this time.

#### **Pfeiffer Printing Company -301 W Government Street**

The facility was identified by EDR on the US Brownfields, RCRA onGen/NLR, FINDS, ECHO databases. The facility appears to have operated as a printing facility from the early 1980s until the mid-2000s. Printing activities typically involve the use and storage of hazardous materials on site. However, assessment data associated with adjoining and surrounding properties suggest that groundwater flow direction trend to the south-southeast. A review of regulatory databases revealed no compliance enforcement issues in connection with the facility. The facility was also listed by EDR on the US Brownfields database; however, no additional information about the facility was found during a review of regulatory databases.

Based on this data, the former Pfeiffer Printing does not appear to represent a REC in connection with the subject property at this time.

#### **Florida Department Management Services - 160 Government Center**

The facility was identified by EDR on the FL LUST, FL UST, and FL SPILLS databases. In December 1998, an approximately 560-gallon UST used to contain diesel fuel was removed from the site. A February 2000 Initial Remedial Action Report by Jim Stidham & Associates (JSA), a tank closure assessment identified benzene, xylene, MTBE, and several PAH concentration to be above FDEP GCTLs. JSA conducted an Interim Remedial Action to address the groundwater contamination, consisting of limited source removal to remove petroleum impacted media. An estimated six tons of impacted soil were excavated and properly disposed. Field assessment activities performed following the source removal revealed concentrations of benzo(a)anthracene, benzo(a)pyrene, and benzo(k)fluoranthene above the GCTLs, but below the NADC. To determine the risk of the low concentration groundwater plume migrating offsite, groundwater natural attenuation monitoring was conducted. The analytical results for the September 2001 and September 2002 sampling events revealed that all sampled parameters were below the laboratory detection limits. Based on these findings JSA recommended No Further Action for this facility. In a letter dated October 2003, FDEP granted the facility a Site Rehabilitation Completion Order.

Based on the this data, the facility's current regulatory status, and the down gradient location relative to the subject property, Florida Department Management Services does not represent a REC in connection with the subject property at this time.

### **Joe Patti Seafood Company - 524 South B Street**

The facility was identified by EDR on the FL LUST and FL AST databases. The facility currently operates as a retail seafood market. The site formerly maintained one (1) 10,000-gallon AST that contained diesel fuel. The AST was installed in July 1979 and is listed as removed from the site at an unknown date. According to the regulatory records, a release of unknown cause was reported, however, the likely cause is due to overfilling during a fuel drop. In August 1994, the facility was determined to be eligible for state funded cleanup under the PLIRP program. According to a June 2015 LSSI Site Assessment Report by GCES, in June 1994 Grady Swann, Inc. collected soil samples from the location of the former AST. The soil screening results revealed petroleum vapor concentration greater than 50 ppm. A tank closure assessment report was completed. Additionally, an unknown quantity of petroleum impacted soil was excavated and disposed. In January 2015, GCES conducted soil assessment activities as part of the LSSI Site Assessment. Soil samples were collected and submitted for laboratory analysis. The results indicated concentrations of benzo(a)pyrene that exceeded the State SCTLs. Based on these results, the FDEP requested a background study be conducted. Seven additional soil borings and five groundwater monitoring wells were advanced and samples were submitted for analysis for PAH compounds. The PAH concentrations from the supplemental soil borings in the area of the former tank pit were within regulatory standards. The groundwater results revealed that all contaminant concentrations were below state GCTLs. The groundwater flow was indicated to be towards the south-southwest. Based on these results, GCES recommended closure for the site under the LSSI guidelines. In a letter dated November 2015, the FDEP granted the facility a Site Rehabilitation Completion Order.

Based on this data and facility's current regulatory status, Joe Patti Seafood Company does not appear to represent a REC in connection with the subject property at this time.

### **Escambia County Mosquito Control - 603 W Romana Street, Pensacola, FL**

This facility was identified by EDR on the Brownfield, FL DWM Contam, FL RESP PARTY, FL TIER 2, FL LUST, FL UST, FL VCP, RCRA nonGen/NLR, FINDS, and FL CLEANUP SITES databases. The facility appeared to have operated as the Escambia County Mosquito Control Facility since 1985, but had been occupied by various county agencies since the late 1950s. The facility consisted of seven structures which served as offices, laboratories, and storage. In 1986, two (2) 3,000-gallon steel USTs used to store leaded gasoline and diesel fuel were closed in-place by filling them with bentonite, and ultimately removed from the site in October 2008, as well as all facility structures and buildings. A Discharge Reporting Form was submitted by Escambia County in May 1987, and applied for restoration coverage of contamination associated with the USTs under the state's Early detection Incentive Program. During an EDI inspection in August 1987, FDEP representatives observed gasoline and malathion odors in the groundwater. Based on the findings of the inspection, the FDEP indicated that the site was not eligible for the EDI Program due to the presence of malathion. Assessment activities were conducted on-site in late 1987 and 1988, which included the installation of six temporary monitoring wells and the subsequent collection of groundwater samples for laboratory analysis. The analytical groundwater results revealed the presence of petroleum products and various organochlorine and organophosphorous pesticides. In February 1994, the facility was determined to be eligible for cleanup under the Abandoned Tank Restoration Program, and was also designated as a Brownfields Area by the City of Pensacola in September 2005. A Phase II ESA conducted by Cameron-Cole in May 2006 affirmed the presence of petroleum products and pesticides that exceeded applicable CTLs in

the soil and groundwater. The assessment defined the extent of a dissolved phase contaminant plume that extended off-site to the south and east of the property. The primary constituents of concern include DDT and its associated degradation products, dieldrin, various isomers of hexachloride, VOA compounds, PAHs, and TRPH. Phase separated hydrocarbons were also documented in several of the monitoring wells located immediately downgradient from one of the UST areas. In May 2011, an RAP prepared for the facility was approved and involved the excavation of 664 tons of impacted soil, installation of a biosparging to attenuate off-site migration of dissolved constituents, deployment of the in situ bioreactor system which was put into operation in November 2012. In June 2015, increased concentrations of pesticides were documented in the vicinity of the intersection of Donelson Street and Intendencia Street. An approved RAP Modification employed in situ chemical oxidation (ISCO) to remediate the groundwater in this area, and was implemented between April and June 2016.

According to a November 2018 Quarterly Monitoring Report by Cameron-Cole, an additional RAP Modification was developed that specified the elements for a dewatering treatment system that was needed for the construction of a stormwater retention pond by the City of Pensacola. Portions of the pond intercept the former downgradient limits of the groundwater plume associated with the former Escambia County Mosquito facility. Approximately 40 million gallons of recovered impacted groundwater were treated during the construction of the pond between September and December 2016. In September 2018, quarterly groundwater samples were collected from designated monitoring wells. The laboratory analytical results indicated organochlorine pesticides remain present in the shallow groundwater at concentrations above CTLs in multiple monitoring wells. The remaining area of DDT degradation products of DDT above CTLs is well define onsite and not migrating. Dieldrin concentrations were reported above CTLs from on site wells; although, data indicate that the dieldrin plume is also stable and not migrating off-site. Further, delta-HCH concentrations were detected in concentrations above NADC from an onsite well. Historically, this concentration of delta-HCH have shown seasonal fluctuations; however, increases in concentrations off-site have not been observed.

Based on this data and the evidence that the contamination plumes appear to be stable and not migrating off-site, the former Escambia County Mosquito Control facility does not appear to represent a REC in connection with the subject property at this time.

### **Barnes Electric Company - 55 South A Street**

This facility was identified by EDR on the FL LUST, FL UST, FL CLEANUP SITES, FL DWM CONTAM databases. The facility operated as company offices as well as a maintenance shop for company vehicles. The facility maintained one (1) 6,000-gallon UST used to store gasoline and one (1) 2000-gallon UST which stored diesel fuel. Both UST were removed from the facility in October 1991. During the tank removal, soil contamination was reportedly discovered. However, the amount and type of contamination released was unknown but was suspected to be a combination of unleaded gasoline and diesel. A CAR submitted to FDEP in March 1995 stated that soil contamination was detected near land surface to 6 feet bls via headspace screening north-northwest of the former tank pit location. Groundwater contamination was exhibited above the GCTLs and NADs down gradient from the release location. Additional site assessment activities were conducted and reported in October 2002. Soil and groundwater samples were collected and analyzed. The laboratory results indicated contamination concentrations above the SCTLs for leachability residential direct exposure

for the soil samples collected. The groundwater results also indicated contamination concentrations above the state GCTLs and NADCs from the source well. Recommendations were made for the preparation of a Remedial Action Plan, however, the state priority threshold funding score was increased, and the site was no longer eligible for funding.

As part of a Low Scored Site Initiative, additional groundwater samples were collected and analyzed for BTEX/MTBE, PAHs, lead, EDB, and TRPH in January 2013. The analytical results revealed total xylenes, naphthalene, benzene, ethylbenzene, TRPH, 1-methylbenzene, and 2-methylbenzene concentrations above GCTLs. Soil samples submitted for laboratory analysis, which exhibited numerous concentrations of contaminants above the state SCTLs. Based on these results, the facility did not qualify for participation in the LSSI program. No other assessment or remediation activities have been conducted on this site.

Based on this data and the distance of the facility from the subject property, it appears that Barbes Electric Company does not represent a REC in connection with the subject property at this time.

PSI considered the remaining database listings unlikely to impact the subject property based upon factors including (but not limited to):

- The nature of the listing;
- The use of the facility;
- When the facility was listed and its current listed status;
- The developmental density of the setting;
- The potential for vapors to encroach from the property to the subject property;
- The distance between the listing and subject sites related to whether releases are likely to migrate based on local surface and subsurface drainage conditions; and/or
- The presence of intervening drainage divides; and/or inferred groundwater movement.

## **7.2 REGULATORY AGENCY INQUIRIES**

PSI requested records or information about the subject property and/or surrounding area from the governmental agencies listed in the following sections. Information was requested by telephone, in person, via e-mail or through a written FOIA or equivalent request, as appropriate.

### **7.2.1 CITY OF PENSACOLA**

PSI contacted the City of Pensacola for information related to any spills or hazardous materials incidents on the subject property. Ms. Lysia H. Bowling, indicated that the fire department did not have any records related to the subject property.

### **7.2.2 REGULATORY AGENCY MAINTAINED WEBSITES**

Additionally, PSI supplemented the EDR database with the following on-line database websites:

- EPA's EnviroMapper for Envirofacts Database;

- FDEP's Map Direct Mapping Database Website;
- FDEP's First Portal Crystal Reports Database; and
- FDEP's OCULUS Database.

The websites confirmed information in EDR's Radius Map Report.

## 8.0 VAPOR ENCROACHMENT SCREENING

### 8.1 METHODOLOGY

Vapor encroachment is an emerging concern associated with the potential for volatile chemicals, such as petroleum fuels and chlorinated solvents to migrate through the subsurface in the gas phase from contaminated soil and/or groundwater plumes. Vapor encroachment may be a concern if subsurface volatile contaminants migrate into occupied buildings through cracks and penetrations in the building slab.

The ASTM E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment process requires the Environmental Professional to evaluate the potential for vapor encroachment onto the subject property, and to determine if such vapor encroachment constitutes evidence of a REC on the subject property. The E1527-13 Standard Practice does not specifically state the methods that must be used to screen for potential vapor encroachment issues. However, ASTM has developed a separate Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (ASTM E2600-15). The vapor encroachment screening guidance outlines a methodology to conduct vapor encroachment screening, which will satisfy the vapor screening requirements under the Phase I ESA Standard Practice. PSI utilized the ASTM E2600-15 Standard Guide to conduct vapor encroachment screening for the subject property.

The goal of conducting Vapor Encroachment Screening (VES) is to identify a VEC, which is defined as the presence or likely presence of COC vapors in the subsurface of the subject property caused by the release of vapors from contaminated soil either on or near the subject property. If a VEC is identified, the environmental professional must determine whether the VEC represents evidence of a REC on the subject property under the context of the Phase I ESA Standard Practice. It should be noted that the identification of a VEC on the subject property does not necessarily indicate that a potential for migration of vapors into existing or proposed structures on the subject property is likely. The environmental professional will identify the VEC as a REC where the potential for vapor migration into structures is considered likely, or where the contaminant concentrations in the soil, groundwater, or soil vapors on the subject property are significant and likely to result in enforcement against on-site or off-site responsible parties.

The VES utilizes information regarding the potential presence of releases on or near the subject property that were collected as a normal part of the Phase I ESA process, such as governmental database records, review of governmental files, historical data sources, etc. No additional data was collected specifically for the purpose of the VES. In order to identify potential sites of concern within the AMSD, as available and appropriate, PSI reviewed Sanborn Maps, governmental database records, regulatory agency files, aerial photographs, and other information.

VES Standard Guide prescribes a two tier approach for screening of sites for potential vapor encroachment. In Tier I, potential sites of concern within the search radii are identified and the environmental professional must determine whether a VEC exists or not based on the information that is available within the context of the Phase I ESA data gathering. If the available information indicates that a VEC exists based on available information, the environmental professional, in consultation with the User, may conduct Tier II screening to further evaluate the potential risk. Under Tier II, the environmental professional would review available

reports through the regulatory agency or other reasonably ascertainable sources to determine the status of assessment/remediation, size and migration pathways for any associated plumes, geologic conditions, and other geologic information. This information would be utilized to determine the distance between the plume and the target property boundary. For example, if the distance from the edge of a plume in a downgradient position to the subject property boundary exceeds 100 feet for VOCs or petroleum free product, or 30 feet for dissolved petroleum hydrocarbons (PHCs), then the site may be screened out and a VEC does not exist. Functionally, where Tier II information is readily available during the normal course of conducting the Phase I ESA, PSI has combined the Tier I and Tier II steps herein. Where agency files are not readily available for nearby contaminated sites within the typical schedule for a Phase I ESA, then Tier II screening might be recommended as a separate step subsequent to the Phase I ESA. Where Tier II screening is recommended, the sites of concern where data is lacking are considered a VEC until further information is available and/or further screening is completed.

The VES Standard Guide requires the environmental professional to search for potential sites of concern within the following databases and search distances, where groundwater flow is not known and/or preferential pathways for groundwater or vapor flow may exist:

<b>Standard Environmental Records Sources</b>	<b>Minimum Search Distance (miles) - VOCs, excluding PHCs</b>	<b>Minimum Search Distance (miles) - PHCs</b>
State and tribal HWS lists	1/3	1/10
State or tribal-equivalent NPL	1/3	1/10
State or tribal-equivalent CERCLIS list	1/3	1/10
State or tribal landfill or solid waste site list	1/3	1/10
State or tribal leaking storage tank lists	1/3	1/10
State and tribal registered tank lists	Subject property only	Subject property only
State and tribal IC/EC registries	Subject property only	Subject property only
State and tribal voluntary cleanup site lists	1/3	1/10
State and tribal brownfield sites list	1/3	1/10
Federal NPL site list	1/3	1/10
Federal CERCLIS list	1/3	1/10
Federal RCRA CORRACTS list	1/3	1/10
Federal RCRA non-CORRACTS TSD List	1/3	1/10
Federal RCRA Generators List	Subject property only	Subject property only
Federal IC/EC registries	Subject property only	Subject property only

<b>Standard Environmental Records Sources</b>	<b>Minimum Search Distance (miles) - VOCs, excluding PHCs</b>	<b>Minimum Search Distance (miles) - PHCs</b>
Federal ERNS list	Subject property only	Subject property only

The default search distances may be expanded or reduced in the up-gradient, down-gradient, or cross-gradient directions by the environmental professional based on experience in the local area and applying professional judgment to factors such as where a well-defined regional groundwater flow direction is identified, or whether other geologic features such as low permeability soils or hydrogeologic boundaries such as rivers or streams exist which would tend to limit the potential for migration of groundwater or vapors in a particular direction.

## 8.2 VES RESULTS

PSI identified one site of potential concern within the VES search radii. This site is summarized and discussed below.

### **Ray's Cleaners & Laundry - 415/417 W. Government Street**

Ray's Cleaners & Laundry was identified by EDR as a historic drycleaners that appears to have operated on the northeast portion of the subject property beginning in the late 1960's until the mid to late 1970's. Dry cleaning facilities typically generate hazardous waste including but not limited to spent chlorinated solvents. The facility appears to have been in operation prior to the implementation of regulatory oversight for the storage and disposal of hazardous materials and dry cleaning facilities. Data concerning the use and storage of solvents at the facility and documentation of good housekeeping and best management practices were not available for review.

Based on the data presented above, the former Ray's Cleaners & Laundry is considered to be evidence of a REC and a VEC in connection with the subject property at this time.

## 8.3 VES LIMITATIONS

The VES process is not intended to be an exhaustive screening and cannot wholly eliminate uncertainty regarding the presence of VECs in connection with the subject property. Screening is intended to reduce, but not eliminate uncertainty regarding whether or not a VEC exists in connection with the subject property.

## **9.0 CONTRACT INFORMATION**

### **9.1 STANDARD OF CARE AND WARRANTIES**

Our services were not intended to be technically exhaustive. There is a possibility that with the proper application of methodologies, conditions may exist on the property that could not be identified within the scope of the assessment(s) or that were not reasonably identifiable from the available information.

No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with the property. The ESA was intended to reduce, but not eliminate uncertainty regarding the potential for RECs in connection with a property.

Our report is based on commonly known and reasonably ascertainable information, including limited, ground-level visual inspection of the property except where otherwise explicitly indicated, in general conformance with ASTM E1527-13. Findings and conclusions derived from the methodologies described in the Practice contain all of the inherent limitations in the methodologies that are referred to in the Practice.

PSI has assumed that factual information provided to us by the client, or obtained from governmental and historical research firm, the public domain, interviews, and other sources is accurate and unbiased. PSI assumes no liability for the accuracy of data provided to us by others.

PSI did not perform exploratory probing or discovery, perform tests, operate specific equipment, or take measurements or samples to perform the ESA scope. The ESA was not a building code, safety, regulatory or environmental compliance inspection. The ESA is not intended to reduce the risk of the presence of mold and physical deficiencies conducive to mold nor the risk that mold or physical deficiencies conducive to mold may pose to the buildings and building occupants.

The methodologies include reviewing information provided by other sources. PSI treats information obtained from the record reviews and interviews concerning the property as reliable and the ASTM protocol does not require PSI to independently verify the information. Therefore, PSI cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete.

PSI has performed the services in a manner consistent with that level of care and skill ordinarily exercised by other members of our profession currently practicing in the same locality and under similar conditions, within the limitations of ASTM E1527-13 standard, and the All Appropriate Inquiries Rule established by the U.S. Environmental Protection Agency (40 C.F.R. Part 312). No other warranties are implied or expressed.

The observations and recommendations presented in this report are time dependent, and conditions will change. This report speaks only as of its date.

### **9.2 RELIANCE**

Escambia County Engineering, PSI's client, may rely on this report.

### **9.3 USE BY OTHER PARTIES**

This report was prepared pursuant to a contract between PSI and its client. That contractual relationship included an exchange of information about the property that was unique and serves as the basis upon which this report was prepared. Because of the importance of these understandings, our assessment may not be sufficient for the intended purposes of another party.

Reliance or any use of this report by anyone other than those parties identified above for which it was prepared, except with express written permission, is prohibited and therefore not foreseeable to PSI. Any unauthorized reliance on or use of this report, including any of the information or conclusions contained herein, will be at the third party's risk. No warranties or representations expressed or implied in this report are made to any such third party.

Third party reliance letters may be issued:

- upon timely request;
- subject to the permission of our original client; and
- payment of the then-current fee for such letters.

All third parties relying on our report, by such reliance, agree that such reliance is limited by our proposal and/or General Conditions, as applicable.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal NPL site list***

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 12/12/2018 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

#### ***Federal CERCLIS list***

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/12/2018 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

EPA Id: FLD008161994

### ***Federal RCRA generators list***

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 5 RCRA-CESQG sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 07/31/2018 has revealed that there is 1 US INST CONTROL site within approximately 0.5 miles of the target property.

### **State and tribal registered storage tank lists**

FL UST: The Underground Storage Tank database contains registered USTs. Shortly after the September 11 event, the DEP was instructed to remove the detail about some of the storage tank facilities in the state from their reports. Federal-owned facilities and bulk storage facilities are included in that set.

A review of the FL UST list, as provided by EDR, has revealed that there are 8 FL UST sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### **State and tribal institutional control / engineering control registries**

FL ENG CONTROLS: The registry is a database of all contaminated sites in the state of Florida which are subject to engineering controls. Engineering Controls encompass a variety of engineered remedies to contain and/or reduce, contamination, and/or physical barriers intended to limit access to property. ECs include fences, signs, guards, landfill caps, provision of potable water, slurry walls, sheet pile (vertical caps), pumping and treatment of groundwater, monitoring wells, and vapor extraction systems.

A review of the FL ENG CONTROLS list, as provided by EDR, and dated 10/01/2018 has revealed that there are 3 FL ENG CONTROLS sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### **State and tribal Brownfields sites**

FL BROWNFIELDS: Brownfields are defined by the Florida Department of Environmental Protection (FDEP) as abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination.

A review of the FL BROWNFIELDS list, as provided by EDR, has revealed that there are 4 FL BROWNFIELDS sites within approximately 0.5 miles of the target property.

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### **Local Brownfield lists**

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 12/17/2018 has revealed that there are 6 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

### **Local Lists of Hazardous waste / Contaminated Sites**

FL FI Sites: This summary status report is a compilation and revision of other existing lists. It was developed from a number of lists including the Eckhardt list, the Moffit list, the EPA Hazardous Waste Sites list, EPA's Emergency and Remedial Response Information System list (RCRA Section 3012), and existing department lists such as the Obsolete Uncontrolled Hazardous Waste Sites list. The purpose of this list is to track the progress of activities within and outside the department as they relate to the listed sites. It is not a list of uncontrolled sites or sources causing environmental contamination. The Sites List comes from the Department of Environmental Protection.

A review of the FL FI Sites list, as provided by EDR, and dated 12/31/1989 has revealed that there is 1 FL FI Sites site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### **Other Ascertainable Records**

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there are 6 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

EPA ID:: FLR000044156

ROD: Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid the cleanup.

A review of the ROD list, as provided by EDR, and dated 12/12/2018 has revealed that there is 1 ROD site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Incident damage: 0

Inner and Outer Container Information:

Container type: MC307  
 Container capacity: 5500.00 GAL  
 Number failed: 1  
 Number in shipment: 1  
 Container gauge: Not reported  
 Manufacture's ID: 18468  
 Manuf. name: TERMINAL SERVICE COMPANY  
 TALLAHASSEE, FL  
 Tank serial #: 1M92M4021L  
 Label: Not reported  
 Registration #: Not reported  
 Inspection date: / /  
 Exemption #: Not reported  
 Contributing cause: GASKET  
 Contributing Object: GASKET  
 Contributing failure: LEAKED  
 Affected side: FITTING HOOK  
 Other contributing cause: GASKET  
 Capacity container code: 0  
 Number failed code: 0  
 Shipment code number: 0

Remarks:

AS DRIVER WAS OFF LOADING, HE NOTICED A SMALL LEAK COMING FROM HIS FITTING BETWEEN HIS HOSES & THE STORAGE TANK. THE DRIVER SHUT OFF THE AIR GOING TO THE TRAILER OF THE INTERNAL VALVE ON THE TRAILER IN ORDER TO CHANGE THE GASKET FROM THE LEAKING FITTING. THE DRIVER FAILED TO BLEED THE PRESSURE FROM THE HOLES & THE LINE LEADING TO THE STORAGE TANK. WHEN THE FITTING WAS UNHOOKED, THE PRESSURE IN THE LINE CAUSED APPROX. 50 GALLONS OF PRODUCT TO SPILL.

**FINDS:**

Registry ID: 110002395042

**Environmental Interest/Information System**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the

discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**AIR MINOR**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

Registry ID: 110064408546

**Environmental Interest/Information System**

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Summary Details:

Conditions at listing October 1981): The American Creosote Works Site covers 1.5 acres in Pensacola, Florida, about 0.3 mile north of where Bayou Chico and Pensacola Bay meet. The facility treated wood with creosote and pentachlorophenol (PCP) from the early 1900s to late 1981 or early 1982. PCP-contaminated waste water was discharged into two unlined 80,000-gallon percolation ponds. In February 1981, the U.S. Geological Survey identified phenols in ground water associated with American Creosote Works. No drinking supply wells are within the known one of contamination. Status July 1983): In March 1982, American Creosote sold all the equipment on-site and later filed for bankruptcy under Chapter 11 of the Federal Bankruptcy Act. The State has negotiated a Consent Order requiring American Creosote to restore the discharge areas and install on-site monitoring wells. The company constructed higher berms around the ponds to prevent overflow during heavy rainfall. EPA recently completed a Remedial Action Master Plan outlining the investigations needed to determine the full extent of cleanup required at the site. EPA plans to fund 1) a 290,000 remedial investigation/feasibility study to determine the type and extent of contamination at the site and identify alternatives for remedial action and 2) an 85,000 initial remedial measure involving fencing the site, posting warning signs, reconstructing the berms, and controlling flooding from the waste ponds. The work is scheduled to start in the third quarter of 1983.

Property Description:	

The subject sites are a 0.26 acre parcel of unimproved property and a 0.15 acre parcel with a 2,880 square-foot metal sided building used as an office and storage for Southeastern Construction, Inc. Based upon review of historical aerial photographs, topographic maps, city directories and interviews with property representatives, the subject property at 520 West Intendencia had up to three dwellings on the property from at least 1940 to about 1950. Since at least 1950, the subject property at 520 West Intendencia Street has been undeveloped commercial property. Based upon review of historical aerial photographs, topographic maps, city directories and interviews with property representatives, the subject property at 513 West Intendencia had up to four dwellings on the property from at least 1940 to about 1950. From at least 1950 to 2007, the subject property at 513 West Intendencia Street was undeveloped commercial property. In 2007, the current structure on the property was built.

. Waste code: D001

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Used oil transporter: No

. Waste code: D001

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

FINDS:

Registry ID: 110005643937

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Property Description:	Property has been owned by Escambia County since the 1940s, with various County agencies operating since 1956. The Mosquito Control Agency has operated since 1985. In 1986, two 3,000-gallon steel underground storage tanks (USTs) used to store leaded gasoline and diesel fuel were closed in place by filling with bentonite. In May 1987, Escambia County submitted a Discharge Reporting Form and applied restoration coverage of the contamination associate with the USTs under the State of Florida s newly enacted Early Detection Incentive (EDI) Program. An EDI inspection conducted by FDEP in 1987 detected gasoline odors in the ground water as well as Cythion (malathion). The site was found eligible for the State-funded cleanup under the Abandoned Tank Restoration Program. In May 2006, the site consultant completed a Phase II ESA for the facility, which revealed petroleum and pesticide constituents, which exceeded CTLs and recommended further testing to define the extent of the contamination. Concern that properties adjacent to the site may have been impacted, based on ground water modeling, prompted sampling of ground water on these properties. Results are pending. (PPF-5/2/07)

Property Description:	Property has been owned by Escambia County since the 1940s, with various County agencies operating since 1956. The Mosquito Control Agency has operated since 1985. In 1986, two 3,000-gallon steel underground storage tanks (USTs) used to store leaded gasoline and diesel fuel were closed in place by filling with bentonite. In May 1987, Escambia County submitted a Discharge Reporting Form and applied restoration coverage of the contamination associate with the USTs under the State of Florida s newly enacted Early Detection Incentive (EDI) Program. An EDI inspection conducted by FDEP in 1987 detected gasoline odors in the ground water as well as Cythion (malathion). The site was found eligible for the State-funded cleanup under the Abandoned Tank Restoration Program. In May 2006, the site consultant completed a Phase II ESA for the facility, which revealed petroleum and pesticide constituents, which exceeded CTLs and recommended further testing to define the extent of the contamination. Concern that properties adjacent to the site may have been impacted, based on ground water modeling, prompted sampling of ground water on these

Environmental Interest/Information System

US EPA Assessment, Cleanup and Redevelopment Exchange System (ACRES) is an federal online database for Brownfields Grantees to electronically submit data directly to EPA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

. Waste code: D001  
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: F003  
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005  
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

FINDS:

Registry ID: 110064408190

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Registry ID: 110007430878

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Appraiser s website, the current residential structure on the subject property was built in 1938 and encompasses approximately 2,186 square feet. The remainder of the property consists of grassy areas and a dirt/grass driveway. Based on the review of historical aerial photographs, fire insurance maps, city directories, and property records, the southeast portion of the subject property has been developed with a residence since 1903. Based on review of historical aerial photographs, fire insurance maps, and city directories, four residences were located on the remainder of the subject property from at least 1903 to at least 1983 and one residence was located on the west-central portion from at least 1951 to at least 1979. Based on review of historical fire insurance maps and city directories, the southwest corner of the property was occupied by two retail structures from at least 1951 to at least 1979. One of the retail structures was occupied by Whitehead s Cleaners & Laundry from at least 1955 to at least 1960.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/12/2018	Source: EPA
Date Data Arrived at EDR: 12/28/2018	Telephone: N/A
Date Made Active in Reports: 01/11/2019	Last EDR Contact: 12/28/2018
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/15/2019
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/12/2018	Source: EPA
Date Data Arrived at EDR: 12/28/2018	Telephone: N/A
Date Made Active in Reports: 01/11/2019	Last EDR Contact: 12/28/2018
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/15/2019
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/12/2018

Last EDR Contact: 01/04/2019  
Next Scheduled EDR Contact: 04/15/2019  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/12/2018

Data Release Frequency: Quarterly

## ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/13/2018	Source: EPA
Date Data Arrived at EDR: 12/28/2018	Telephone: 800-424-9346
Date Made Active in Reports: 01/11/2019	Last EDR Contact: 12/28/2018

## ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/01/2018	Source: EPA
Date Data Arrived at EDR: 03/28/2018	Telephone: 800-424-9346
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 12/03/2018
Number of Days to Update: 86	Next Scheduled EDR Contact: 04/08/2019
	Data Release Frequency: Quarterly

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (404) 562-8651
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 12/03/2018
Number of Days to Update: 86	Next Scheduled EDR Contact: 04/08/2019
	Data Release Frequency: Quarterly

## ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (404) 562-8651
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 12/03/2018

	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (404) 562-8651
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 12/03/2018
Number of Days to Update: 86	Next Scheduled EDR Contact: 04/08/2019
	Data Release Frequency: Quarterly

## RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (404) 562-8651
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 12/03/2018
Number of Days to Update: 86	Next Scheduled EDR Contact: 04/08/2019

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 10/17/2018	Source: Department of the Navy
Date Data Arrived at EDR: 10/25/2018	Telephone: 843-820-7326
Date Made Active in Reports: 12/07/2018	Last EDR Contact: 10/15/2018
Number of Days to Update: 43	Next Scheduled EDR Contact: 02/25/2019
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 07/31/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/28/2018	Telephone: 703-603-0695
Date Made Active in Reports: 09/14/2018	Last EDR Contact: 11/28/2018
Number of Days to Update: 17	Next Scheduled EDR Contact: 03/11/2019
	Data Release Frequency: Varies

### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 07/31/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/28/2018	Telephone: 703-603-0695
Date Made Active in Reports: 09/14/2018	Last EDR Contact: 11/28/2018
Number of Days to Update: 17	Next Scheduled EDR Contact: 03/11/2019
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal ERNS list***

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/24/2018

Date Data Arrived at EDR: 09/25/2018

Date Made Active in Reports: 11/09/2018

Number of Days to Update: 45

Telephone: 202-267-2180

Last EDR Contact: 01/08/2019

Next Scheduled EDR Contact: 04/08/2019

Data Release Frequency: Quarterly

## ***State- and tribal - equivalent CERCLIS***

SHWS: Florida's State-Funded Action Sites

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 02/01/2018

Date Data Arrived at EDR: 02/21/2018

Date Made Active in Reports: 04/09/2018

Number of Days to Update: 47

Source: Department of Environmental Protection

Telephone: 850-488-0190

Last EDR Contact: 11/21/2018

Next Scheduled EDR Contact: 03/04/2019

Data Release Frequency: Semi-Annually

## ***State and tribal landfill and/or solid waste disposal site lists***

SWF/LF: Solid Waste Facility Database

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 07/16/2018

Date Data Arrived at EDR: 07/18/2018

Date Made Active in Reports: 08/22/2018

Number of Days to Update: 35

Source: Department of Environmental Protection

Telephone: 850-922-7121

Last EDR Contact: 01/15/2019

Next Scheduled EDR Contact: 04/29/2019

Data Release Frequency: Quarterly

## ***State and tribal leaking storage tank lists***

LUST: Petroleum Contamination Detail Report

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

Date of Government Version: 10/16/2018

Date Data Arrived at EDR: 10/30/2018

Date Made Active in Reports: 12/05/2018

Number of Days to Update: 36

Source: Department of Environmental Protection

Telephone: 850-245-8839

Last EDR Contact: 10/30/2018

Next Scheduled EDR Contact: 02/11/2019

Data Release Frequency: Quarterly

LAST: Leaking Aboveground Storage Tank Listing

The file for Leaking Aboveground Storage Tanks. Please remember STCM does not track the source of the discharge so the agency provides a list of facilities with an aboveground tank and an open discharge split by facilities with aboveground tanks only and facilities with aboveground and underground tanks.

Date of Government Version: 10/29/2018

Date Data Arrived at EDR: 11/01/2018

Date Made Active in Reports: 12/05/2018

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### INDIAN UST R1: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 1 (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont and ten Tribal Nations).

Date of Government Version: 04/13/2018	Source: EPA, Region 1
Date Data Arrived at EDR: 05/18/2018	Telephone: 617-918-1313
Date Made Active in Reports: 07/20/2018	Last EDR Contact: 10/26/2018
Number of Days to Update: 63	Next Scheduled EDR Contact: 02/04/2019
	Data Release Frequency: Varies

### INDIAN UST R6: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 6 (Louisiana, Arkansas, Oklahoma, New Mexico, Texas and 65 Tribes).

Date of Government Version: 04/01/2018	Source: EPA Region 6
Date Data Arrived at EDR: 05/18/2018	Telephone: 214-665-7591
Date Made Active in Reports: 07/20/2018	Last EDR Contact: 10/26/2018
Number of Days to Update: 63	Next Scheduled EDR Contact: 02/04/2019
	Data Release Frequency: Varies

### INDIAN UST R7: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 7 (Iowa, Kansas, Missouri, Nebraska, and 9 Tribal Nations).

Date of Government Version: 04/24/2018	Source: EPA Region 7
Date Data Arrived at EDR: 05/18/2018	Telephone: 913-551-7003
Date Made Active in Reports: 07/20/2018	Last EDR Contact: 10/26/2018
Number of Days to Update: 63	Next Scheduled EDR Contact: 02/04/2019
	Data Release Frequency: Varies

### INDIAN UST R5: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 5 (Michigan, Minnesota and Wisconsin and Tribal Nations).

Date of Government Version: 04/12/2018	Source: EPA Region 5
Date Data Arrived at EDR: 05/18/2018	Telephone: 312-886-6136
Date Made Active in Reports: 07/20/2018	Last EDR Contact: 10/26/2018
Number of Days to Update: 63	Next Scheduled EDR Contact: 02/04/2019
	Data Release Frequency: Varies

### INDIAN UST R4: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 4 (Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee and Tribal Nations)

Date of Government Version: 05/08/2018	Source: EPA Region 4
Date Data Arrived at EDR: 05/18/2018	Telephone: 404-562-9424
Date Made Active in Reports: 07/20/2018	Last EDR Contact: 10/26/2018
Number of Days to Update: 63	Next Scheduled EDR Contact: 02/04/2019
	Data Release Frequency: Varies

### INDIAN UST R9: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 9 (Arizona, California, Hawaii, Nevada, the Pacific Islands, and Tribal Nations).

Date of Government Version: 04/10/2018	Source: EPA Region 9
Date Data Arrived at EDR: 05/18/2018	Telephone: 415-972-3368
Date Made Active in Reports: 07/20/2018	Last EDR Contact: 10/26/2018
Number of Days to Update: 63	Next Scheduled EDR Contact: 02/04/2019
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## INDIAN UST R10: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 10 (Alaska, Idaho, Oregon, Washington, and Tribal Nations).

Date of Government Version: 04/12/2018	Source: EPA Region 10
Date Data Arrived at EDR: 05/18/2018	Telephone: 206-553-2857
Date Made Active in Reports: 07/20/2018	Last EDR Contact: 10/26/2018
Number of Days to Update: 63	Next Scheduled EDR Contact: 02/04/2019
	Data Release Frequency: Varies

## TANKS: Storage Tank Facility List

This listing includes storage tank facilities that do not have tank information. The tanks have either be closed or removed from the site, but the facilities were still registered at some point in history.

Date of Government Version: 10/16/2018	Source: Department of Environmental Protection
Date Data Arrived at EDR: 10/30/2018	Telephone: 850-245-8841
Date Made Active in Reports: 12/05/2018	Last EDR Contact: 10/30/2018
Number of Days to Update: 36	Next Scheduled EDR Contact: 02/11/2019
	Data Release Frequency: Quarterly

## ***State and tribal institutional control / engineering control registries***

### ENG CONTROLS: Institutional Controls Registry

The registry is a database of all contaminated sites in the state of Florida which are subject to engineering controls. Engineering Controls encompass a variety of engineered remedies to contain and/or reduce contamination, and/or physical barriers intended to limit access to property. ECs include fences, signs, guards, landfill caps, provision of potable water, slurry walls, sheet pile (vertical caps), pumping and treatment of groundwater, monitoring wells, and vapor extraction systems.

Date of Government Version: 10/01/2018	Source: Department of Environmental Protection
Date Data Arrived at EDR: 10/02/2018	Telephone: 850-245-8927
Date Made Active in Reports: 10/29/2018	Last EDR Contact: 10/02/2018
Number of Days to Update: 27	Next Scheduled EDR Contact: 01/14/2019
	Data Release Frequency: Semi-Annually

### Inst Control: Institutional Controls Registry

The registry is a database of all contaminated sites in the state of Florida which are subject to institutional and engineering controls.

Date of Government Version: 10/01/2018	Source: Department of Environmental Protection
Date Data Arrived at EDR: 10/02/2018	Telephone: 850-245-8927
Date Made Active in Reports: 10/29/2018	Last EDR Contact: 10/02/2018
Number of Days to Update: 27	Next Scheduled EDR Contact: 07/16/2018
	Data Release Frequency: Semi-Annually

## ***State and tribal voluntary cleanup sites***

### INDIAN VCP R1: Voluntary Cleanup Priority Listing

A listing of voluntary cleanup priority sites located on Indian Land located in Region 1.

Date of Government Version: 07/27/2015	Source: EPA, Region 1
Date Data Arrived at EDR: 09/29/2015	Telephone: 617-918-1102
Date Made Active in Reports: 02/18/2016	Last EDR Contact: 12/19/2018
Number of Days to Update: 142	Next Scheduled EDR Contact: 04/08/2019
	Data Release Frequency: Varies

### INDIAN VCP R7: Voluntary Cleanup Priority Listing

A listing of voluntary cleanup priority sites located on Indian Land located in Region 7.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 03/20/2008  
Date Data Arrived at EDR: 04/22/2008  
Date Made Active in Reports: 05/19/2008  
Number of Days to Update: 27

## State and tribal Brownfields sites

### BSRA: Brownfield Site Rehabilitation Agreements Listing

The BSRA provides DEP and the public assurance that site rehabilitation will be conducted in accordance with Florida Statutes and DEP's Contaminated Site Cleanup Criteria rule. In addition, the BSRA provides limited liability protection for the voluntary responsible party. The BSRA contains various commitments by the voluntary responsible party, including milestones for completion of site rehabilitation tasks and submittal of technical reports and plans. It also contains a commitment by DEP to review technical reports according to an agreed upon schedule. Only those brownfield sites with an executed BSRA are eligible to apply for a voluntary cleanup tax credit incentive pursuant to Section 376.30781, Florida Statutes.

Date of Government Version: 08/23/2018  
Date Data Arrived at EDR: 10/02/2018  
Date Made Active in Reports: 12/19/2018  
Number of Days to Update: 78

Source: Department of Environmental Protection  
Telephone: 850-245-8934  
Last EDR Contact: 01/04/2019

Data Release Frequency: Varies

### BROWNFIELDS: Brownfields Sites Database

Brownfields are defined by the Florida Department of Environmental Protection (FDEP) as abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination.

Date of Government Version: 11/28/2018  
Date Data Arrived at EDR: 01/02/2019  
Date Made Active in Reports: 01/10/2019  
Number of Days to Update: 8

Source: Department of Environmental Protection  
Telephone: 850-245-8927  
Last EDR Contact: 01/02/2019  
Next Scheduled EDR Contact: 04/15/2019  
Data Release Frequency: Semi-Annually

### BROWNFIELDS AREAS: Brownfields Areas Database

A "brownfield area" means a contiguous area of one or more brownfield sites, some of which may not be contaminated, that has been designated as such by a local government resolution. Such areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency (EPA) designated brownfield pilot projects. This layer provides a polygon representation of the boundaries of these designated Brownfield Areas in Florida.

Date of Government Version: 11/27/2018  
Date Data Arrived at EDR: 01/02/2019

Data Release Frequency: Quarterly

## ADDITIONAL ENVIRONMENTAL RECORDS

### *Local Brownfield lists*

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/17/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/18/2018	Telephone: 202-566-2777

Next Scheduled EDR Contact: N/A  
Data Release Frequency: No Update Planned

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017

Data Release Frequency: Annually

## SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2009  
Date Data Arrived at EDR: 12/10/2010

Next Scheduled EDR Contact: 03/18/2019  
Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## FL Cattle Dip. Vats: Cattle Dipping Vats

From the 1910's through the 1950's, these vats were filled with an arsenic solution for the control and eradication of the cattle fever tick. Other pesticides, such as DDT, were also widely used. By State law, all cattle, horses, mules, goats, and other susceptible animals were required to be dipped every 14 days. Under certain circumstances, the arsenic and other pesticides remaining at the site may present an environmental or public health hazard.

Date of Government Version: 01/19/2017	Source: Department of Environmental Protection

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A

Data Release Frequency: No Update Planned

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

## GEOCHECK® - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

401 W GOVERNMENT STREET  
401 W GOVERNMENT STREET  
PENSACOLA, FL 32502

### TARGET PROPERTY COORDINATES

Latitude (North):	30.406884 - 30° 24' 24.78"
Longitude (West):	87.222939 - 87° 13' 22.58"
Universal Tranverse Mercator:	Zone 16
UTM X (Meters):	478585.8
UTM Y (Meters):	3363712.2
Elevation:	14 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map:	5653886 PENSACOLA, FL
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
12033C0390G	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
Not Reported	

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
PENSACOLA	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### **Site-Specific Hydrogeological Data\*:**

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
19	1/4 - 1/2 Mile ENE	SE
1G	1/4 - 1/2 Mile ENE	SE

For additional site information, refer to Physical Setting Source Map Findings.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

---

#### Soil Map ID: 1

Soil Component Name: Arents

Soil Surface Texture:  
Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 69 inches

No Layer Information available.

---

#### Soil Map ID: 2

Soil Component Name: Leon

Soil Surface Texture: sand

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information

5	64 inches	79 inches	sand	Granular materials (35 pct. or less passing No. 200), Fine Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 1.4	Max: 6.5 Min: 3.5

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### Soil Map ID: 3

Soil Component Name: Water

Soil Surface Texture: sand

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:  
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

### Soil Map ID: 4

Soil Component Name: Hurricane

Soil Surface Texture: sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 69 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetlands Inventory

Source: Department of Environmental Protection

Telephone: 850-245-8238

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Oil and Gas Permit Database

Source: Department of Environmental Protection

Telephone: 850-245-3194

Locations of all permitted wells in the state of Florida.

### Florida Sinkholes

Source: Department of Environmental Protection, Geological Survey

Telephone:

The sinkhole data was gathered by the Florida Sinkhole Research Institute, University of Florida.

## RADON

### State Database: FL Radon

Source: Department of Health

Telephone: 850-245-4288

Zip Code Based Radon Data

### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey.

The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

# **USER QUESTIONNAIRE RESPONSES**

### USER QUESTIONNAIRE

Pursuant to ASTM E1527, ASTM E2600, and the EPA All Appropriate Inquiry Rule, the User of the report must answer specific questions regarding the property and supply this information to the Environmental Professional. While we understand that you may have only limited knowledge of the property, please answer the questions to the best of your ability based on your current knowledge and return the completed questionnaire to PSI.

#### Phase I ESA Questions

1. Did a review of land title records (or judicial records where appropriate) identify any environmental cleanup liens filed or recorded against the subject property under federal, tribal, state or local law?  
 No     Yes     Unknown (if yes, please briefly discuss on the next page or as an attachment)
2. Did a review of land title records (or judicial records where appropriate) identify any activity and land use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state, or local law?  
 No     Yes     Unknown (if yes, please briefly discuss on the next page or as an attachment)
3. Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?  
 No     Yes (if yes, please briefly discuss on the next page or as an attachment)
4. Does the purchase price being paid reasonably reflect the fair market value of the subject property?  
 No     Yes     Not Applicable  

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?  
 No     Yes    *SEE #4*
5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:
  - (a) Do you know of the past uses of the property?  
 No     Yes (if yes, please briefly discuss on the next page or as an attachment)
  - (b) Do you know of specific chemicals that are present or were once present at the property?  
 No     Yes (if yes, please briefly discuss on the next page or as an attachment)
  - (c) Do you know of spills or other chemical releases that have taken place at the property?  
 No     Yes (if yes, please briefly discuss on the next page or as an attachment)
  - (d) Do you know of any environmental cleanups that have taken place at the property?  
 No     Yes (if yes, please briefly discuss on the next page or as an attachment)
6. Based on your knowledge and experience related to the subject property are there any obvious indicators that point to the presence or likely presence of contamination at the subject property?  
 No     Yes (if yes, please briefly discuss on the next page or as an attachment)
7. Do you know of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?  No     Yes (if yes, please briefly discuss on the next page or as an attachment)
8. Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?  
 No     Yes (if yes, please briefly discuss below or as an attachment)

**Vapor Encroachment Screening Questions**

1. Currently, what type of property is the subject property?  
 Commercial  Industrial  Residential  Multi-Tenant  Vacant Land
  
2. Are there buildings on the subject property?  
 Yes  No  Unknown (if yes, indicate number and construction type):  
 \_\_\_\_\_
  
3. Will buildings or structures be constructed on the subject property in the future?  
 Yes  No  Unknown (if yes, indicate number and construction type)  
PROBABLY
  
4. If buildings exist or are proposed, do/will they have elevators?  
 Yes  No  Unknown
  
5. What type of below-grade level exists or is proposed?  
 Full/Partial Basement  Crawl Space  Parking Garage  Multi-Level  
 None/Unknown (if none/unknown, skip to question 11)
  
6. Is there ventilation currently/proposed in the below-grade level?  
 Yes  No  Unknown
  
7. Are there sump pumps, floor drains or trenches existing or proposed in the below-grade level?  
 Yes  No  Unknown
  
8. Is there a radon or methane mitigation system installed or proposed?  
 Yes  No  Unknown (if yes, please indicate if passive or active): \_\_\_\_\_
  
9. What type of heating system exists or is proposed in the building? (check all that apply)  
 Hot Air Circulation  Hot Air Radiation  Hot Water Radiation  
 Hot Water Circulation  Fireplace  Radiant Floor Heat  Fuel Oil Furnace  
 Electric Baseboard  Heat Pump  Wood Stove  Steam Radiation  
 Coal Furnace  Kerosene Heater  Used Oil Heater  Natural Gas Furnace  
 Other N/A
  
10. How are the utility systems fueled/powered or proposed to be fueled/powered?  
 (check all that apply)  
 Natural Gas  Propane  Kerosene  Coal  Wood  Electricity  
 Fuel Oil  Solar  Wind  Other N/A
  
11. Have there ever been any environmental problems at the subject property?  
 Yes  No  Unknown (if yes, please describe)
  
12. Does/will a gas station or dry cleaner operate anywhere on the subject property?

**Helpful Documents Checklist**

Pursuant to ASTM E 1527 §10.8, do you know whether any of the following documents exist related to the subject property, and if so, whether copies will be provided to PSI for review? If so, please submit such documentation to PSI as soon as practical. Please check all that apply.

- Environmental site assessment reports (for example: Phase I/II ESAs or RBCA reports)
- Environmental compliance audit reports; or risk assessments
- Environmental permits or hazardous waste generation notices or reports
- Registrations for above or underground storage tanks, or underground injection systems
- Safety data sheets (formerly known as Material Safety Data Sheets or MSDSs)
- Community right-to-know plans; safety plans; preparedness and prevention plans; spill prevention, countermeasure and control (SPCC) plans; etc.
- Notices or other correspondence from any governmental agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens on the property
- Geotechnical studies; or reports regarding hydrogeologic conditions on the property or vicinity
- Recorded activity and land use limitations (AULs)

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by PSI, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## Ryan Parson

---

**From:** City of Pensacola Public Records Office <PensacolaFL@mycusthelp.net>  
**Sent:** Friday, January 25, 2019 9:18 AM  
**To:** Ryan Parson  
**Subject:** Public Records Request :: W002634-012319

--- Please respond above this line ---

01/25/2019

Dear Ryan Parson,

This letter responds to your public records request to the City of Pensacola, dated and received on 1/23/2019.

The City of Pensacola has reviewed its files and has determined there are no responsive records or documents to your request for public records.

Consider refining your request to provide better results. If you have any questions or require additional information please contact me directly at (850) 435-1715 or [publicrecords@cityofpensacola.com](mailto:publicrecords@cityofpensacola.com). Thank you for using the Sunshine Center.

Sincerely,

**Lysia H. Bowling**  
City Attorney  
Office of the City Attorney

222 W. Main Street  
Pensacola, FL 32502  
(850) 435-1715  
[publicrecords@cityofpensacola.com](mailto:publicrecords@cityofpensacola.com)

**For Non-Emergency Citizen Requests, Dial 311 or visit [Pensacola311.com](http://Pensacola311.com) [[u8387795.ct.sendgrid.net](mailto:u8387795.ct.sendgrid.net)]**

**NOTICE:** Florida has a very broad public records law. As a result, any written communication created or received by City of Pensacola officials and employees will be made available to the public and media, upon request, unless otherwise exempt. Under Florida law, email addresses are public records. If you do not want your email address released in response to a public records request, do not send electronic mail to this office. Instead, contact our office by phone or in writing.

City of Pensacola

## MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

**Warning:** Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service

Web Soil Survey URL:

Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Escambia County, Florida

Survey Area Data: Version 18, Sep 17, 2018

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jan 31, 2015—Mar 7, 2015

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

## 1.0 INTRODUCTION

Gallet & Associates (Gallet) was retained by the Emerald Coast Utilities Authority (ECUA) to conduct ground water monitoring within the methanol release area at the Main Street Wastewater Treatment Plant (WWTP) located at 401 West Government Street in Pensacola, Escambia County, Florida (Figure 1). Monitoring was conducted in accordance with the revised Monitoring Only Plan (MOP) submitted by Gallet on July 13, 2009. This report represents a summary of the methodology and findings of the Fall (September) 2009 Quarterly Monitoring Event conducted at the subject site. Previous sampling events conducted and reported under the MOP have included the following:

- Fall (October) 2004 Quarterly Sampling Event
- Winter (January) 2005 Quarterly Sampling Event
- Spring (April) 2005 Quarterly Sampling Event
- May 2005 Special Re-Sampling Event
- July 2005 Special Re-Sampling Event
- Spring (March) 2006 Quarterly Sampling Event
- Summer (July) 2006 Quarterly Sampling Event (Pre-Pumping [Manholes])
- Fall (September) 2006 Quarterly Sampling Event (Post-Pumping [Manholes])
- Winter (December) 2006 Quarterly Sampling Event
- Spring (March) 2007 Quarterly Sampling Event
- Summer (June) 2007 Quarterly Sampling Event
- Fall (September) 2007 Quarterly Sampling Event
- Winter (December) 2007 Quarterly Sampling Event (Pre-Pumping [MW-7])
- Spring (March) 2008 Quarterly Sampling Event (Post-Pumping [MW-7])
- Summer (June) 2008 Quarterly Sampling Event
- Fall (September) 2008 Quarterly Sampling Event
- Winter (December) 2008 Quarterly Sampling Event
- Spring (March) 2009 Quarterly Sampling Event
- Summer (June) 2009 Quarterly Sampling Event

As described in the Site Assessment Report Addendum (SARA) dated July 13, 2009, two additional wells (MW-9 and MW-10) were installed at the site in March 2009. The new wells were sampled for the first time during the Spring (March) 2009 quarterly sampling event. The revised Monitoring Only Plan (submitted with the Spring 2009 Report) recommended that MW-9 and MW-10 be added to the list of wells that are sampled quarterly. MW-9 will serve as a downgradient well, and MW-10 will serve as an upgradient well. It was also recommended that wells MW-3 and MW-5 be eliminated from the quarterly monitoring efforts; no detectable levels of methanol had been detected in either well during the previous six sampling events. In a subsequent review letter from Florida Department of Environmental Protection (FDEP) dated December 15, 2009, FDEP requested that MW-5 not be eliminated from the quarterly monitoring efforts. Therefore, MW-5 will be added back to the quarterly sampling list in the Spring (March) 2010 sampling event.

Approximately 2,100 gallons of alum (hydrous aluminum sulfate) were accidentally released from a break in the fill line at the alum storage tank on January 16, 2009. Following the release, ECUA personnel excavated the area of impacted soil down to 1 ft bls, and placed the soil in a covered container. Powdered lime was added to the excavated soil to neutralize the pH, and approximately 33 tons of soil were transported to the Perdido Landfill for disposal. ECUA personnel also added powdered lime to the excavated area and then backfilled the area with soil from a nearby stockpile.

Due to the potential for adverse impacts to the shallow ground water on-site related to the alum release, Gallet proposed that additional ground water sampling and analysis be conducted on-site in conjunction with the ongoing quarterly ground water methanol monitoring program. It was proposed that one downgradient well (MW-8) and one upgradient well (MW-2) be sampled on a quarterly basis for a period of one year, starting with the Spring (March) 2009 quarterly sampling event. Note that downgradient well MW-9 was sampled during this event rather than MW-2, because MW-9 was closer and more directly downgradient of the source area than MW-2. The ground water samples were analyzed for field parameters and constituents of potential concern (aluminum and sulfate). The Fall (September) 2009 sampling event represents the third consecutive quarterly ground water sampling for alum-related constituents at MW-8 and the first quarterly sampling at MW-9.

## 2.0 METHODOLOGY

Monitor well locations are depicted on Figure 2, and monitor well construction details are provided in Table 1. Prior to sampling, water level measurements were collected from all ten on-site monitor wells. Monitor wells MW-1, MW-4, MW-6D, MW-7, MW-8, MW-9, and MW-10 were purged, sampled, and analyzed for the following constituents:

- Standard field parameters (pH, temperature, conductivity, turbidity, D.O., and redox).
- Methanol per Method SOP 641/8015M.

In addition to the monitor wells listed above, manholes C9, C10, P9, and P10 were sampled and analyzed for the constituents listed above.

Ground water samples from monitor wells MW-8 and MW-9 were also analyzed for the following constituents as part of the alum spill monitoring plan:

- Total and Dissolved Aluminum per EPA Method 6010B.
- Sulfate per EPA Method 375.4.

Sampling was performed on September 9 and 10, 2009 by RDH Environmental, Inc., a qualified environmental sampling firm headquartered in Cantonment, Florida. Water quality analyses were performed by Environmental Science Corporation, a Florida-licensed water quality analytical laboratory located in Mt. Juliet, Tennessee. Sampling and laboratory analyses were completed under the provisions of FDEP Standard Operating Procedures (SOPs).

### 3.0 FINDINGS

Water level measurements (current and historic) are summarized in Table 2A (monitor wells) and Table 2B (manholes). Depth to water measurements in the wells ranged from about 5.39 feet to 7.70 feet below land surface. The ground water elevations rebounded slightly from the near-historic lows recorded during the June 2009 sampling event. A ground water flow map from the recent measurement event is provided in Figure 3. The direction of ground water flow is predominantly to the east/southeast. As stated in previous reports, the direction of shallow ground water flow at the site is likely to be affected by the numerous underground utilities, buried foundations, and storm drains at the site. The hydraulic gradient within the study area is approximately 0.002 feet per foot (measured from MW-10 to MW-5).

The ground water analytical results are summarized in Table 3 (field parameters and methanol) and Table 4 (aluminum and sulfate). Copies of the laboratory reports are provided in Appendix A.

#### **3.1 Monitor Wells**

Field parameters determined during sampling included pH, electrical conductivity, temperature, dissolved oxygen, redox potential, field turbidity, colors, and sheens. Values for pH in the seven wells ranged from 5.8 (MW-6D) to 6.5 (MW-10). Conductivity values ranged from 198  $\mu\text{mhos/cm}$  (MW-4) to 1,267  $\mu\text{mhos/cm}$  (MW-7). Temperature values varied from 25.7°C to 29.7°C in all seven sampled wells. Dissolved oxygen in the seven wells ranged from 0.06 mg/l (MW-1, MW-7, & MW-10) to 0.24 mg/l (MW-6D). Redox varied from -160 millivolts (mV) in MW-7 to -30 mV in MW-6D. Field turbidity values ranged from <1 NTUs (MW-6D) to 18 NTUs (MW-1).

Methanol was not detected in any of the ground water samples collected during this sampling event. Methanol at MW-1 decreased relative to the results from the Summer (June) 2009 sampling event, falling from 1,400 mg/l to below the laboratory detection limit. This is the first time that methanol has been below the laboratory detection limit at MW-1 since sampling began in March 2003. The current Groundwater Cleanup Target Level (GCTL per Florida Administrative Code Chapter 62-777 Table I) for methanol is 3.5 mg/l.

Methanol at MW-7 decreased relative to the previous sampling event and was also below the laboratory detection limit. Methanol has not been detected at MW-4 since June 2007 and at MW-8 since March 2008. Methanol has not been detected at MW-9 and MW-10 since sampling began in March 2009.

Figure 4 represents a graph of methanol concentrations and ground water elevations versus time in MW-1. No obvious correlations are noted between methanol concentration and ground water elevation. Methanol concentrations did temporarily decrease in MW-1 following the manhole pumping effort in August 2006. Methanol concentrations temporarily rose in MW-1 immediately following the February/March 2008 pumping effort at MW-7, but then fell during the subsequent sampling event (June 2008).

Total and dissolved aluminum concentrations measured in MW-8, located upgradient from the alum release area (see Figure 2), were 0.054 mg/l and 0.034 mg/l. Total and dissolved aluminum concentrations measured in downgradient well MW-9 were 0.12 mg/l and 0.036 mg/l, respectively. The secondary drinking water standard for aluminum is 0.20 mg/l.

Sulfate concentrations in the two sampled monitor wells were 1.2 mg/l in MW-9 and 200 mg/l in MW-8. The Secondary Drinking Water Standard (SDWS) for sulfate is 250 mg/l.

The pH values in MW-8 and MW-9 were 6.3 and 6.4, respectively. Values for pH in all seven sampled wells on-site ranged from 5.8 to 6.5.

### 3.2 Manholes

Values for pH in the four sampled manholes ranged from 6.0 (C9) to 6.9 (P9). Conductivity values ranged from 314  $\mu$ mhos/cm (P9) to 2,581  $\mu$ mhos/cm (C9). Temperatures ranged from about 30.8°C to 31.5°C in the four sampled manholes. Dissolved oxygen in the manholes ranged from 1.1 mg/l (C9 & C10) to 2.1 mg/l (P9). Redox potential values varied from -110 mV in C9 to -179 mV in P10. Field turbidity values ranged from 5 NTUs (P9) to 135 NTUs (C9).

Methanol was below the laboratory detection limit in all four sampled manholes. This represents a significant decrease relative to the Summer (June) 2009 sampling results at C9 and C10 (1,800 mg/l and 1,700 mg/l). No detectable concentrations of methanol have been measured in manholes P9 and P10 for the last tenth and eighth quarters in a row, respectively.

## 4.0 CONCLUSIONS AND RECOMMENDATIONS

The conclusions of the Fall (September) 2009 Quarterly Monitoring Event are summarized as follows:

- Water level measurements taken in September 2009 indicate a predominant east/southeasterly ground water flow direction. Depth to water measurements in the wells ranged from about 5.39 feet to 7.70 feet below land surface. The ground water elevations rebounded slightly from the near-historic lows recorded during the June 2009 sampling event. The hydraulic gradient within the study area is approximately 0.002 feet per foot (measured from MW-10 to MW-5).
- Methanol was below the laboratory detection limit in all of the ground water samples collected from the monitor wells. This is the first time since sampling began in March 2003 that methanol has not been detected in near-source well MW-1.
- Methanol was also below the laboratory detection limit in all four of the sampled manholes. This represents a significant decrease relative to the Summer (June) 2009 sampling results at C9 and C-10. No detectable concentrations of methanol were measured in manholes P9 and P10 for the tenth and eighth quarters in a row, respectively.

- Total aluminum concentrations measured in upgradient well MW-8 and downgradient well MW-9 were 0.054 mg/l and 0.12 mg/l, respectively. Sulfate concentrations in the two sampled monitor wells were 1.2 mg/l in MW-9 and 200 mg/l in MW-8. The pH concentrations in MW-8 and MW-9 were 6.3 and 6.4, respectively.
- Based upon the ground water data in this report, there is no current evidence of methanol impacts in the sampled wells or manholes. Furthermore, there is no evidence that the recent alum spill has had a significant impact on the ground water quality on-site.

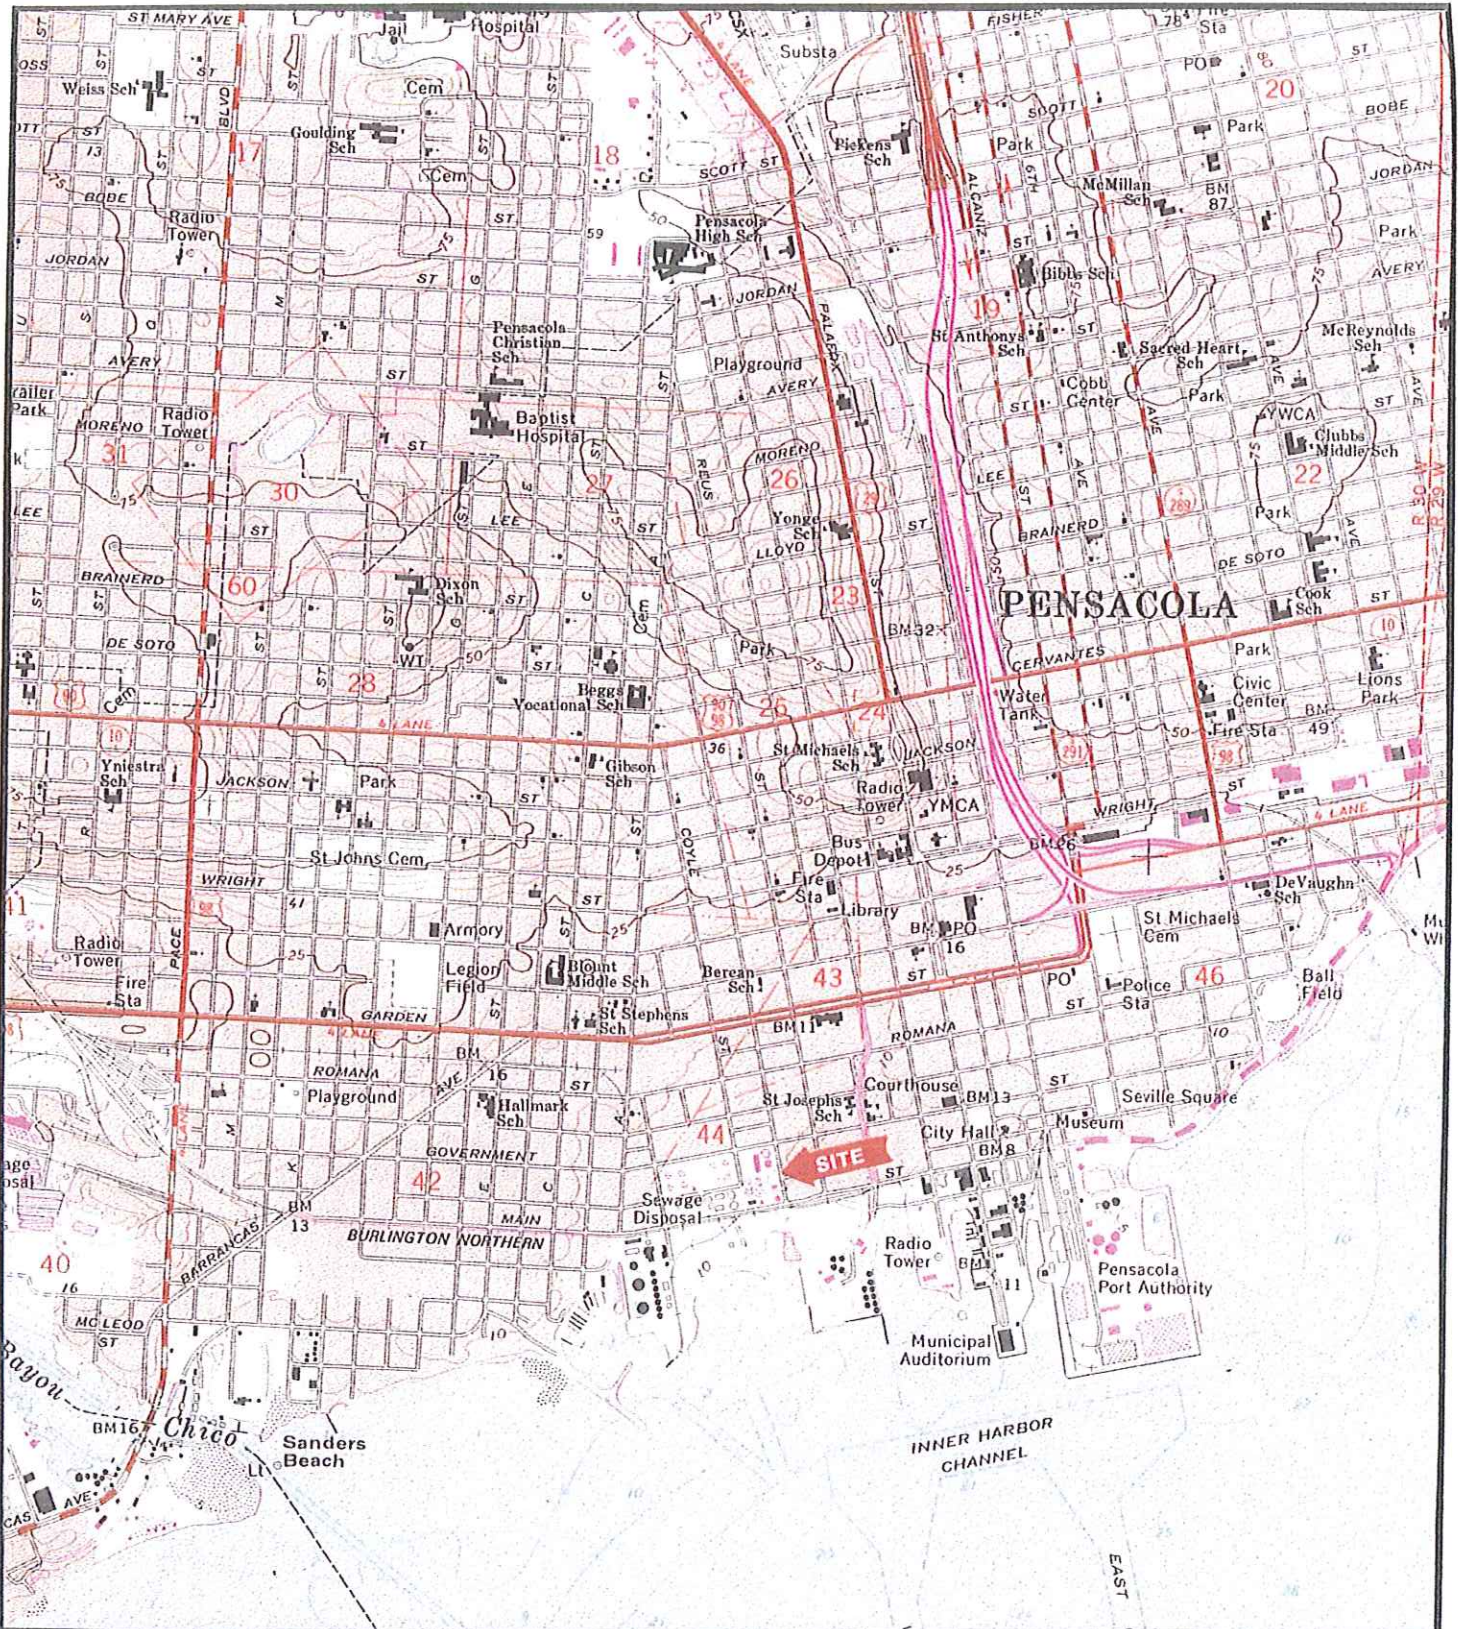

The following recommendations are provided.

- Routine quarterly monitoring for methanol should continue to include the following sampling locations:
  - Monitor Wells: MW-1, MW-4, MW-5 (starting Spring 2010), MW-6D, MW-7, MW-8, MW-9, & MW-10.
  - Manholes: C9, C10, P9, & P10.
- Monitor wells MW-2 (or MW-9) and MW-8 should be sampled for one additional quarter and analyzed for aluminum (total and dissolved) and sulfate to monitor any potential adverse effects from the alum spill.

The Winter (December) 2009 quarterly monitoring event was recently completed. The report is forthcoming, and further recommendations are provided therein.

Attachment A  
List of Analytes with QC Qualifiers

Sample Number	Work Group	Sample Type	Analyte	Run ID	Qualifier
I421772-11	WG440833	SAMP	Aluminum	R905169	UI
L421772-12	WG441046	SAMP	Aluminum, Dissolved	R903368	UI
	WG440571	SAMP	Sulfate	R900788	UI

Attachment B  
Explanation of QC Qualifier Codes

Qualifier	Meaning
UI	(EPA) - Estimated value below the lowest calibration point. Confidence correlates with concentration.

Qualifier Report Information

ESC utilizes sample and result qualifiers as set forth by the EPA Contract Laboratory Program and as required by most certifying bodies including NELAC. In addition to the EPA qualifiers adopted by ESC, we have implemented ESC qualifiers to provide more information pertaining to our analytical results. Each qualifier is designated in the qualifier explanation as either EPA or ESC. Data qualifiers are intended to provide the ESC client with more detailed information concerning the potential bias of reported data. Because of the wide range of constituents and variety of matrices incorporated by most EPA methods, it is common for some compounds to fall outside of established ranges. These exceptions are evaluated and all reported data is valid and useable unless qualified as 'R' (Rejected).

Definitions

- Accuracy - The relationship of the observed value of a known sample to the true value of a known sample. Represented by percent recovery and relevant to samples such as: control samples, matrix spike recoveries, surrogate recoveries, etc.
- Precision - The agreement between a set of samples or between duplicate samples. Relates to how close together the results are and is represented by Relative Percent Difference.
- Surrogate - Organic compounds that are similar in chemical composition, extraction, and chromatography to analytes of interest. The surrogates are used to determine the probable response of the group of analytes that are chemically related to the surrogate compound. Surrogates are added to the sample and carried through all stages of preparation and analyses.
- TIC - Tentatively Identified Compound: Compounds detected in samples that are not target compounds, internal standards, system monitoring compounds, or surrogates.

## SAMPLE NON-CONFORMANCE FORM

Sample No. : LY21772

Date: 9-11-09

Evaluated by: Troy K

Client: GALLFL

### Non-Conformance (check applicable items)

- Chain of Custody is missing
- Login, Clarification Needed
- Improper container type
- Improper preservation
- Chain of custody is incomplete
- Container lid not intact
- Parameter(s) past holding time
- Improper temperature
- Broken container(s) see below
- Broken container: sufficient sample volume remains for analysis requested
- Insufficient packing material around container
- Insufficient packing material inside cooler
- Improper handling by carrier (FedEx / UPS / Courier)
- Sample was frozen

Comments: Received 2 vials for MW-9.

#### **Professional Experience**

Ms. Battaglia is an Environmental Scientist in the Pensacola office, with over ten years of experience in providing advanced environmental services in both Florida, Alabama, and Mississippi. This experience is wide ranging and primarily includes assessment/site characterization and remediation/treatment of petroleum, solvent, metal, and pesticide impacts in groundwater and soil. Additionally, Ms. Battaglia is proficient in conducting Phase I and Phase II Environmental Site Assessments (ESAs), Tank Closure Assessments, and groundwater monitoring activities.

Ms. Battaglia has experience conducting Spill Prevention, Control, and Countermeasure (SPCC) site visits and developing SPCC Plans. She also has experience developing Stormwater Pollution Prevention Plans (SWPPPs) for industrial facilities nationwide and is practiced in assisting facilities with meeting their Multi-Sector Generic Permit requirements including quarterly and annual stormwater discharge monitoring and sampling.

As a Registered Professional Archaeologist, Ms. Battaglia has 10 years of experience assisting clients with the identification of cultural occurrences within project areas through Cultural Resources Background Reviews and intensive surveys including Archaeological Assessment Surveys and Cultural Resources Assessment Surveys (CRASs).

#### **Representative Phase I ESA Project Experience**

- CPH Engineers, Proposed Grocery & Gas Store, Crestview, FL-Project Manager-29.64 acres of undeveloped property historically used as a farm and residence. Completed Endangered Species and Wetlands Desktop Reviews.
- Hemmer Consulting, Inc., Escambia County School District Properties; Pensacola, Florida-Project Manager- 2.6 acres of vacant property historically used as a residence in the late 1800's, then as a service station, fire station, school, and USO facility.

- Western Capital Management Corp., Mobile Press Register; Mobile, Alabama – Project Manager-Former Mobile Press Register building constructed in 1920 and totaling 56,911 square feet.
- City of Ft. Walton Beach, Florida, Eight Properties; Ft. Walton Beach, Florida-Project Manager-53.10 acres of city owned property located on Hollywood Blvd. and Sotir Street.
- West Florida Regional Planning Council; Bay County Maintenance Facility; Panama City, Florida-Project Manager-6.5 acres of land historically used as a prison by Panama City that transitioned to use as a maintenance facility.
- YB Development, LLC, Blue Angel Parkway; Pensacola, Florida – Project Manager-2.79 acres of undeveloped property that was used as a historic period cemetery and as a temporary camp site by prehistoric Native Americans.

### **Representative Phase II ESA Project Experience**

- Gross & Son Paint and Body Shop, Pensacola, FL-Project Manager-Assessment of soil and groundwater at paint and body shop that began operations in late 1940's.
- John S Carr & Associates, Former Advanced Auto Center; Pensacola, Florida-Project Manager-Assessment of soil and groundwater at former automotive repair and maintenance facility.
- YB Development, LLC, Blue Angel Parkway; Pensacola, Florida-Project Manager-Late 1800's cemetery, conducted GPR Survey to identify unmarked burials and assessed soil and groundwater at site.
- SuperValu, Inc., Former Albertsons Fuel Center; Pensacola, Florida-Project Manager-assessed soil in vicinity of existing tanks, piping, and dispensers.
- Hemmer Consulting, LLC, Escambia County School District Properties; Pensacola, Florida-Project Manager-Assessed soil and groundwater for nine areas of concern that included automotive maintenance and repairs, heating oil tanks, fuel tank for fire station, and printing facility.
- First Choice Property and Development, Fred's Retail; multiple locations throughout Alabama-Project Manager-Assessed groundwater and soil based on historic uses identified as RECs for multiple properties.

### **Representative Advanced Environmental Project Experience**

- Escambia County School District, SW Corner of Spring & Garden Street; Pensacola, Florida-Project Manager-GPR Surveys, Tank Closure and Assessments, soil and groundwater assessments, structure demolition, and source removal activities.
- Albertsons, LLC, Former Albertsons Express #4475, Pensacola, FL-Project Manager-Tank Closure Assessment and Structure Demolition activities.
- John S. Carr & Associates, Former Advanced Auto Center; Pensacola, Florida-Project Manager-Removal of eight (8) hydraulic lifts and reservoirs, soil and groundwater assessment, and source removal activities.
- Florida Department of Environmental Protection, Star Paper Tube; Cantonment, Florida-Project Manager-Soil assessment, ET-DSP In-Situ Thermal Remediation System Installation and O&M.
- West Florida Healthcare; Pensacola, Florida-Project Manager-Groundwater assessment, chemical injection, source removal activities.
- Florida Department of Environmental Protection, Former BP Station; Pensacola, Florida-Project Manager-SVE/AS System Installation/Start-up, SVE/AS System O&M.

**Representative SPCC and SWPPP Project Experience**

- U.S. Foodservice, facilities in Florida, Alabama, South Carolina, Virginia, Maryland, Kansas, Texas, Georgia, Missouri, Utah, and Colorado-Project Manager-conducted site visits and prepared SPCC/SWPPP Plans.
- Embry Riddle Aeronautical University, Daytona, Florida-Project Manager-conducted site visit and prepared SPCC Plan.
- Sandvik Mining, Alachua, Florida-Project Manager-conducted site visit and prepared SPCC Plan.
- Pensacola Regional Airport, Pensacola, Florida-Project Manager-conducted site visit and prepared SWPPP, assisted client in meeting stormwater permit requirements.
- Port of Pensacola, Pensacola, Florida-Project Manager-conducted site visit, prepared SWPPP, assisted client with regulatory SWPPP inspections and meeting stormwater permit requirements.

**Representative Cultural Resources Management Project Experience**

- Walton Texas, L.P., Browning Ranch, Liberty Hill, Texas-Principal Investigator-Cultural Resources Background Review for 681-acre property.
- Jacobs, Widows Creek, Jackson County, Alabama-Principal Investigator-Cultural Resources Background Review for 111-acre property owned by Tennessee Valley Authority.
- Escambia County School District, SW Corner of Spring & Garden Streets; Pensacola, Florida-Principal Investigator-Construction Monitoring Services associated with late 1800's residence.
- YB Development, LLC, Blue Angel Parkway, Pensacola, Florida-Principal Investigator-Phase II Cultural Resources Assessment of late 1800's African American cemetery and Prehistoric Native American temporary camp site.
- University of West Florida, Forest and Lakes Plantation; Ebro, Florida-Supervisor-Phase I, Phase II Cultural Resources Assessments of 56,000 acre pine plantation.
- University of West Florida, UWF Greek Housing/Student Groups Village; Pensacola, Florida-Supervisor of Phase I Cultural Resources Assessment.
- Dade County Industrial Development Authority, Dade County Industrial Park; Trenton, Georgia-Principal Investigator-Cultural Resources Background Review.

as set forth in 40 CFR §312.10**

**January 25, 2016**

---

Chief Technical Officer

**Year started with PSI:** **2017**

**Years experience with other firms:** **< 1 year - Internship**

#### **Education**

- M.S. Environmental Science – University of West Florida, 2017
- B.S. Marine Biology – University of Southern Mississippi, 2008

#### **Certifications/Registrations/Technical Training**

- OSHA 40 Hr HAZWOPER Training (29 CFR 190.120)
- Current OSHA HAZWOPER 8 Hr Refresher
- OSHA 10 Hr Construction Safety and Health

#### **Affiliations/Memberships**

- Northwest Florida Association of Environmental Professionals

#### **Professional Experience**

Mr. Parson is an Environmental Scientist/Project Manager in the Pensacola office with one year of experience in providing environmental services in Florida and Alabama.

#### **Representative Phase I ESA Project Experience**

- Former Escambia Wood Treating Superfund Site, Pensacola, FL – Project Manager – Two parcels of land totaling 16.19 acres of undeveloped property historically used as a wood creosote treating facility, resulting in severe soil and groundwater impacts, and became a Superfund cleanup site.
- Captain D's, LLC, Crestview, FL – Site Assessor -- 1.15 acres of property with an approximately 2,456 square foot restaurant located on South Ferdon Boulevard.
- Destin Surgery Center, Destin FL – Site Assessor – 1.64 acres of property developed with an approximately 19,420 total square foot medical facility located on Furling Lane.

#### **Representative Advanced Environmental Project Experience**

- West Florida Hospital Drinking Water Quality Sampling & Analysis, Pensacola, FL – Project Manager – Collects drinking water samples from various locations to perform analytical analysis, including lead, copper, total coliform, and *E. Coli* on a quarterly basis.
- Proposed Collegiate Housing Arsenic Background Investigation, Tallahassee, FL – Environmental Technician - Conducted arsenic background soil sampling activities to evaluate if arsenic concentrations identified previously, represent a discharge/release as defined by FDEP.
- Florida Department of Environmental Protection, National Standard Parts, Pensacola, FL – Environmental Technician – Groundwater assessment.

- Indiana Geologists
- IndyCREW

**Professional Experience**

Ms. St. Peter's experience includes project management and coordination of Phase I/II/III Environmental Site Assessments (ESAs), soil contamination and remediation, hydrogeologic investigations, underground storage tank (UST) site investigations, RCRA closures, asbestos surveys, environmental compliance audits, indoor air studies, storm water permitting, and site remediation. Her responsibilities have included management of district offices for two environmental consulting firms, project assignment and scheduling, data interpretation, coordination of fieldwork, proposal and report writing, maintaining good client relationships and dealing with regulatory agencies. Experience includes 23 years in the consulting industry serving municipal, government and private clients, both commercial and industrial. Industries served include the State of Indiana, industrial firms, petroleum service stations, property developers, lending institutions and law firms. She has broad project experience with both private sector and municipal clients on sites involving impact to soil and groundwater by a variety of metals, organic solvents, pesticides, petroleum hydrocarbons, and hazardous wastes. As a Principal Consultant, she participates in cost estimate development, technical performance, and technical review of a variety of projects undertaken by PSI.

---

### **Representative Asbestos Surveys Project Experience**

- Developer – Apartment complex in Indianapolis, Indiana – Project Manager: Conducted asbestos survey.
- Realtor – Fishers, Indiana – Project Manager: Conducted asbestos survey prior to demolition of building.
- Developer – Greenwood, Indiana – Project Manager: Managed an asbestos survey on several structures prior to demolition and development of the property.
- Commercial Realtor – Downtown Indianapolis, Indiana – Project Manager: Managed asbestos survey at industrial warehouse.
- State of Indiana – Richmond, Indiana – Project Manager: Conducted asbestos survey at hospital.
- Retail Stores - Various locations: Conducted asbestos surveys at retail facilities throughout Indiana.

### **Representative Indoor Air Quality/Mold Project Experience**

- Anderson Community Schools – Anderson, Indiana – Project Manager: Coordinated, sampled and evaluated the indoor air for microbial spores at a newly constructed school.
- Metropolitan School District of Pike Township – Indianapolis, Indiana – Project Manager: Conducted, sampled and evaluated the indoor air for fungal/mold spores following a water intrusion event at the school.
- Elementary School – Lebanon, Indiana – Project Manager: Coordinated, sampled and evaluated the indoor air for bacteria, fungi/mold, and various chemicals of concern following replacement of the HVAC system.
- High School – Crawfordsville, Indiana – Project Manager: Coordinated, sampled and evaluated the indoor air for bacteria, fungi/mold, and various chemicals of concern following replacement of the HVAC system.
- County Hospital – Greensburg, Indiana – Project Manager: Coordinated, sampled and evaluated the indoor air quality following personnel complaints of respiratory problems.
- Dialysis Center – Fort Wayne, Indiana – Project Manager: Coordinated, sampled and evaluated the indoor air for fungi/mold spores.

### **Representative Phase I/II Environmental Site Assessments Project Experience**

- Developers/Banks/Private/Telecommunications – Indiana/Ohio/Illinois/Kentucky/Michigan/Florida/California – Project Manager: Performed Phase I ESA's on various size properties.
- Commercial – Indianapolis, Indiana – VRP Site – Project Manager: Coordinated Phase I ESA, Phase II subsurface investigation, monitoring well installations, quarterly sampling and development of remedial work plan. Submitted claims for reimbursement through State Excess Liability Trust Fund (ELTF).
- Commercial – Frankfort, Indiana – VRP Site – Project Manager: Planned and managed Phase II/II activities, quarterly monitoring and development of remedial work plan, soil excavation coordination, and NFA closure with ERC.
- State of Indiana – Department of Public Works – Westville, Indiana – Project Manager: Coordinated groundwater investigation to determine source of lead in potable water and conducted RCRA closure of hazardous waste storage areas.
- State of Indiana – Department of Administration – Indianapolis, Indiana State Hospital – Project Manager: Conducted Phase I ESA on 225 acre mental hospital facility.
- State of Indiana – Department of Public Works – Richmond, Indiana – Project Manager: Coordinated indoor air sampling at city hospital.
- Commercial – Indianapolis, Indiana – Project Manager: Conducted Phase I ESA and Phase II subsurface investigation at former dry cleaner facility.

---

**Representative Regulatory Compliance Audits Project Experience**

- State Correctional Facility – Westville, Indiana – Project Manager for RCRA compliance review of environmental issues including: hazardous waste management, SPCC plan, Clean Air Act, Clean Water Act, and Emergency Planning and Community Right to Know Act.

**Representative Petroleum Storage Tank Closures Project Experience**

- Commercial – Richmond, Indiana – Project Manager for Phase II subsurface investigation and UST closures at commercial facility.
- Gasoline Service Stations – Indianapolis, Indiana – Project Manager for UST closure assessments at various gasoline/convenience stations in Indianapolis and the surrounding area, under IDEM guidelines.
- Truck Stop – Daleville, Indiana – Project geologist during removal of USTs and installation of soil vapor extraction system.
- Former Service Stations – Indianapolis, Indiana – Project Manager: Managed Phase I ESAs, Phase II subsurface investigations at various former service stations, soil excavation and sampling, groundwater monitoring, site closure with ERC.
- State of Indiana – Oolitic, Indiana – Project Geologist: Addressing petroleum vapors in homes. Participated in installation of venting equipment for the storm water system.

**Representative Petroleum Phase III Environmental Site Assessments Project Experience**

- Law Firm – Frankfort, Indiana – Project Manager for delineation of hydrocarbon plume in soil and groundwater. Development of Remedial Work Plan.
- Law Firm – Indianapolis, Indiana Brownfield – Project Manager for Phase III investigation to delineate soil impact and install monitoring wells at former chemical facility.
- Service Stations – Central Indiana – Project Manager for development of corrective action plans for various impacted sites.
- Commercial – Indianapolis, Indiana – Project Manager for delineation of impacted soil and installation of monitoring wells at former chemical plant.

**Representative Petroleum Remedial Design Project Experience**

- Truck Stop – Daleville, Indiana – Participated in design and O&M plans of soil vapor extraction system.
- Industrial – Northern Ohio-Project geologist for design, installation and monitoring of soil vapor extraction system.
- Auto Dealership – Frankfort, Indiana – Project Manager for delineation of soil impact and installation of monitoring wells, quarterly monitoring, development of remedial work plan.

**Representative Petroleum Remediation/Construction Project Experience**

- Truck Stop – Daleville, Indiana – Participated in design and O&M plans of soil vapor extraction system.
- Industrial – Northern Ohio-Project geologist for design, installation and monitoring of soil vapor extraction system.
- Richmond, Indiana – Project managed the excavation of impacted soils, confirmation sampling and closure for Brownfield site.

**Representative Hazardous Waste Phase III Environmental Site Assessment Project Experience**

- State of Indiana – Department of Administration – Westville, Indiana – Project Manager for development of sampling plan and RCRA closure of two hazardous waste storage areas.
- Industrial – Indianapolis, Indiana – Project Manager: Managed cleanup of industrial site including disposal of hazardous waste.

---

**Representative Groundwater Monitoring Project Experience**

- Northern and Central Indiana Landfills – Project Manager for development of groundwater monitoring system at several Indiana landfills, well installations and quarterly sampling.
- Auto Dealership – Indianapolis, Indiana – Project Manager for quarterly monitoring at VRP site.
- Auto Dealership – Frankfort, Indiana – Project Manager for groundwater well installations and quarterly monitoring at VRP site.

**Representative Environmental Permitting Project Experience**

- Commercial – Central Indiana – Project Manager: Managed NPDES permitting for several facilities. Prepared Storm Water Pollution Prevention Plans (SWPPP) for medium-sized industrial facilities.
- Commercial – Indianapolis, Indiana – Project Manager: Managed environmental compliance audit and advised client on required permitting for facility.
- Commercial - Central Indiana - Project Manager: Developed SPCC plans for various commercial properties.

**Representative Geophysical Assessments Project Experience**

- Commercial – Indianapolis, Indiana – Project Geologist for geophysical surveys to locate USTs or former tank pits/pump islands, prior to further re-development of the site.

**Representative RCRA/CERCLA RI/FS, RD, RA Project Experience**

- State of Indiana – Department of Administration – Westville, Indiana – Project Manager for conducting RCRA compliance audit, and development of sampling plan for RCRA closure of two hazardous waste storage areas.

**Representative Expert Witness/Litigation Project Experience**

- Former Service Station – Danville, Indiana – Project Geologist who gave expert witness testimony in civil case concerning source of soil contamination.

**Representative Large Contract/Program Management Project Experience**

- State of Indiana – Westville, Indiana – Conducted RCRA compliance audit, development of Environmental Management Plan, conducted investigation of groundwater system to determine source of lead in drinking water, development of sampling plan for closure of two hazardous waste storage areas.
- State of Indiana – Indianapolis, Indiana – Project Manager: Managed a Phase I ESA at a 225 acre former hospital facility. Issues encountered included unknown hazardous waste storage, USTs, ASTs, asbestos containing materials, lead-based paint issues, mold issues, burial of medical wastes, potential PCB oils and historic buildings.
- Re-development of former gasoline station site – Project Manager: Managed the site investigations and cleanup of former gasoline stations prior to the re-build of the site at various locations in Indiana.
- Telecommunication Sites – Indiana, Kentucky, Ohio, Illinois, Michigan – Program Manager/Coordinator for numerous projects involving Phase I ESAs, NEPA evaluations (including SHPO inquiries), Archaeological Surveys and/or Soil Resistivity Testing for multiple clients.
