Revision 3 Contract – “Article IX - Insurance”

Item A.4 of Article IX of the contract requires Builders Risk Insurance. This is no longer a requirement of the contract and has been removed from Page 3 of the proposed contract.

Question 1: Will Contractor’s be able to dispose of both storm and sanitary debris at Buffalo Grove’s Public Services Facility?

Response: No, disposal of this debris will not be allowed to occur at the Village’s Public Services Facility.

Question 2: Can CCTV Video be recorded in software other than PipeTech?

Response: Yes.

Question 3: The definition of light cleaning vs heavy cleaning is contradictory. Light cleaning is described as however many passes it takes to get the camera to see all the defects and condition of the pipe, yet there is a line item for Heavy Cleaning if additional passes are needed. Following NASSCO guidelines, light cleaning is usually defined as two passes (sometimes three), after which heavy cleaning applies. Please clarify.

Response: NASSCO Guidelines do not state number of passes for any type of cleaning. Below is the Village's definition of Light Cleaning vs. Heavy Cleaning:

Light cleaning shall provide preparatory cleaning of the sewer section to permit unobstructed passage of the CCTV camera and clean enough for the camera to identify structural defects, misalignments, service lateral connections, and points of infiltration to the satisfaction of the Public Works Director or his designee. Perform a cleaning with high-velocity jet consisting of up to as many passes or flushes needed of the entire sewer section, if necessary, to allow adequate viewing of the pipe for the purpose of proper condition assessment. Limit pullback speed to no more than one foot per second, and utilize a maximum pressure of 1200 pounds per square inch (psi). Remove roots as needed to allow for unobstructed passage of the televising equipment. Light cleaning is incidental to the CCTV inspection of sanitary and storm sewers.

Heavy cleaning is additional cleaning approved on a case by case basis by the Director of Public Works or his designee which can include, but not be limited to, additional passes or flushes of the entire sewer section with the high-velocity jet, power rodding, or bucket equipment
