## ***CEW Taxiway Pavement Seal Coat and Pavement Marking Scope of Work***

Version 2.0

March 13, 2024

Okaloosa County Airports

Crestview, FL

RS&H Project No.: 1048-1915-014

Prepared by RS&H, Inc. at the  
direction of Okaloosa County Airports

**RS&H**

## I PROJECT DESCRIPTION

Okaloosa County Airports has requested a proposal from RS&H, Inc. to provide design, bidding, and construction administration services for sealing cracks in the existing bituminous pavement surface, an application of a bituminous seal coat and installation of new painted pavement markings on Taxiway A pavement at Bob Sikes Airport (CEW). The existing bituminous runway pavement is beginning to show signs of weathering and deterioration of the bituminous binder holding the fine aggregate. A crack-sealing and bituminous seal coat application will extend the life of the pavement and delay the need for more costly rehabilitation measures. After the application of the new seal coat, all-affected pavement will receive new painted pavement markings.

As part of this assignment, RS&H will also provide design plans, specifications, bid-assistance and Construction Administration (CA) services.

The Project will be designed to meet the current requirements of the FAA, Florida Department of Transportation, and the Okaloosa County Airport Administration. If standards conflict, the most stringent standard shall govern. Any deviations from these assumptions once notice has been given to the Consultant to begin the work of this contract may require a change to the Project scope and additional fees.

*Figure 1— Project Limits (CEW Taxiway A)*

This project is anticipated to be packaged as a single bid package.

The project will be evaluated and designed to the following FAA Advisory Circulars, as applicable, including (but not limited to):

- FAA AC 150/5300-13B: Airport Design
- FAA AC 150/5370-2G: Operation Safety on Airports during Construction
- FAA AC 150/5340-1M: Standards for Airport Markings
- FAA AC 150/5370-10H: Standards for Specifying Construction of Airports

## II PROJECT TASKS

### TASK 1 DESIGN PHASE SERVICES

#### Task 1.1 Kickoff Meeting / Coordination

The Consultant will coordinate and attend one kick-off meeting with the Airport staff and any other necessary stakeholders to establish design goals and methods, and schedule. Meeting minutes will be developed following the meeting and distributed to all attendees.

The Owner will provide any existing data within the project area that is available including record drawings, engineers reports, construction reports, and other applicable data. Data collection will include a review of existing project documents and bid tabulations, and a detailed visual inspection of the project site.

#### Task 1.2 100% Design Plans

The Consultant will prepare detailed 100% Design-level contract drawings for the seal coat and remarking of the Bob Sikes Airport airfield pavement. The Plans will include a phasing plan and schedule. An outline of the anticipated 100% Design plan sheets is provided below:

- Cover Sheet / Sheet Index / Summary of Quantities
- Construction Layout Plan
- Construction Phasing Plans \*
- Safety and Security Notes and Details
- Pavement Rehabilitation and Marking Plan \*\*
- Pavement Rehabilitation Detail and Notes
- Pavement Marking Details

\* Consultant will prepare overall phasing plan with general phasing notes and constraints. After award of construction contract, the selected contractor shall work with Airport Operations to establish a detailed construction schedule and phasing plan.

\*\*The Consultant will prepare an overall Pavement Rehabilitation Plan that establishes the general limits of rehabilitation and shows the proposed airfield markings for reference, along with any applicable work notes. The proposed markings will be installed over the existing airfield markings and this plan sheet will not include any marking layout guidance other than directing the Contractor to reinstall the airfield pavement markings in their existing location.

#### **Task 1.3 Construction Safety and Phasing Plan (CSPP)**

The Consultant will prepare a CSPP in conformance with FAA Advisory Circular 150/5370-2, Operational Safety on Airports during Construction, latest edition. The CSPP will be included as an attachment to the Project Manual. The CSPP will be finalized and submitted to the FAA by the Consultant on the FAA's [www.faa.gov](http://www.faa.gov) web portal for review and approval.

#### **Task 1.4 Prepare FAA Form 7460-1**

The Consultant will prepare and submit an FAA Form 7460-1 for construction of the proposed project.

#### **Task 1.5 Develop 100% Project Manual**

The Consultant will prepare a bid set Project Manual. The Project Manual will consist of:

- Okaloosa County Up-Front bidding specifications to be provided by the Owner.
- Technical specifications
- Referenced documents, which may include applicable FAA Advisory Circulars, and the CSPP

#### **Task 1.6 Estimate of Probable Construction Cost (EOPC)**

The Consultant will prepare an EOPC based on relevant, local historical bid results for the 100% Design submittal. The EOPC is an estimate representing the judgment of the estimator who have no control over the cost of labor, materials or equipment, over the Contractor's methods of determining prices, or over competitive bidding, market or negotiating conditions. Accordingly, the Consultant cannot and does not warrant or represent that bids or negotiated prices will not vary from the EOPC, funding, or from any evaluation by the Consultant.

#### **Task 1.7 Design Progress Meeting**

The Consultant will coordinate one (1) progress meeting via conference call prior to the submittal of 100% Design Documents. This meeting is intended to be a "workshop" meeting to discuss proposed materials and phasing and operational requirements. Attendees at the meeting may include the Airport Management and Operations, Airport Maintenance, FDOT, and Design Team.

**Task 1.8 Internal QC Review**

The Consultant will conduct an internal quality control review of all elements included in the 100% Design Documents prior to submittal. The Consultant will log and review all in-house quality control review comments and incorporate applicable comments into the documents.

**Task 1.9 100% Design Document Distribution**

The Consultant will submit and distribute three (3) hard copies and one electronic copy of the 100% Design plans, project manual, CSPP, and EOPC to the Airport for review and comment. Distribution quantities of the 100% Design Documents will be as noted in the Deliverables section of this Proposal. The Consultant will also submit electronic versions of these documents in PDF and AutoCAD format.

**Task 1.10 100% Design Review Meeting**

The Consultant will coordinate and attend one (1) meeting to review the 100% Design Documents submittal. This meeting is anticipated to be held remotely via teleconference.

**Task 1.11 Project Management**

The Consultant will manage the Project in a professional manner to complete the efforts within the proposed time frame. This task includes scheduling, resource allocation, monitoring, oversight, direction, and control for all aspects of the Design Team's efforts, including assembly and coordination of all documentation.

**TASK 2 BIDDING PHASE SERVICES****Task 2.1 Incorporate 100% Design Review Comments**

The Consultant will review all comments received from the Airport's authorized representative(s) from 100% Design Documents submittal review and incorporate applicable comments into the documents.

**Task 2.2 Issue Bid Documents**

The Consultant will submit and distribute three (3) hard copies of the Bid Document plans, project manual, CSPP, and EOPC to the Airport for use in bidding. The Consultant will also submit electronic versions of these documents in PDF and AutoCAD format.

**Task 2.3 Pre-Bid Conference**

The Consultant will attend a pre-bid conference remotely via teleconference, receive comments, record the minutes of the conference and distribute to the Airport's authorized representative(s) and prospective contractors.

**Task 2.4 Addenda**

The Consultant will issue all required addenda to revise plans, specifications and other contract documents prepared by the Consultant in order to (1) provide clarifications, (2) correct

discrepancies, or (3) correct errors and/or omissions. Addenda will be issued to bid document holders electronically. It is anticipated that there may be up to two (2) addenda issued during the bidding period.

#### **Task 2.5 Bid Tabulation**

The Client will compile and scan all bids received from interested contractors and send a scan of the bids to the Consultant. The Consultant will develop tabulation of all bids received and provide evaluation of checking for correctness, qualifications of low bidder, DBE participation goals, etc., and make recommendations of award. The Consultant cannot and does not guarantee that bids will not vary from the estimate. The recommendations for award will be provided within 7 days from the bid opening.

#### **Task 2.6 Conformed Documents**

The Consultant will prepare a set of conformed or Issued-for-Construction (IFC) documents after bidding is complete, but prior to the start of construction. The Consultant will incorporate all changes to the original bid documents including, but not limited to addenda, Owner value-engineering items, award (or non-award) of bid alternates, and permitting comments into a new set of plans that will be used for the construction of the project, moving forward. The Consultant will deliver three (3) hard copies and an electronic version of the Conformed Documents.

#### **Task 2.7 Construction Management Plan (CMP)**

The Consultant will develop a CMP as detailed in the FAA AIP Handbook. The CMP will include at a minimum:

- Roles and responsibilities of all individuals involved in the project
- Identify who has authority to take necessary compliance actions on the project.
- Applicable ASTM certifications of testing laboratories
- Qualifications of engineering supervision and construction inspection staff
- A list of all materials tests required by the contract documents, including the type and frequency, method of sampling, test standard, and acceptance criteria. (The actual quantity of tests required can be roughly approximated but the actual number will depend on production rates and methods used by the Contractor.)
- A list of all anticipated and required materials submittals for the project.
- Procedures for ensuring tests were taken in accordance with the contract documents.

#### **Task 2.8 Project Management**

The Consultant will manage the Project in a professional manner to complete the efforts within the proposed time frame. This task includes scheduling, resource allocation, monitoring, oversight, direction, and control for all aspects of the Design Team's efforts, including assembly and coordination of all documentation.

## TASK 3 CONSTRUCTION ADMINISTRATION SERVICES

### **Task 3.1. Preconstruction Conference**

The Consultant will attend one (1) pre-construction meeting at the Airport. The Consultant will prepare meeting minutes and distribute to attendees within five (5) working days of the meeting.

### **Task 3.2. Shop Drawing Review / RFI Response**

The Consultant will review and note disposition of Contractor-submitted shop drawings, samples, and other RFI submissions furnished by the Contractor as identified by the construction documents and submitted to the Consultant. The Consultant will maintain a log of all contractor submittals, which will include the submittal date, the action taken, and the date returned.

The Consultant will respond within seven (7) calendar days to all requests for information, claims, disputes and other matters in question between the Owner and the Contractor relating to the execution or progress of the Work or Interpretation of the Contract Documents. Interpretations and decisions of the Consultant will be in written form.

The Consultant's review is for the limited purpose of checking for conformance with information given and the design concept expressed in the Contract Documents. The Consultant is not responsible for work or requirements that are the Contractor's responsibility as defined in the Contractor's contract with the Owner.

### **Task 3.3 Pay Applications / Change Orders**

The Consultant will review Contractor applications for payment and supporting data, review the amount owed to Contractor and approve in writing all payments to Contractor in accordance with the contract documents.

The Consultant will also prepare routine change orders as required; act as interpreter of the contract plans and technical specifications and judge of the performance thereunder by the parties thereto and make recommendations on claims of airport and contractor(s) relating to the execution and progress of the work and other matters and questions related thereto.

### **Task 3.4 Clarifications**

The Consultant will provide design clarification and recommendations to assist the Airport in resolving field problems relating to the construction. The Consultant will evaluate contractor change and cost proposals and substitutions and recommend to the Airport to either approve or disapprove the Contractor's proposal or substitution.

**Task 3.5 Part-Time Construction Observation**

The Consultant will be on-site at various times during construction for construction observation. While on-site, the Consultant will offer clarification, as needed, to the design intent, identify any work being performed out of conformance with the construction documents, and verify as-built quantities of contract pay items. It is anticipated that the Consultant will be on-site at the following times during project construction:

- Application of bituminous seal coat (one day)
- Application of temporary pavement markings (one day)
- Application of permanent pavement markings (one day)
- One-site visit for undefined construction activity (one day)

The Consultant will be on-site for construction observation for up to four (4) total days at up to ten (10) hours per day. The Consultant will provide a written field inspection report for every day they are on-site during construction. Any additional construction observation services required may require a change to the Project scope and additional fees.

**Task 3.6 Substantial Completion Inspection / Punchlist Coordination**

The Consultant will attend and coordinate one (1) substantial completion inspection of contract elements and will produce a construction punchlist outlining deficiencies to be corrected prior to release of retainage. The Consultant will provide written correspondence of all punchlist items within 7 days of the inspection. The airport's inspection staff will confirm that punchlist items have been addressed. A final inspection visit is not included.

**Task 3.7 Prepare Record Documents & Closeout**

The Consultant will prepare record documents including major contract changes throughout the course of construction. The record documents will incorporate all work detailed in compiled change orders, change directives and field orders and will be based on red-line markups provided by the Contractor and/or Airport Staff. The Consultant will ensure that each document is stamped and identified as "Record Documents". The Consultant will provide the Airport with the necessary documents for FAA AIP grant closeout.

The Consultant will submit electronic files via email and USB drive of the project record documents (pdf and CAD format).

**Task 3.8 Project Management**

The Consultant will manage the project, assign qualified individuals to review project documentation and submittals, and will work closely with the Airport to help accommodate the completion of the project within the specified time frame and budget estimates.

## SCOPE OF WORK

The Consultant will submit a monthly invoice providing an overview of the work accomplished during the billing period and budget remaining on the project.

### III MEETINGS AND PRESENTATIONS

RS&H will prepare for and attend the following meetings:

- » Design Kickoff Meeting (At Airport)
- » 100% Design Progress Meeting (Virtual)
- » 100% Design Review Meeting (Virtual)
- » Pre-Bid Conference (Virtual)
- » Pre-Con Conference (At Airport)
- » Part-Time Construction Observation (4) (At Airport)
- » Substantial Completion Inspection (At Airport)

### IV DELIVERABLES

RS&H will provide the following deliverables:

- » 100% Design Submittal – 3 Sets of Plans, Specifications, Opinion of Probable Construction Cost, and CSPP.
- » Bid Documents Submittal – 3 Sets of Plans, Specifications, Opinion of Probable Construction Cost, and CSPP.
- » Conformed Documents Submittal – 3 Sets of Plans, Specifications, and CSPP.

All deliverables will also be provided in electronic format.

### V PROJECT SCHEDULE

RS&H will provide the above referenced services within the following schedule (or as mutually agreed upon by the Client and Consultant).

	Date
NTP	05/06/2024
Kickoff Meeting	05/16/2024
Design Progress Meeting	06/11/2024
100% Design Submittal	07/11/2024
100% Design Meeting	07/17/2024
Bid Document Submittal	08/01/2024
Bid Advertisement	08/13/2024
Bid Opening	09/19/2024

## VI ASSUMPTIONS AND EXCLUSIONS

The following assumptions have been made for this Scope of Work:

- » Project will be bid as a single bid package.
- » Project will be funded by an FDOT grant

The following items are excluded from this Scope of Work:

- » Environmental Services (including NEPA documentation)
- » Additional meetings other than those identified in Section III
- » Topographic survey
- » Aerial survey
- » Geotechnical investigation
- » ALP Update
- » AGIS Update
- » Full-time RPR construction inspection
- » RS&H will only perform services/work related in any way to PFAS chemicals or substances possibly containing PFAS chemicals (including but not limited to sampling, handling and remediating), to the extent the Okaloosa County Airports specifically directs, in writing, RS&H to perform such services/work, and RS&H shall not be liable for the nonperformance of such services/work.

## VII PROFESSIONAL SERVICES FEE AND FEE TYPE

RS&H will provide the above referenced services for a Fixed Lump Sum Fee of \$52,780. See Attachment A for a breakdown of costs.
