REQUEST FOR INFORMATION

Date: December 5, 2019

The City of Myrtle Beach is interested in obtaining information about available products to initiate a transition towards a new series of solid waste receptacles along our vibrant, beachfront corridor (Ocean Boulevard) and neighboring Arts & Innovation District. If you would like to participate by providing the requested information (without pricing), please return this form with any attachments to asowers@cityofmyrtlebeach.com, **NO LATER THAN 2:00PM on Friday, December 12, 2019**. Additional pages may be attached to answer each question completely. If you have any questions, please call 843-918-2172.

1. What product(s) has your company sold to similar beachfront communities, and what unique features made the selected product(s) successful? (You may include specification sheets for each product in addition to your description, but do **not** send a full product-line catalog.)

2. How would you determine the most durable product given our coastal environmental conditions?

3. Is there a potential to integrate aesthetic branding and/or advertising on the solid waste receptacles? If so, please attach some examples.

4. Is there an advantage to pair recycling and/or trash receptacles into a combined-use unit? If so, where and in what intended area(s) of use have you sold these units?

5. What are the most popular aesthetic options available?

6. Given the hot summer season, how would you measure the ability of the solid waste receptacles to control odors?

7. In terms of serviceability, what are the ideal ergonomic and container cleanliness features available that support employee and community health?

8. What are the most common fabrication lead times and delivery schedules for the products?
