Marine Turtle Permit

Florida Fish and Wildlife Conservation Commission
Imperiled Species Management Section-Tequesta Field Lab, 19100 SE Federal Highway
Tequesta, FL 33469
(561) 882-5964

Permittee: GEORGE GRAY Permit#: MTP-19-033
EMERALD COAST TURTLE WATCH Effective Date: 02/28/2019
P.O. BOX 5048 Expiration Date: 12/31/2019
DESTIN, FLORIDA 32540
UNITED STATES
Principal Officer: GEORGE GRAY
Qualified Individual: George Gray

Is Authorized to:

1. conduct nesting surveys;
2. relocate nests for conservation purposes - see Conditions;
3. conduct stranding/salvage activities;
4. maintain & display preserved specimens;
5. monitoring for mechanical beach cleaning;
6. conduct public hatch success evaluations;
7. outfit nests with restraining cage - when specifically approved by FWC on a case-by-case basis;
8. conduct hatch success evaluations - see Conditions; and
9. recover & release disoriented hatchlings - see Conditions.

Authorized Nesting Survey

- Area:
1. Navarre Beach;
 2. Okaloosa County Island Beaches;
 3. Okaloosa County Beaches - Middle; and
 4. Okaloosa County Beaches - East.

Principal Officer _____ Date: _____
Signature: _____

Not valid unless signed by the Principal Officer. By signature, the Principal Officer confirms that all information provided to issue the permit is accurate and complete, and indicates acceptance and understanding of the provisions and conditions listed below. **Any false statements or misrepresentations when applying for this permit may result in felony charges and will result in revocation of this permit.**

By signature, I acknowledge that I have read and understand this permit. Signature of this permit indicates that I, the Qualified Individual and all authorized personnel listed below have read and agree to abide by all Florida Fish and Wildlife Conservation Commission (FWC) Marine Turtle Conservation Handbook sections that pertain to the authorized activity(s) listed on this Marine Turtle Permit. I understand that it is my responsibility to transmit all future information updates to all authorized personnel listed on my permit. Principal Officer must provide a signed copy of this permit to the FWC (address above or MTP@MyFWC.com) to activate this permit.

Authorized By: ROBBIN TRINDELL Authorized for: Eric Sutton, Executive Director

Authorizing Signature: _____ Date: 02/28/2019
Marine Turtle Permit

Authorized Research Projects: None.

Authorized Monitoring Projects:

1. Monitoring for Navarre Beach Dune and Berm Nourishment project (DEP File No. 0220096-006-JC), authorized 2016.

Authorized Personnel:

Sara Gray; Cathy Holmes; James Holmes; Cinnamon Taylor; Jeff Ragland; Neil Gray; Pam Saxton; Paige Douglas; Ralph Agnew; Michael Sandler; Johnny Springfield; Jenna King; Shelby Proie; Michelle Pettis; Arianna Clough; Susan Calhoun; Ali Hooker.

PERMIT CONDITIONS AND PROVISIONS:

- 1 Permitted individuals must adhere to the FWC Marine Turtle Conservation Handbook developed under a Section 6 Cooperative Agreement between FWC and the U.S. Fish and Wildlife Service.
- 2 All transfers of marine turtles or specimens into or out of the State of Florida must be accompanied by a specific consent permit from FWC.
- 3 See attached Marine Turtle Monitoring for beach restoration projects.
- 4 Nest relocation is limited to:
 1. Nests low enough on the beach to be washed daily by tides, or
 2. Nests situated in well-documented high risk areas that routinely experience serious erosion and egg loss.

All relocated nests will be marked and the actual location of the clutch determined. A circle with a minimum radius of three (3) feet, centered at the clutch, shall be marked by stake and survey tape or string.

- 5 Nest inventories (i.e., hatch and emergence success evaluations) of loggerhead and green turtle nests may only be conducted no earlier than 72 hours after the first sign of emergence or 70 days after the eggs were deposited, whichever occurs first. Nest inventories of leatherback nests may be conducted no earlier than 72 hours after the first signs of emergence or 80 days after the eggs were deposited, whichever occurs first. A nest that has been subjected to inundation, excessive rainfall, shading, or cool fronts, should not be excavated until 80 days after egg deposition or 96 hours after the first emergence to allow all hatchlings to emerge naturally before excavating the nest.

If 10 or more live hatchlings are encountered during a hatch success evaluation, recover the egg chamber with moist sand and return the site to its original condition. Permittee and Authorized Personnel must wait at least 24 hours before attempting to excavate again. This process should be repeated until such time as <10 live hatchlings are encountered in the nest indicating that the mass emergence has already occurred and that hatchlings able to leave the nest on their own have done so.

Nests may not be evaluated earlier than outlined above for any reason without specific written approval from FWC prior to evaluation.

- 6 The following conditions are associated with the activity "recover & release disoriented hatchlings" in Okaloosa & Santa Rosa Counties:
 1. Each person authorized to participate in the recovery and release of disoriented or caged marine turtle hatchlings must attend at least 2 training sessions (1 orientation course and 1 field-based session with Mr. George Gray or an authorized individual designated by Mr. George Gray).
 2. The Qualified Individual and Authorized Personnel shall access and travel the beach by foot only.
 3. Spot checking of marked nests and response to notifications (e.g., phone call, text) of disorientation events is authorized.
 4. Sticks or other poking/probing devices may not be used.
 5. Use of flashlights is prohibited, except when necessary to: locate disoriented marine turtle hatchlings; verify that all released hatchlings have departed the swash zone; or to confirm nest label on the nest stakes. Any flashlight or head lamp used shall have either a red LED light source or employ a red filter that eliminates short wavelength light. Flashlights may not be used to attract hatchlings into the water.

6. Flash photography is strictly prohibited under all circumstances.
7. Recovered hatchlings should be released as soon after recovery as possible; hatchlings that can be released should not be held more than 30 minutes after recovery. Disoriented hatchlings may not be held while waiting for subsequent emergences of hatchlings from the same nest or different nests. If disoriented hatchlings need to be temporarily contained in order to recover additional disoriented hatchlings from the same emergence they shall be placed in a bucket with a small amount of moist sand in the bottom. Hatchlings should not be held in water.
8. All live hatchlings must be released within two hours of their collection. Release of recovered disoriented hatchlings shall be attempted immediately after hatchling recovery and as close to the original nest site as possible. The first release attempt should take place closer to the water line seaward of the nest site. If the hatchlings continue to disorient, the hatchlings may be transported to a nearby section of beach that is darker. If the hatchlings are lethargic, injured, still have a yolk sac, or have not successfully departed the surf zone or nearshore waters within 10-15 minutes of release, they should be retrieved and release attempted again later as outlined in the FWC Marine Turtle Conservation Handbook, Section 2.
9. Only disoriented marine turtle hatchlings may be recovered. If hatchlings are making their way towards the ocean at an angle less than 45 degrees from the most direct path to the water, volunteers may not collect these hatchlings. Volunteers may not collect hatchlings as they emerge and disperse from a nest until such time as the hatchlings have traveled a minimum of 10 feet from the clutch site and become disoriented (e.g., are traveling at an angle of 45 degrees or greater from the most direct path to the water).
10. Disorientation forms shall be completed for each hatchling emergence event where hatchlings become disoriented. These disorientation forms shall be submitted to FWC at least weekly via FWC's online Disorientation Reporting System, e-mail (SeaTurtleLighting@MyFWC.com) or fax (561-743-6228).
11. A summary of the activities of this program shall be submitted to Imperiled Species Management staff no later than the expiration date of this permit. This summary shall include, minimally: the number of live disoriented hatchlings recovered, the number of dead disoriented hatchlings recovered; the number of disorientation events documented as a result of nighttime notification and response; the date disoriented hatchling recovery activities were initiated; the date disoriented hatchling recovery activities were terminated; and an evaluation of the 2019 season. The summary should be sent to MTP@MyFWC.com or 19100 SE Federal Highway, Tequesta, Florida, 33469.

A person whose substantial interests are affected by FWC's action may petition for an administrative proceeding (hearing) under sections 120.569 and 120.57 of the Florida Statutes. A person seeking a hearing on FWC's action shall file a petition for hearing with the agency within 21 days of receipt of written notice of the decision. The petition must contain the information and otherwise comply with section 120.569, Florida Statutes, and the uniform rules of the Florida Division of Administration, chapter 28-106, Florida Administrative Code. If the FWC receives a petition, FWC will notify the Permittee. Upon such notification, the Permittee shall cease all work authorized by this permit until the petition is resolved. The enclosed Explanation of Rights statement provides additional information as to the rights of parties whose substantial interests are or may be affected by this action.

This has everything. I made sure I checked everything off. The only thing was the time. We made sure we hit the beach according to the sunrise chart you gave us at the beginning of the season. But otherwise we did not pay attention to when we were finished.

Sara
